

Indoor Location Intelligence Platform

Our Solutions

Maps

Fast roll-out indoor digital maps with customizable design and multi-language support. Keep your maps up-to-date and accessible to your team and visitors at all times.

Indoor Positioning

Accurate indoor positioning (1-3 meters) with **smooth multi-level** transitions. **Outdoor & Indoor** seamless positioning.

Wayfinding & Navigation

Guide your visitors effortlessly to their destination with **advanced search, turn-by-turn** navigation, and **accessibility** features.

Analytics

Understand the traffic Flow. Get valuable insights to **optimise your space** . Send **location based info**.

Indoor Mapping and Navigation

Inclusive Indoor Map Experience

Digitize every corner of your venue with precision maps providing pinpoint clarity of location and direction for a seamless, intuitive indoor journey.

Accurate Wayfinding for Everyone

Deliver smooth, inclusive navigation with accessible routes, live rerouting, and intelligent path optimization.

Dynamic & Flexible Point Control

Easily add or update key locations like stores, offices, or event areas to keep your maps accurate and up to date.

Indoor Mapping and Navigation

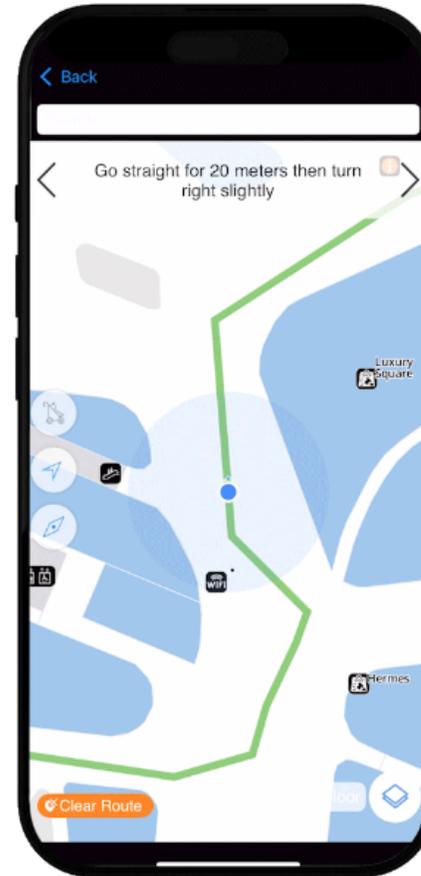

Simple and Easy to Use

- Beautiful, user-friendly maps with detailed, easy-to-recognize features
- Enjoy smooth 2D/3D navigation. Enjoy intuitive zoom, pinch, and tilt gestures, with map details that automatically adapt to your view.
- Seamlessly switch between floors with clear context, or bring multiple buildings and outdoor areas together into one unified map.

Indoor Mapping and Navigation

Scalable Indoor Navigation

- Up to 1 meter accuracy using PoiLabs' Indoor Positioning Technology
- Easy Indoor Navigation – Step by Step with Live Updates
- Works Without an App: Scan & Go
- Accessible navigation with step-free routes, voice directions, and simple icons for clarity.

Indoor Mapping and Navigation

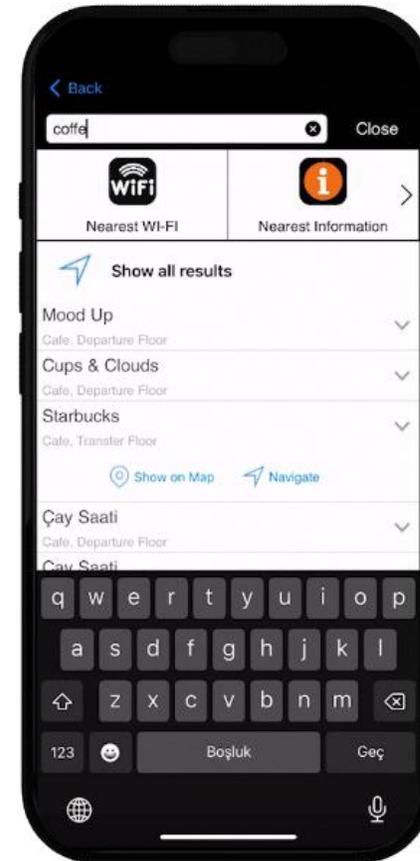

Multi-Platform. Infinitely Customizable

- Support for multiple languages, including multi-language maps
- All Platforms Covered: Mobile, Web, and Digital Signage
- Fully customizable maps with icons and colors aligned to your brand

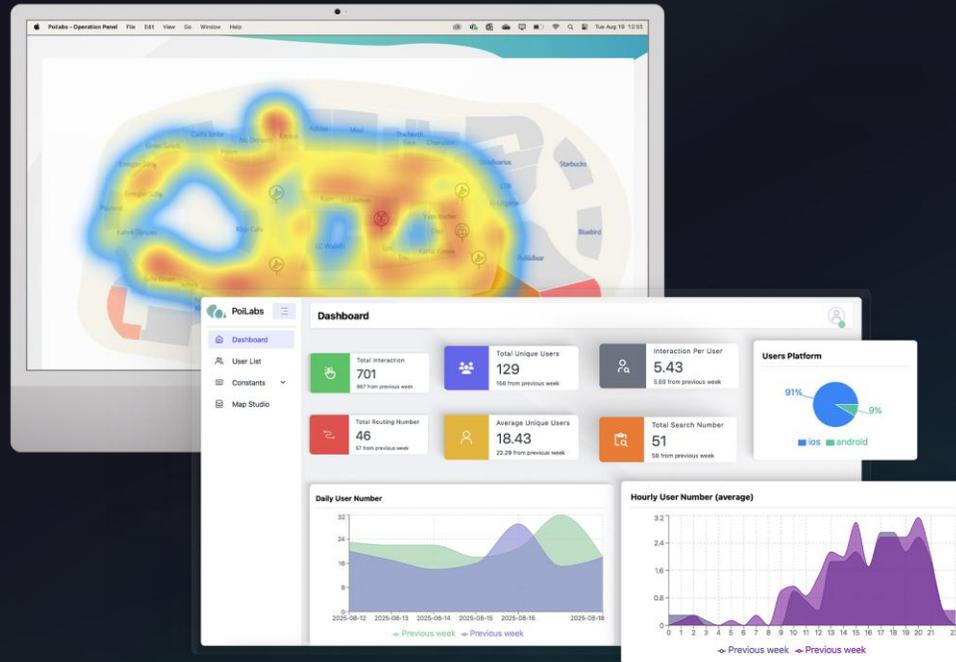

Indoor Mapping and Navigation

Advanced Search & Smart Directories

- Every Point of Interest (POI) and its rich data is fully searchable—even down to product-level details.
- The system is fully configurable, with customizable categories and icons for common searches, making scrolling and selection simple.
- All searches, whether successful or not, are anonymously captured for powerful analytics.

Indoor Analytics

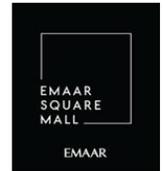

Real-time indoor analytics for healthcare facilities. Understand how patients, visitors, and staff move through your building — and use that intelligence to cut inefficiencies, improve flow, and enhance the care environment.
