

# Turn scientific and technical documentation into interactive online training

AI-assisted learning platform for pharma, biotech and healthcare

Live Aula helps organisations transform existing scientific, technical and regulatory materials into structured online courses with lessons, assessments, learner tracking, certificates and analytics.

SCIENTIFIC & TECHNICAL DOCUMENTATION

INTERACTIVE ONLINE TRAINING

## Why it matters

- Faster knowledge transfer from existing materials
- Consistent training across teams and partners
- Scalable onboarding, compliance and product education
- Trackable learning outcomes and certificates

## Typical use cases

- Medical affairs and scientific training
- Compliance and regulatory training
- Onboarding for internal teams and partners
- Product education and launch readiness
- Professional education and knowledge transfer

## Key capabilities

- AI-assisted course creation
- Lessons, quizzes and assessments
- Learner progress tracking
- Certificates and validation
- Analytics and reporting
- SCORM support
- Optional managed course transformation services

## Who we work with

- Pharma companies
- Biotech firms
- Healthcare organisations
- Medical communication teams
- Consultancies
- Training providers

Looking for a partner to convert complex documentation into clear, scalable training?
