What we make?

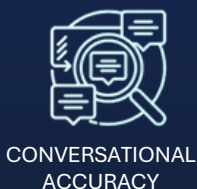

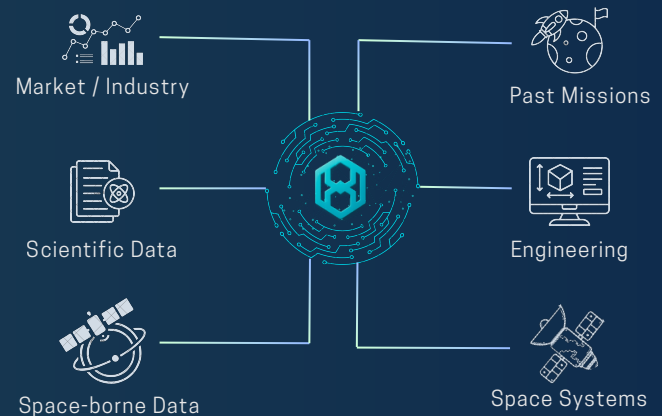

BOOK A DEMO

## DOMAIN - EXPERT AI

### AI MODELS

**Proprietary Aerospace Intelligence.**

Fusing scientific data, past missions, and engineering standards into a single, intelligent core for unparalleled context and accuracy.

CONVERSATIONAL  
ACCURACY

EFFICIENT  
FILTERING

DIRECT  
CONTROL

COLLABORATIVE  
ORCHESTRATION

## AI FOUNDATIONS

### PLATFORM

**Enabling Enterprise AI readiness**

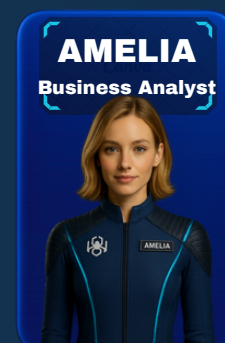

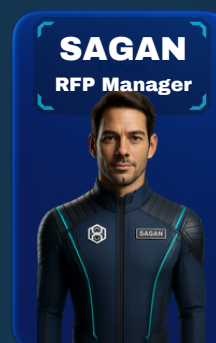

Advanced agentic RAG enabling a secure knowledge base from your private data. Enabling conversational accuracy, direct control, and collaborative orchestration..

## EXPERT ASSISTANTS

### PRE-BUILT AGENTS

**Domain-specialized AI co-pilots.**

Your first digital employees. Role-specific, pre-trained, ready to deploy agents; that understand your workflows and act as executive assistants to your experts.

# AI FOUNDATIONS

## Our state-of-the-art agentic-RAG solution

All your enterprise data in one place -  
one query away.

PLATFORM

## Features

### Agentic Graph-RAG

Beyond simple search.  
Knowledge graph + vectorDB  
for superior insights.

### Workflow Integration

Interact via email and chat.  
Access your AI via existing  
tools.

### Auto DB Management

Automate your database.  
Curation and manage from  
your trusted sources.

### Flexible Deployment

Your data, your control.  
Secure cloud or a private,  
on-premise compute device.

### Aerospace Intelligence

Powered by our proprietary,  
domain-specific models (e.g.,  
space systems engineering).

### Context-Aware Accuracy

From retrieval to reasoning.  
Get precise, synthesized  
answers from your DB.

## Single Setup - Multi Utility

Connect

Index

Converse

### Business Development

Track proposals, renewals, and blockers by  
syncing your CRM and contracts

Example

"Which ESA/CD contracts renew in  
the next 30 days, who's blocking  
them, and what's the next action?"

### Engineering

Search Git repos, codebases, and logs with  
context across payload, GNC, and avionics  
work.

Example

"List open issues tagged 'telemetry'  
in 'gnc/limu' and show the last 3  
related commits."

### Logistics

Watch long-lead and rad-hard parts, POs,  
and lead times. Flag risks and suggest  
qualified alternates.

Example

"Show POs delayed >7 days for rad-  
hard MCUs and suggest alternates  
to avoid stockouts."

# SAGAN

## Proposal Writer Agent

Addressing the critical and demanding RFP response workflow faced in every space tech SME

PRE-BUILT AGENT

## Features

### Direct RFP/ITT Integration & Formatting

- Compliant In-document Writing: EU Horizon, ESA ITT, SBIR formats.
- Instant Content Population: Reusable content, accelerated drafting.
- Automated Requirement Mapping: Full traceability, zero gaps.

### Targeted Research & Synthesis

- Accelerated Lit Review: Summarize research from AIAA, IEEE, arXiv.
- Query Internal Knowledge: Instantly access your private data.
- Automated Findings & Citations: Build technical credibility, fast.

### Strategic Planning Assistance

- Effective Proposal Structuring: Draft WBS and Work Packages.
- AI-Generated Agendas: Intelligent prompts for kickoff meetings.
- Instant First Drafts: From blank page to structured outline in minutes.

### Intelligent Collaboration Facilitation

- Automated Team Coordination: MS Teams & Google Meet integration.
- Real-Time Meeting Intelligence: Live transcription & action item capture.
- Seamless Feedback Integration: Consolidate stakeholder input, effortlessly.

## Supercharge your RFP response team

### Up to 2×

#### Increase in Proposal Throughput

Submit significantly more high-quality, compliant proposals with the same team by automating ~65% of manual effort.

### Up to 50%

#### Reduction in Proposal Cycle Time

Compress timelines from RFP release to submission by accelerating research, drafting, and compliance checks.

### 70%+

#### Expert Time Reclaimed

Free your experts from tedious tasks to focus on solution design and strategy.
