

**We enjoy leading
the companies into
the future**

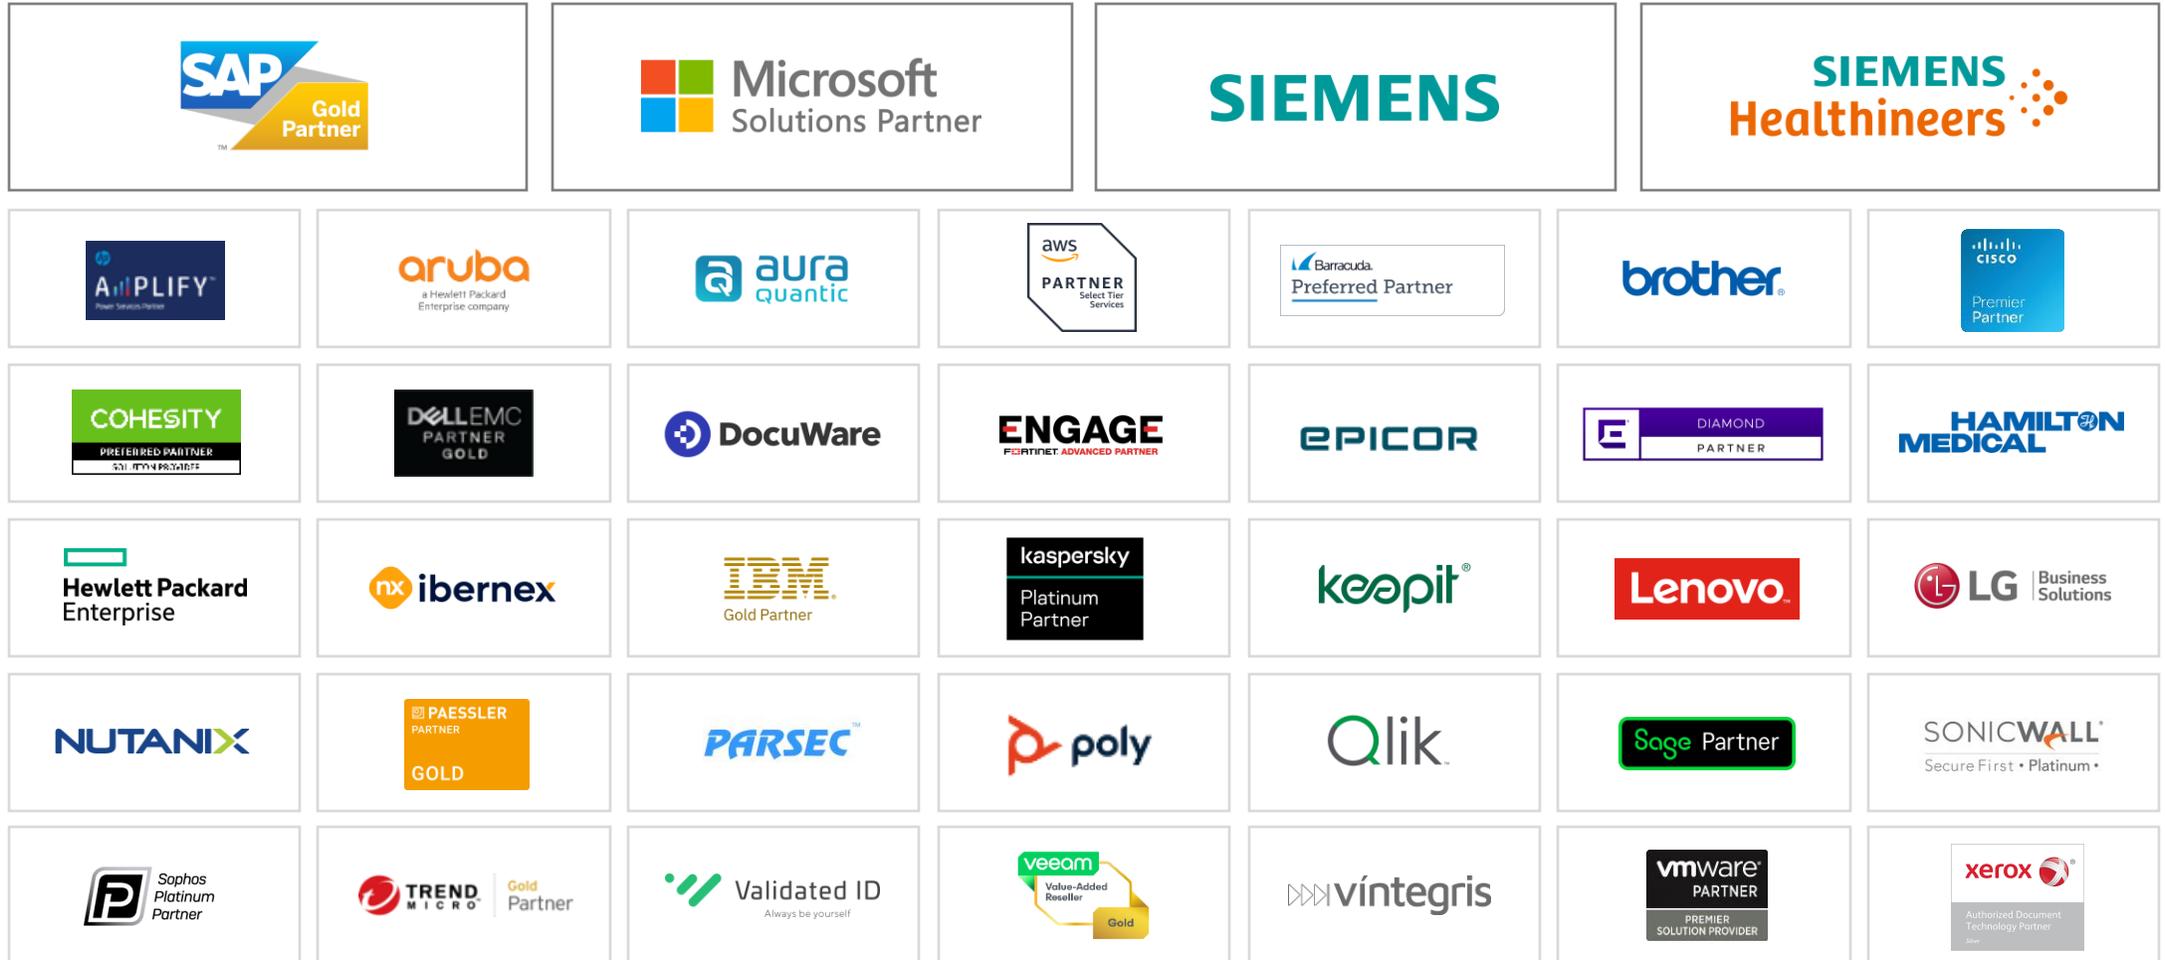

Who we are

Specialists in technology

With over 15 years of experience, we are experts in the implementation of comprehensive technological solutions, aiming to provide unique solutions for both public and private establishments.

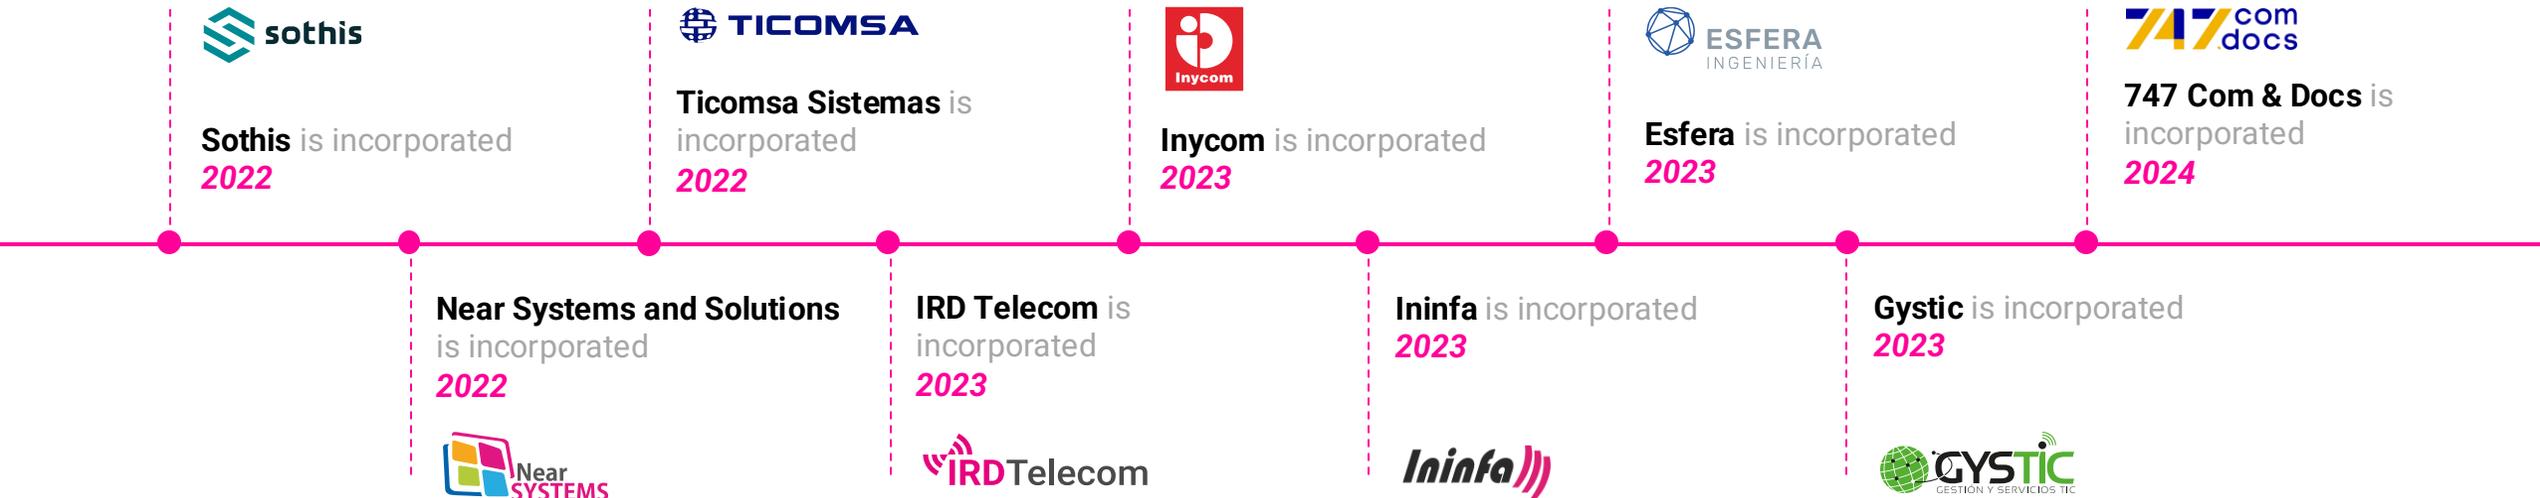

+ 100 Technological Partners

Origin and expansion

BPLAN Soluciones, the predecessor of current Nunsys, was established in 2007. Since then, **more than 30 companies** specializing in niche technologies have been incorporated, allowing us to offer a broad portfolio of solutions and senior expertise for successful implementations.

Growth in the last 2 years

Offices in Spain and abroad

Continuous growth

Our business vision is to become the leading Spanish technological company. To do so, we have established branches with certified teams throughout the national territory.

Manpower

We keep growing!

We are experiencing significant growth, currently forming a team of **more than 2,700 people**. Our presence is built throughout Spain and ,also, in international projects, with a unique portfolio of products and services. We are highly specialized and focused on covering the needs of our clients to accompany them in their digital transformation process.

For us, it is vital that we provide all our employees with the opportunity to develop both personally and professionally in a leading and exemplary company, enjoying the atmosphere of collaboration, creativity and responsibility.

Communications

Always available, secure, optimized, and capable of reporting their status and activity:

The need for connectivity for both people and machines makes communication infrastructure critical for the operation of any business activity. Among the main services are:

Nunsys Telco. As a telecommunications operator, we provide connectivity with the best available technology in your location (fiber optics, radio links, 5G, satellite, etc.), deploying VPN-MPLS networks and SD-WAN solutions to connect your branches.

Networking. We have the equipment and all the services related to the fundamental functions of an enterprise networking, with scalable and customized solutions. Our focus is on the user experience of the IT/OT corporate network.

Physical Infrastructure. With structured cabling solutions from leading manufacturers, we develop comprehensive network projects and electrical and special installations.

Communications

Always available, secure, optimized, and capable of reporting their status and activity:

Collaboration solutions cover all the communication needs of employees anywhere and from any device, through tools that integrate IP telephone services, video conferences, corporate chat, mobile devices, email, WhatsApp, etc. This optimizes effective communication time and enables productive remote work with a single tool for any device.

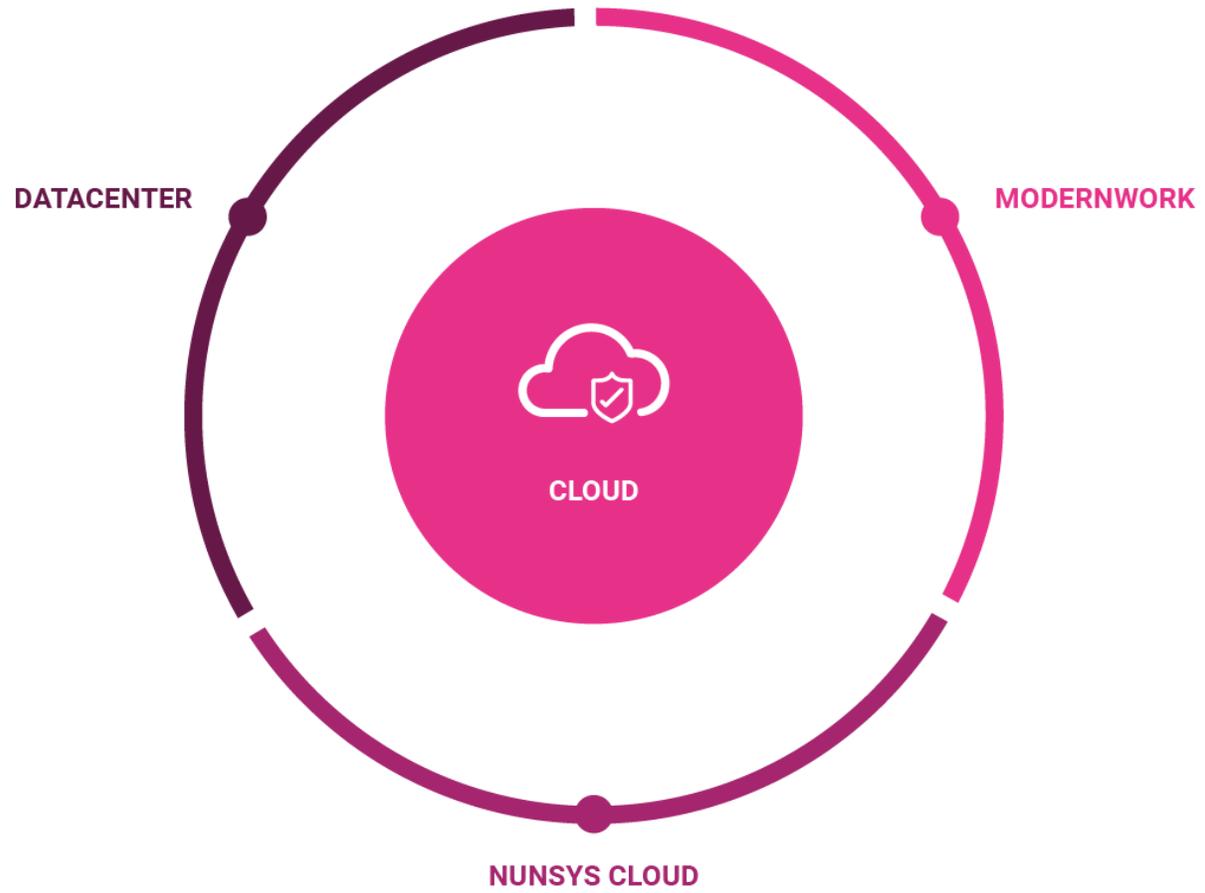

Contact Center. By implementing advanced technology and leveraging the value of our dedicated teams, we provide unique solutions tailored to each client's needs.

Perimeter Security. We protect your corporate network with an additional layer of security at all levels. With our accumulated experience, we can tackle any project that requires a complex solution and high availability in a service-oriented manner.

+ info

Cloud Solutions

Digital Transformation involves the adoption of new technologies and MultiCloud services that drive companies into the future:

The transformation to the Cloud requires a high level of expertise and knowledge of new technologies and the business, enabling us to develop a modernization and migration plan for infrastructure and applications to the Cloud. We must ensure application and data mobility in a MultiCloud environment, where Private Cloud and Cloud Hybridization prevail to maintain control over data. Continuous monitoring minimizes costs and ensures 24x7 availability and services.

Datacenter. Based on the company's needs, the IT infrastructure supporting applications can be built on any form of Cloud - Public, Private, or Hybrid - ensuring information protection and business continuity. The operational model is agile and focused on automation, improvement, and innovation

Cloud Solutions

Digital Transformation involves the adoption of new technologies and MultiCloud services that drive companies into the future:

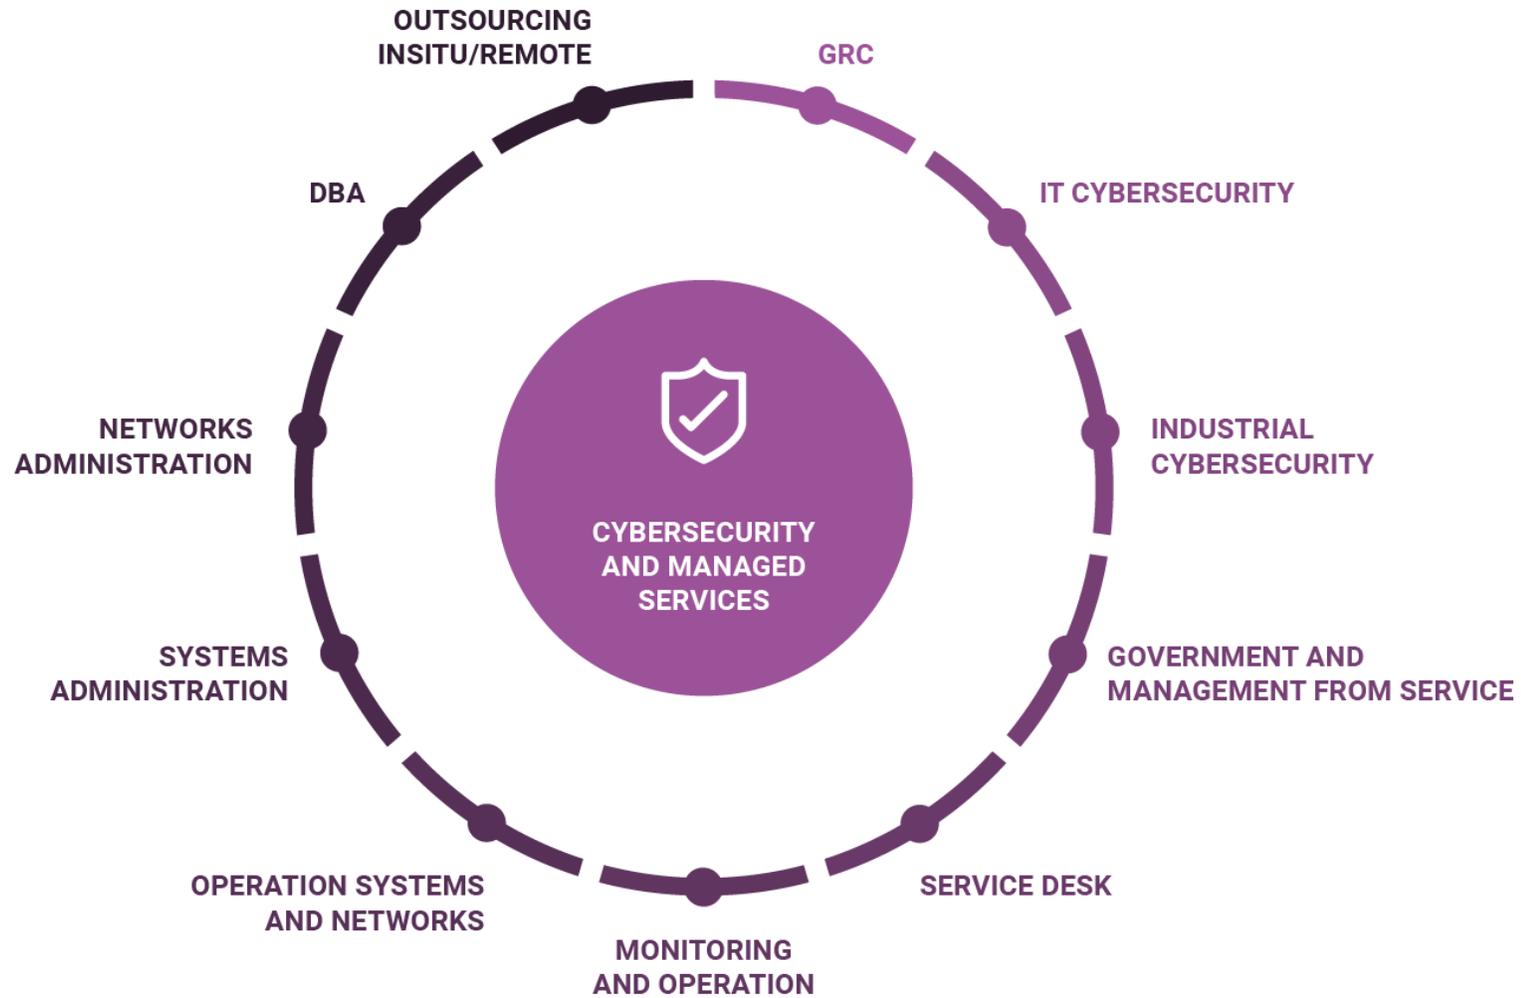

Workplace Cloud. Not all companies or users have the same needs. Our services vary from a simple collaboration and sharing space to the most complex desktop virtualization solution for special security requirements and access to critical applications.

Nunsys Cloud. We are a local Datacenter offering a wide range of Cloud services such as Housing, Hosting, Virtual Datacenter (certified for SAP HANA), DraaS, and BaaS. These services provide companies with the flexibility and peace of mind to host any workload in the Cloud. Backed by a team of highly skilled engineers, we ensure top-notch support and expertise.

+ info

Cybersecurity

Always available, secure, optimized, and capable of reporting their status and activity:

At Sothis, we offer comprehensive cybersecurity services, evaluating business risks and protecting companies from potential cyber attacks and any availability, integrity, and confidentiality failures. Through our renowned Security Operations Center (SOC) ERIS-CERT, we safeguard companies, detect threats, and respond to cybersecurity incidents. We specialize in delivering consulting services, security assessments, risk analysis, managed security services, and building tailored security solutions for each client.

Governance, Risk, and Compliance. We provide professional services that help companies define and implement a strategy aligned with their business objectives to reduce cybersecurity threats, comply with applicable regulations, implement necessary measures, and be prepared to respond to a possible security breach.

Industrial Cybersecurity. We offer comprehensive risk assessments, customized solutions, and advanced monitoring and protection systems for your critical assets, ensuring the operational continuity of your industrial processes.

Managed Services and Outsourcing

Enhancing competitiveness and process efficiency through outsourcing models.

We enable companies to outsource a part or all their IT services, allowing them to concentrate their resources on more productive tasks that improve their growth and competitiveness. This approach reduces costs, time, and effort while minimizing the margin of error in decision-making and increasing process efficiency.

Layered outsourcing of IT needs includes user support, desktop support, monitoring, system administration, database management, and communications, available in 12x5 or 24x7 coverage.

Systems Outsourcing provides dedicated specialized services, including desktop support, server management, and cloud services.

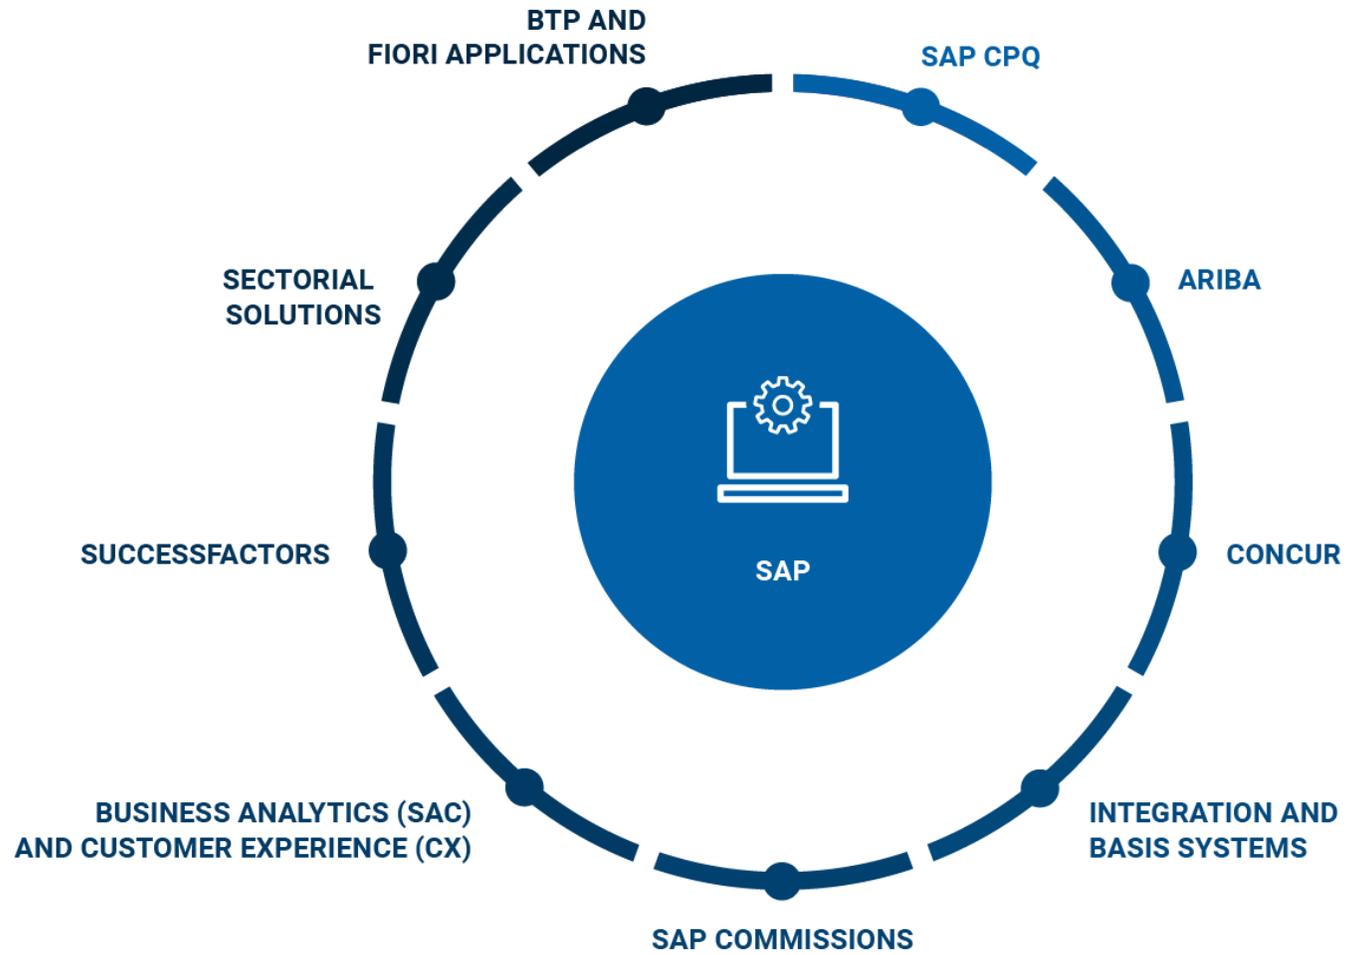

Communications Outsourcing offers dedicated specialized services in the area of networking, including switching, routing, and firewall management.

Software Outsourcing provides dedicated specialized services in technology development or enterprise software management.

Cybersecurity Outsourcing provides dedicated specialized cybersecurity services.

SAP

Transforming business processes with the most comprehensive intelligent ERP.

In the SAP business unit, we assist companies in their digitalization journey through advanced SAP solutions, one of the world's leading providers of enterprise software.

SAP is a globally recognized leader whose technology helps organizations of all sizes and industries become more efficient. Their technology is present in 77% of global transactions and they have over **440,000 customers in 180 countries**.

With **385 consultants** at Sothis-Nunsys, we support you in your migration to S/4HANA, maximizing the benefits for your business. **70%** of our staff is certified, and we guarantee the highest utilization of standard functionalities while minimizing custom developments.

We have certified vertical solutions for industries such as construction, chemicals, pharmaceuticals, professional services, meat processing, logistics, CX Sales, Analytics for chemicals, and conversion to S/4HANA.

SAP

Transforming business processes with the most comprehensive intelligent ERP.

We have proven experience in SAP S/4HANA, both in the Cloud and On-premises, ensuring maximum utilization of standard functionalities and minimizing custom-made developments.

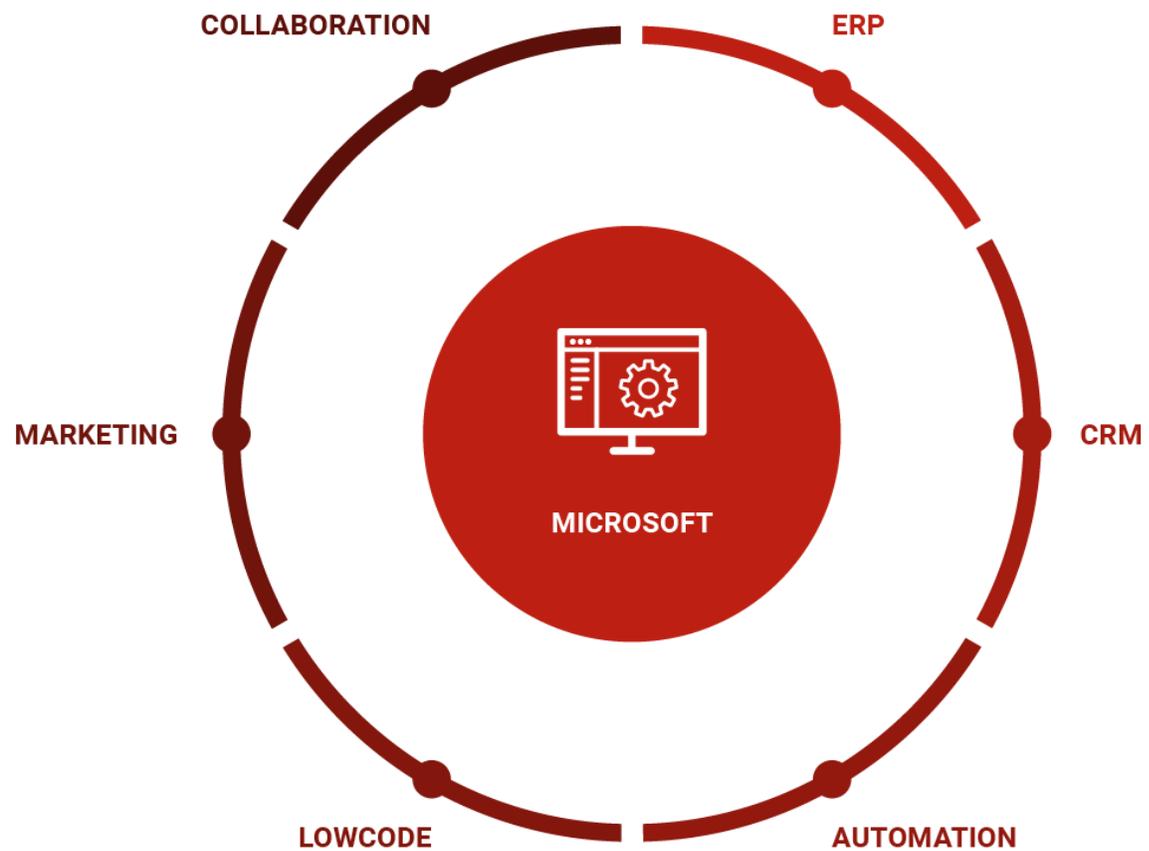

In addition, we specialize in the region of Spain and have a recognized international experience, with a deep knowledge of SAP Document and Reporting Compliance, both in standard solutions and in extending electronic invoicing solutions for countries not covered by SAP.

As an accredited Education Partner and SAP Training Partner, we are official resellers of SAP training. We can tailor training programs for SAP clients. We have trained over 600 consultants in Master Degree programs offered by nine Spanish universities and educational centers.

Microsoft

Drive your business forward with a Microsoft Cloud Solution Partner

Microsoft Dynamics 365. Enhance customer experience and build lasting relationships with Microsoft Dynamics 365. With its customer-centered approach, you can better understand their needs, anticipate their expectations, and deliver exceptional service at every touchpoint. Provide personalized experiences that foster long-term loyalty of your customers while boosting the profitability of your projects.

Microsoft Power Platform. Transform your business with a suite of development and automation tools that allow you to build mobile and web applications with Power Apps, automate workflows, visualize data, and generate intelligent reports with Power Automate and Power BI. Unleash the power of collaboration and innovation within your organization.

Microsoft

Drive your business forward with a Microsoft Cloud Solution Partner

Microsoft Sharepoint. Automate workflows, optimize collaboration, and gain greater transparency in your documents with auditing and version control functionality. With its document digitization capabilities, you can streamline tasks and improve efficiency in managing internal processes. Additionally, with custom reports, receive valuable insights and make data-driven decisions.

Azure. Trust the world's leading cloud platform. With a wide range of services and tools, Azure offers a robust and reliable infrastructure backed by Microsoft's expertise, allowing you to leverage agility and flexibility to efficiently develop, deploy, and manage your applications and services.

Microsoft

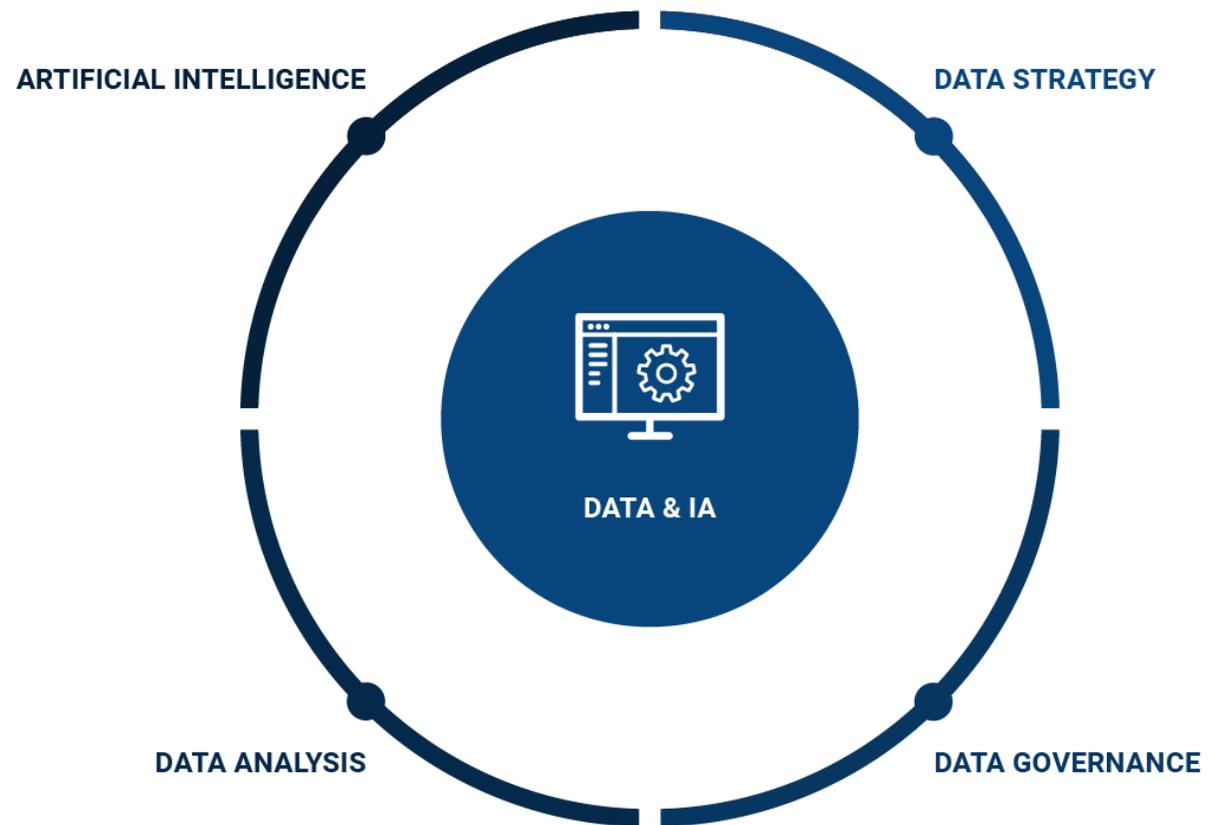

Work smarter and achieve better results with our ERP solution

Business Central. Unlock the limitless potential that Business Central and the Microsoft ecosystem have to offer. Its automatic and regular updates ensure that your company benefits from security enhancements and the latest features and functionalities, without interruptions nor additional costs, enabling you to gain deeper insights and increase efficiency in all aspects of your business.

Data & IA

Harness the power of predictive techniques and anticipation in decision-making.

Data Strategy. We provide comprehensive data strategy solutions, ranging from strategic consultancy (Data-Driven) and implementing a Data Master Plan to creating Maturity Models, designing robust Data Architecture, conducting technological benchmarks, and adopting innovative approaches like Data Mesh/Data Fabric.

Artificial Intelligence. We offer a comprehensive set of solutions covering Machine Learning, Predictive Analysis, Generative AI, Data Science, Data Mining, and implementing Cognitive Services to address diverse needs and challenges.

Data & IA

Harness the power of predictive techniques and anticipation in decision-making.

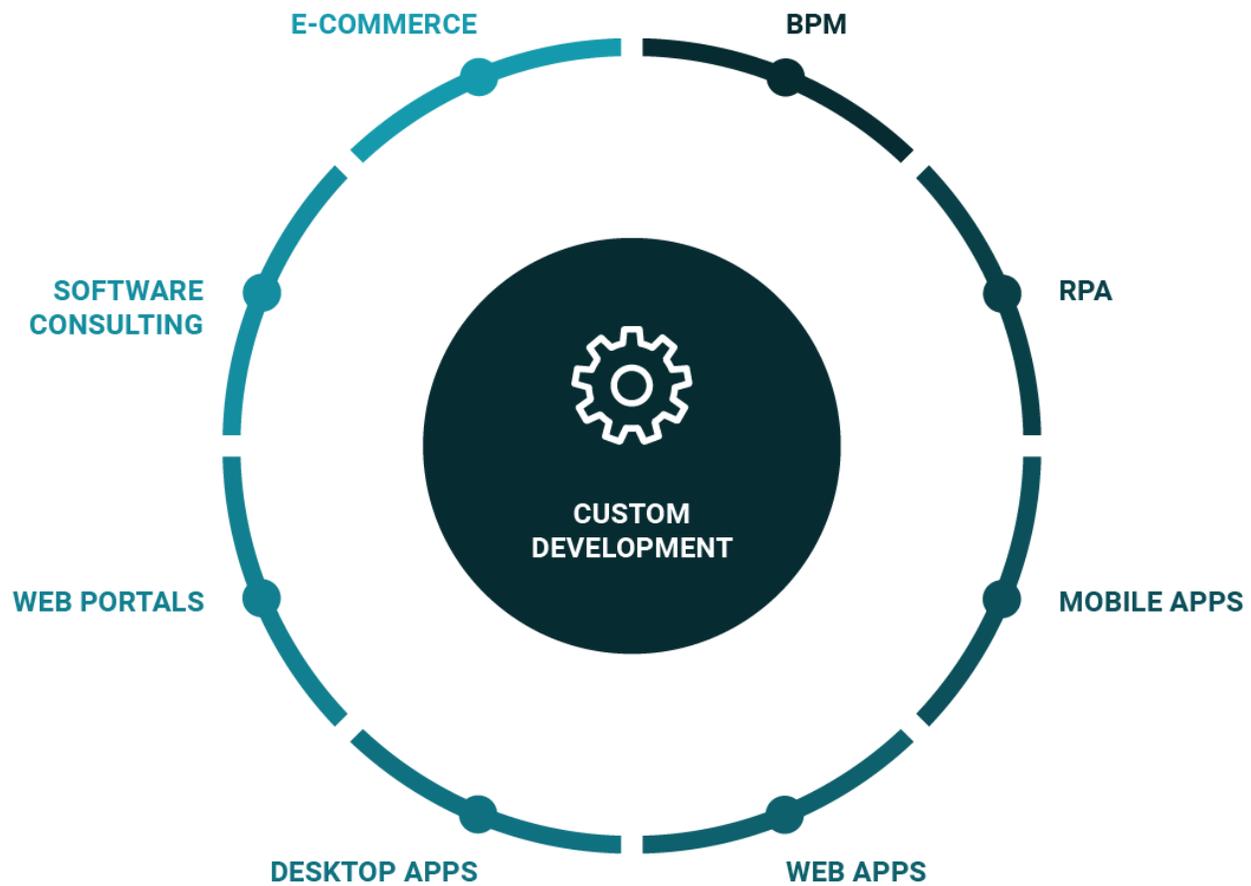

Data Governance. By implementing our Data Strategy, Artificial Intelligence, and Data Governance solutions, you'll experience significant improvements in decision-making supported by solid data, increased operational efficiency, process optimization, and ultimately, a boost in innovation capability. Additionally, we ensure robust governance and efficient information management, providing security, quality, and coherence throughout the data lifecycle.

Data Analytics. Transform data into decisions with our analytics solutions: Modern Data Warehouses and Data Lakes for robust storage, ELT/ETL processes for efficient transformation, real-time visualization, analysis, and planning/budgeting to keep you a step ahead.

+ info

Custom Architecture and Development

Adapt the software to your business needs.

We create customized applications tailored to your solutions, leveraging our expert knowledge in developments and proprietary products used daily by thousands. We accompany you from analyzing your challenges to implementing processes that provide you with a significant competitive advantage.

Accompanying. Through our consulting firm Kreitek, we assist our clients in designing their platforms, assessing their architectures, evaluating application performance, and ensuring the quality of software produced by them or by third parties. This sheds light on the current situation and defines the ideal scenario.

Developing. We build applications in various technologies, both web and desktop, to provide the best-fitting solution for our clients' challenges within their ecosystem. We utilize the latest versions of the most commonly used frameworks in the market to ease future maintenance and enhance the security of our applications.

Custom Architecture and Development

Adapt the software to your business needs.

Automate. We design automated processes through RPA to optimize our clients' productivity and overcome technological barriers.

Evolve. We conduct technological upgrades, platform integration, system support, and refactoring of obsolete applications so that our clients can maintain all the functionality they need in the ever-changing software environment.

Websites and Online Stores

Stand out on the web with us.

Your online presence is your business card. We help turn visitors into enthusiastic customers through our services.

Websites. Through custom designs, user experience, and continuous support, we're capable of bringing your business into the online world.

Using the most widely accepted and secure frameworks in the market, we develop portals swiftly and guarantee our clients' satisfaction.

Online Stores. We provide proven-performance platforms for selling products and services online.

We approach your projects by offering support in marketing, design, usability, drawing from our experience in numerous successful ventures.

Mobile solutions - Mobivery

Guide the user towards your business goals with our company specialized in apps

Discovery. With over 15 years of experience in product definition, in this discovery phase, in addition to consulting, we cover functional definition, code or product audits, and proof of concept testing to confirm the technical feasibility of the product. All of this with the aim of creating an app that meets the needs of the business and satisfies the expectations of the end user.

Design. Design for apps has always been fundamental for us to achieve an attractive and functional application. We cover user experience, visual identity, interactive prototypes, content design, and accessibility; all with the aim of creating an app with a polished aesthetics and intuitive navigation. Trust the first company authorized by Apple to publish apps in Spain.

Mobile solutions - Mobivery

Guide the user towards your business goals with our company specialized in apps

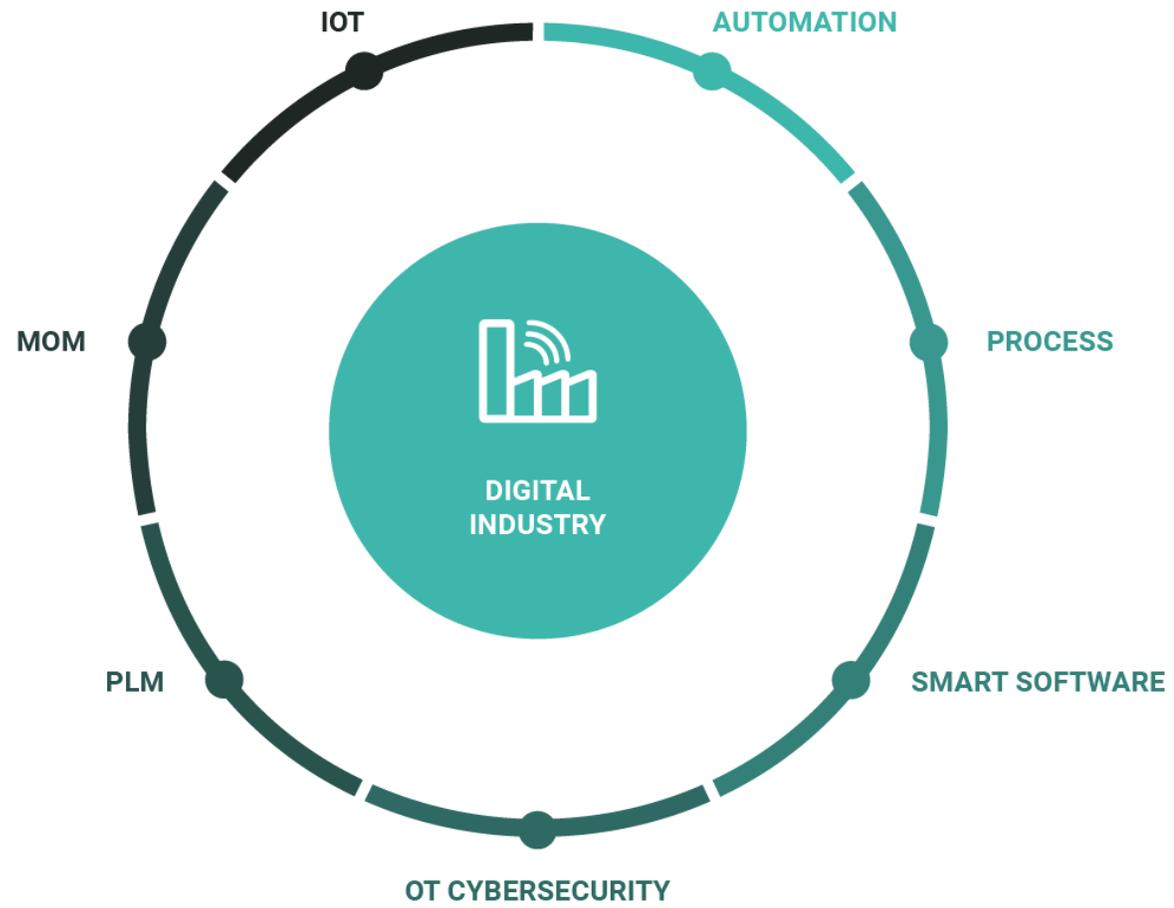

Build. We deal with native developments for iOS and Android using the programming languages recommended by Apple and Google, and cross-platform development with Flutter. We continue with project maintenance once it's finished. All of this with a senior team, many of whom have over 10 years of exclusive experience in app development. Additionally, we can pick up ongoing projects when necessary.

Growth. We cover the launch on the app stores and ASO (App Store Optimization), as well as the app's growth (mobile marketing), which includes creating and improving the user journey, optimizing acquisition channels, analytics and event definition, A/B testing, and continuous improvement. All with the purpose of achieving an app with greater visibility, user retention, and higher conversion rates.

+ info

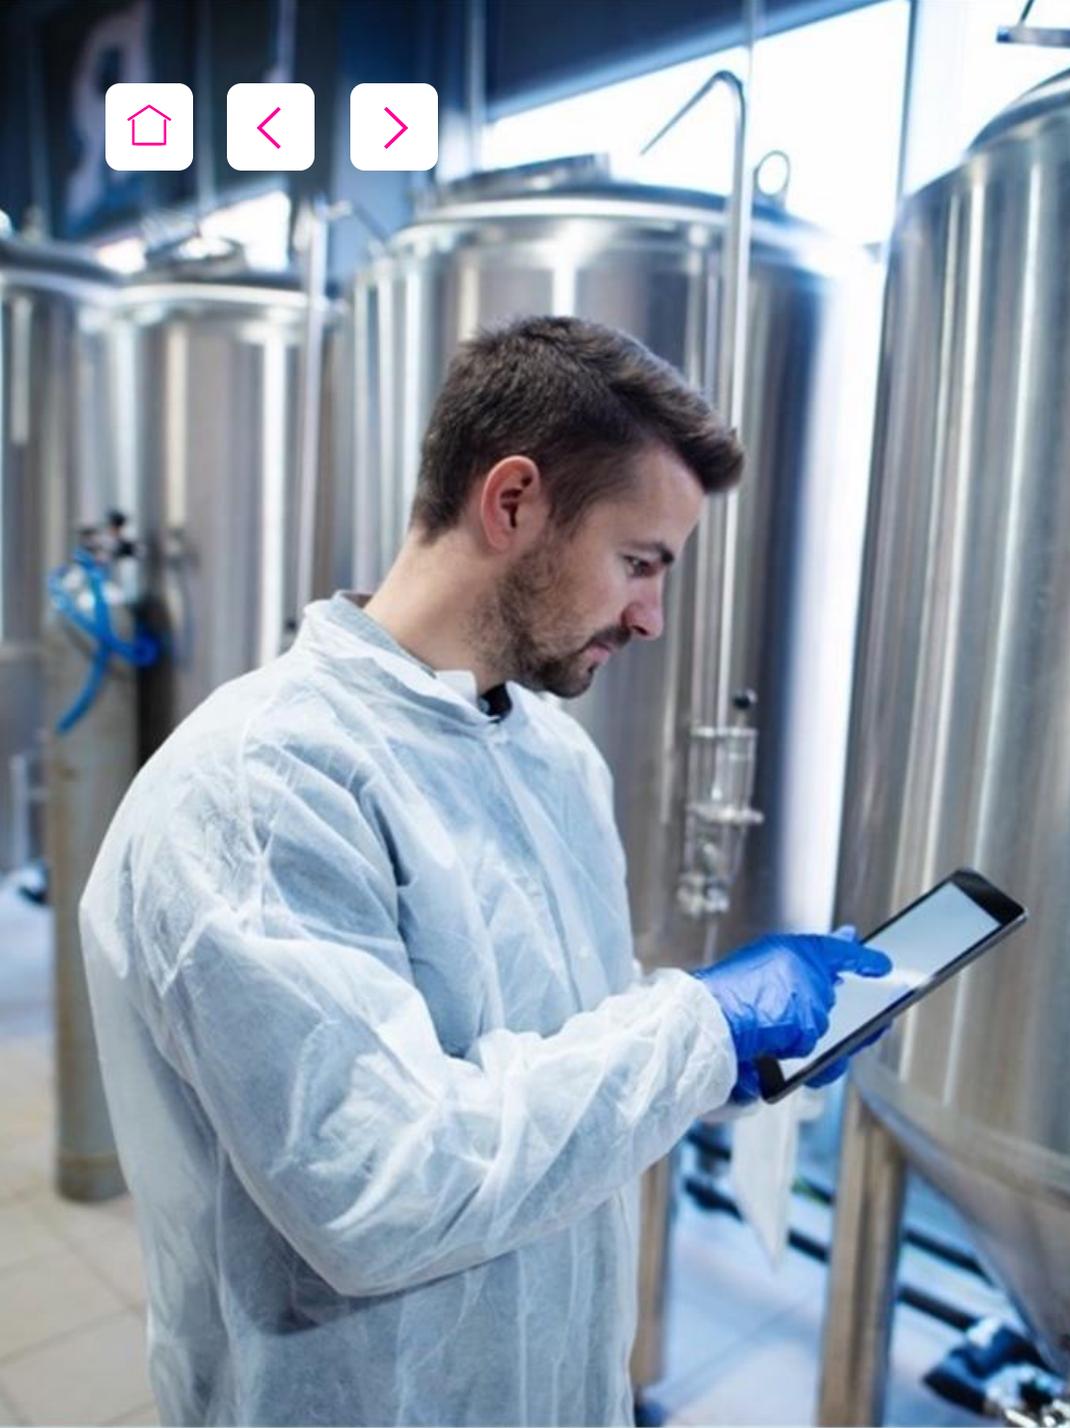

Digital Industry

We cover the digital transformation needs of any industrial company

As specialists in Consulting and Engineering projects for the DIGITAL TRANSFORMATION of the entire supply chain in industrial environments, we are a trusted partner at a national and international level for the implementation of Automation systems, IoT, MES/MOM, and PLM/Digital Twin. These tools are key to ensuring the competitiveness of the industry. Our teams include:

Factory Automation. With industrial plant automation, we achieve total control and a solid foundation for effective and real transformation, taking the first step towards a Digital Enterprise. This increases productivity, flexibility, and efficiency in both discrete and process industries.

Industrial IOT. We specialize in sensor-based data collection for real-time monitoring and analysis of the production plant. We design On-Premises and Cloud solutions that help industries capture and interpret plant data, transforming it into valuable information for decision-making. This information is based on real-time and updated data.

Digital Industry

We cover the digital transformation needs of any industrial company

Process. We specialize in the design, development, and management of processes that optimize the transformation of raw materials for the manufacturing of new products. We provide turnkey projects for the storage, agitation, processing, dosing, and transportation of solid and liquid products for the Process industry.

Smart Software. After automating production plants, we complement the control layers with higher layers of intelligence that provide functionalities focused on data processing to transform it into useful and necessary information for decision-making.

By applying disruptive technologies such as Low/No Code, AI, Blockchain, Edge Computing, Cloud, OT Cybersecurity, among others, we effectively meet the digitalization needs of companies in an agile and efficient manner.

Digital Industry

We cover the digital transformation needs of any industrial company

MOM (Manufacturing Operations Management) By implementing MOM systems, we provide industrial companies with complete visibility into manufacturing processes, enabling continuous improvement of production operations performance. We are leaders in implementing the set of solutions that make up a MOM platform, including MES systems for production execution control, APS solutions for planning and sequencing, as well as systems for quality management and R&D.

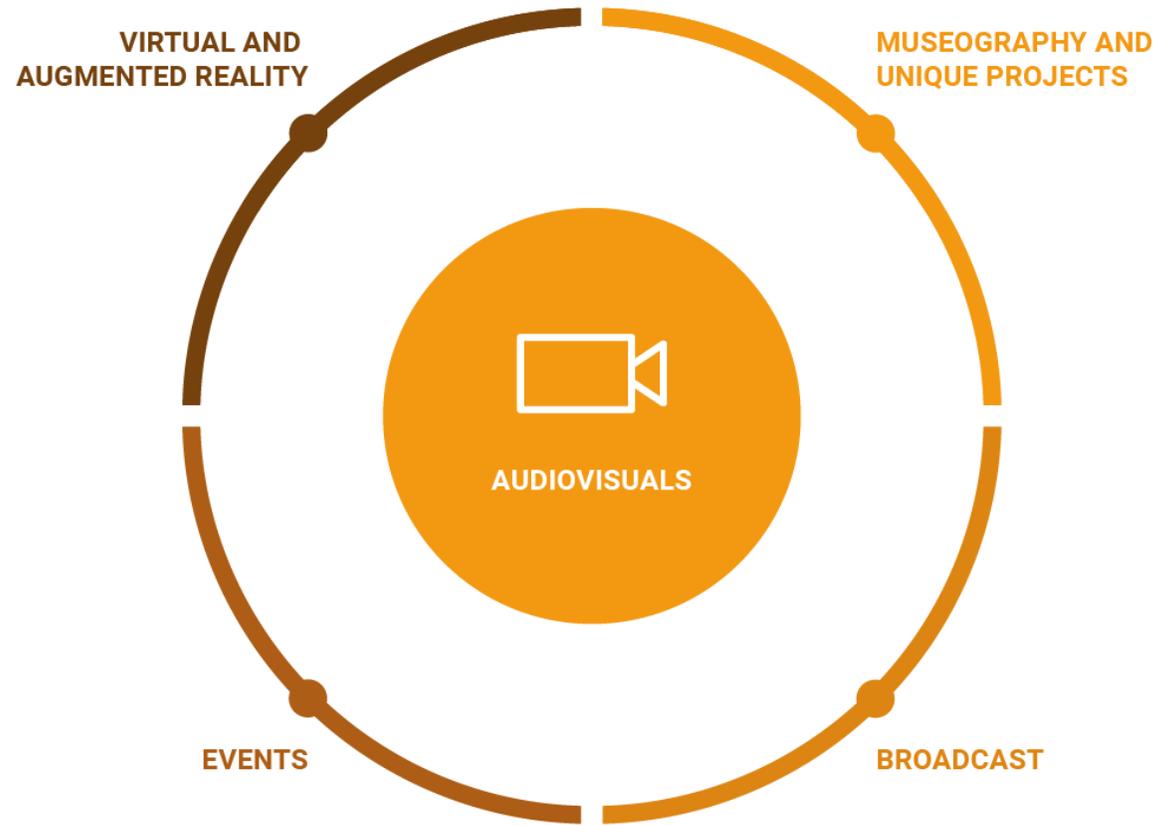

PLM (Product Lifecycle Management) Through digital twins, collaborative tools, and virtual commissioning, we effectively reduce costs associated with deviations, validate new investments, and optimize production processes before actual implementation.

We construct a digital twin by modeling and simulating manufacturing processes comprehensively. Thanks to digitalization and the digital twin, we provide customized solutions to improve **cost reduction and time-to-market**.

+ info

Audiovisual Media

We provide exceptional audiovisual experiences that captivate attendees from the beginning to the end

We design and execute projects for sound, lighting, and image and video playback in all types of indoor and outdoor spaces. We offer complete audiovisual integration solutions and technical support, taking care of all the elements involved.

Museography. From the conceptual and technical design of projects to their comprehensive development and production, including exhibition furniture, content production, and, of course, all the necessary audiovisual equipment. We have vast experience in projects conducted in museums, cultural projects, leisure, sports, and entertainment.

Broadcast. We have extensive experience in cable and internet broadcasting projects, including television installations, mobile units, and studios.

Audiovisual Media

We provide exceptional audiovisual experiences that captivate attendees from beginning to end

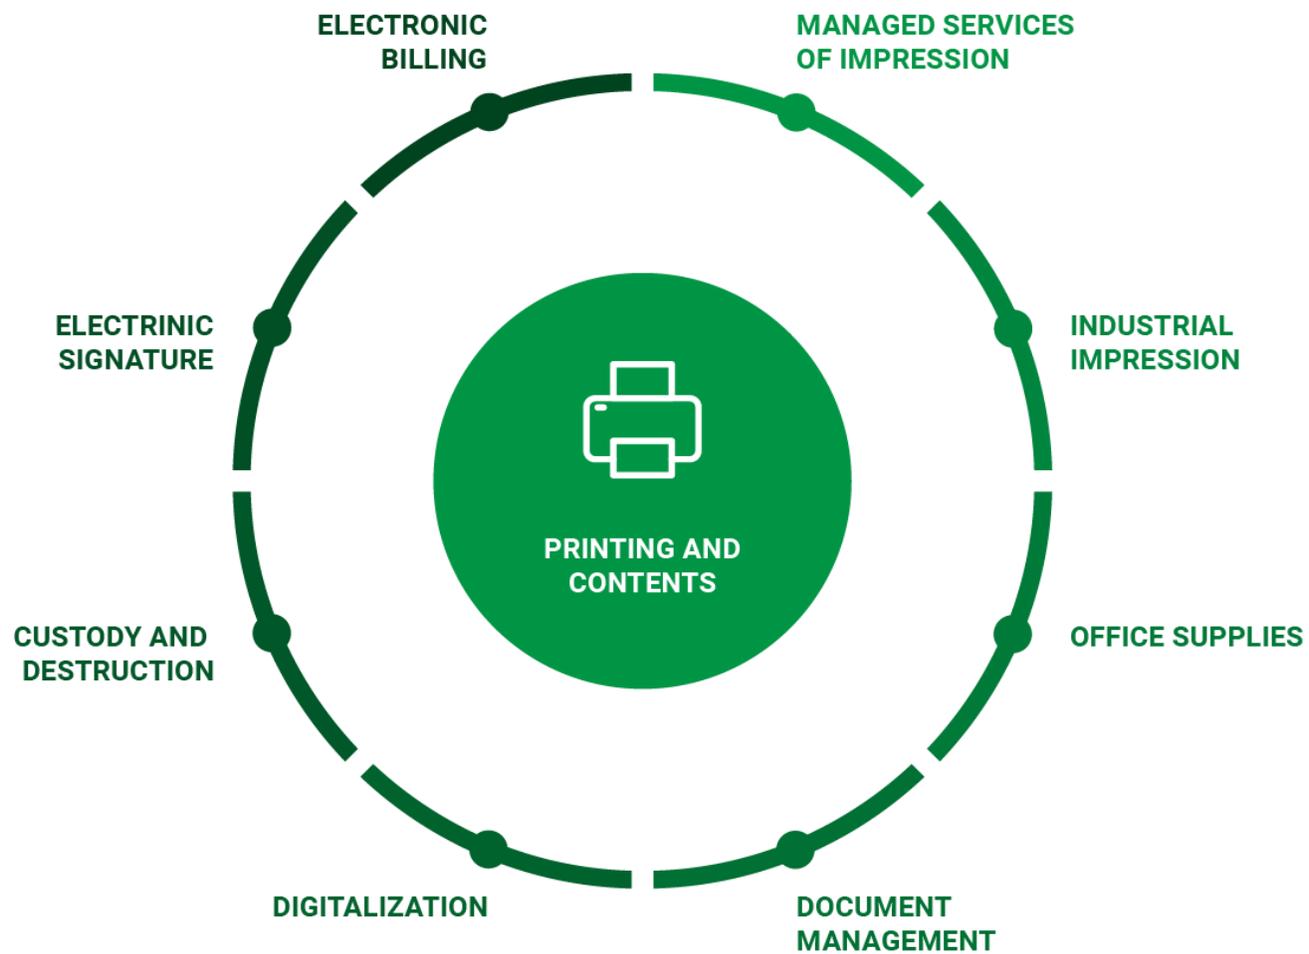

Events. Rental of audiovisual equipment and specialized technical support for small or large events.

Virtual and Augmented Reality. We offer custom-made projects, consulting, and hardware sales. We create personalized experiences in VR, provide guidance for the implementation of VR technology, and offer a wide range of equipment such as VR/AR headsets, haptic suits, and omnidirectional treadmills.

+ info

Printing and Content

Complete solution to the documentary cycle

We provide solutions for the complete document cycle. From print management to the destruction of documents in a secure and certified manner, through complete document solutions (ECM, BMP, etc.) and related services, such as digitization, custody or electronic signature.

Printing. We evaluate the direct and indirect costs associated with printing. We position the right equipment in the right place. We achieve savings for our clients, provided from the devices to the associated services in Pay-Per-Use contracts. From the smallest printers to large production, reprography or marketing department-focused equipment.

Industrial printing. We offer the largest catalog of label and receipt printing equipment and related technical services. Also, portable label makers or printers.

Office supplies. We complement the physical part of the document with stationery products, office supplies, labels and all types of printing support.

Printing and Content

From physical to digital processes and from manual to automatic

Document Management. We offer consulting for the Digital Transformation of documentary processes. We provide ECM, BPM, and process automation solutions in general. We improve the document flows of organizations.

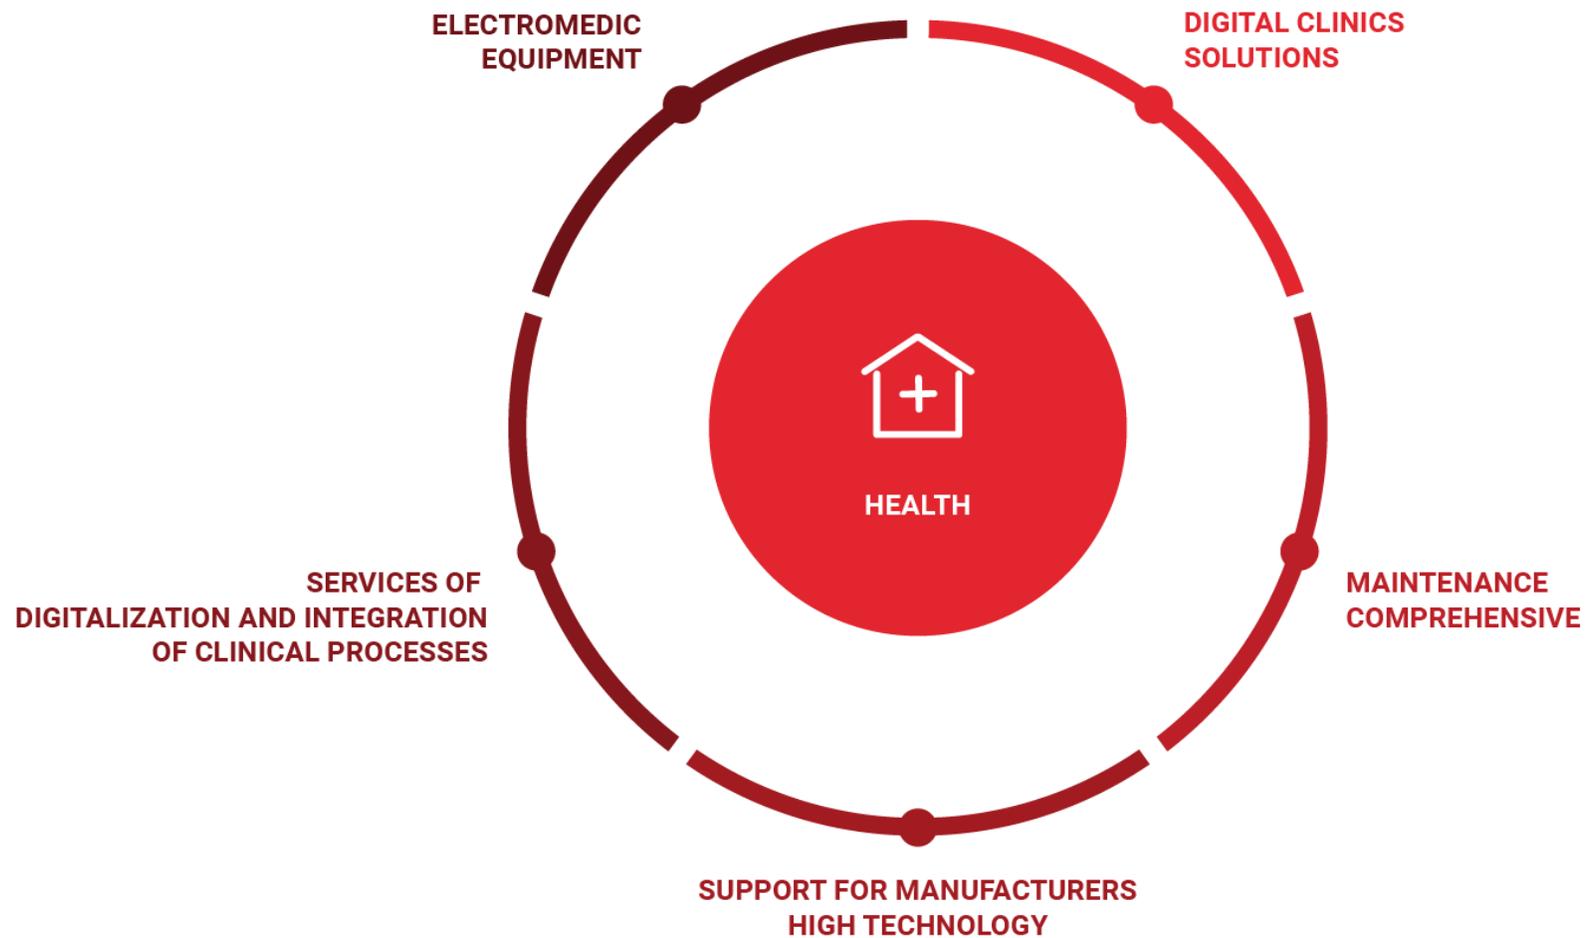

Digital Identity. Global solutions for electronic signature, biometric signature and digital certificate management.

Digitization, Custody and Destruction. We offer efficient solutions for the management of physical documents. We have a wide range of services, from the custody and archiving of documents, to their destruction, whether on a specific or periodic basis. We also offer the document digitization service and the massive loading of documents into document management systems for the digital transformation of documentation.

+ info

Health

Technology applied in the value chain of the healthcare process

Public health. We help empower the patient by facilitating management and accessibility. We offer identity and digital signature services, digitization of the messaging channel for population screening and awareness campaigns.

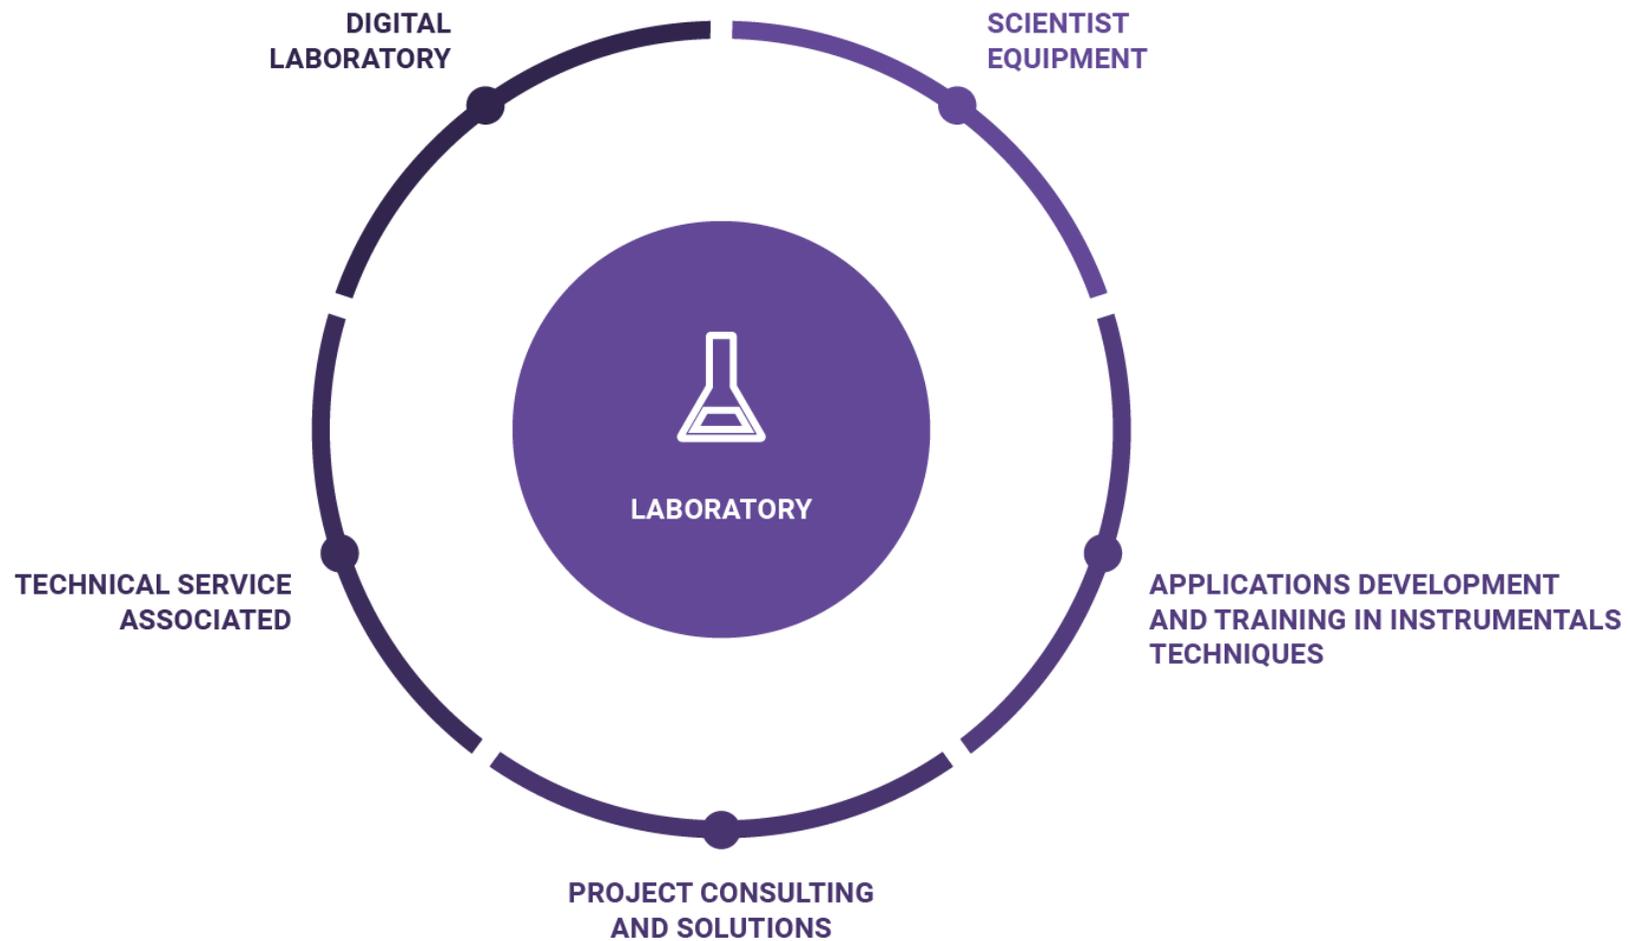

Health Services. We improve healthcare quality by creating collaborative environments and processes. Among the services we offer are patient flow management in consultations, cardiology, telemedicine, Asthma diagnosis, Business Process Management (iBMPs), Robotic Process Automation (RPA), appointment optimizations, appointment reminders (SMS, WhatsApp, voicemail, etc.) and CADIA (we apply AI to support diagnosis).

Hospital. We easily manage information and processes in healthcare organizations. We offer monitoring services in ICUs, REA, Cardiology and Nephrology. We develop and integrate healthcare software applications. We provide Electromedical maintenance services, digitization and custody of medical records, digitization of surgical processes. We provide consulting in: cybersecurity, ENS, intelligent energy management. We execute turnkey projects for Electromedical equipment (market study, purchase, commissioning and after-sales service), indoor localization (RTLS), user access management and integration of INTRASURGICAL and EXTERNAL signals to the operating room.

Laboratories

The solution you need: Advanced technology and professional services

Scientific equipment. Exclusive distributors of reference brands and associated consumables.

Instrumentation for analysis in the environment, pharmaceutical, chemical and petrochemical industries, food, Life Science, etc.

Associated Technical Service.

- **Official Service** with a highly qualified human team. We have plans tailored to you: warranty, preventive and corrective maintenance, all risk.
- **Global Services:** Global maintenance, regulatory compliance
- **Technical Assistance:** People, the main value of the service.

Laboratories

The solution you need: Advanced technology and professional services

Development of Analytical Applications and Training in Instrumental Techniques. We help you launch customized applications based on the specific needs of each laboratory.

Digital Laboratory

- LIMS (Laboratory Management). Laboratory information management system. We transform manual operations into more efficient workflows.
- Data Integrity
- Document Managers

Consulting projects and solutions. We help you, from start to finish, to design your laboratory, start it up, consolidate, manage and maintain it in a comprehensive manner.

Other Solutions

ERP's | Digital Transformation | Public
Administration Training | Own Products

ERP's

**One step forward towards business excellence:
discover the power of our ERP solutions**

SAGE. Conquer any business challenge with the intercompany solution of SAGE X3, designed to meet the unique demands of any industry. From supply chain to costs and finance, it enables inventory management and resource planning. Gain a competitive advantage by having a tool that allows you to manage multiple legislations and is highly customizable.

ODOO. Discover the future of management with ODOO ERP, developed in modern languages and cutting-edge technologies. Its flexible and modular architecture ensures quick and personalized implementation. It is a 100% web-based multi-platform solution, and with no usage licenses, it offers powerful operational and service management capabilities to public administrations and other sectors.

ERP's

**One step forward towards business excellence:
discover the power of our ERP solutions**

TecERP. Experience a rapid and hassle-free implementation with TecERP, a proprietary product of Nunsys. Our agile and customer-oriented approach allows us to deploy the solution in record time, seamlessly integrating with Microsoft tools. TecERP adapts to your specific needs, offering comprehensive and efficient management that drives productivity and maximizes results.

Kinetic. Grow, prosper and compete in a global market with Kinetic ERP. An ecosystem of solutions designed for and with manufacturers, helping them maximize profitability with real-time information, business intelligence and integrated collaboration tools.

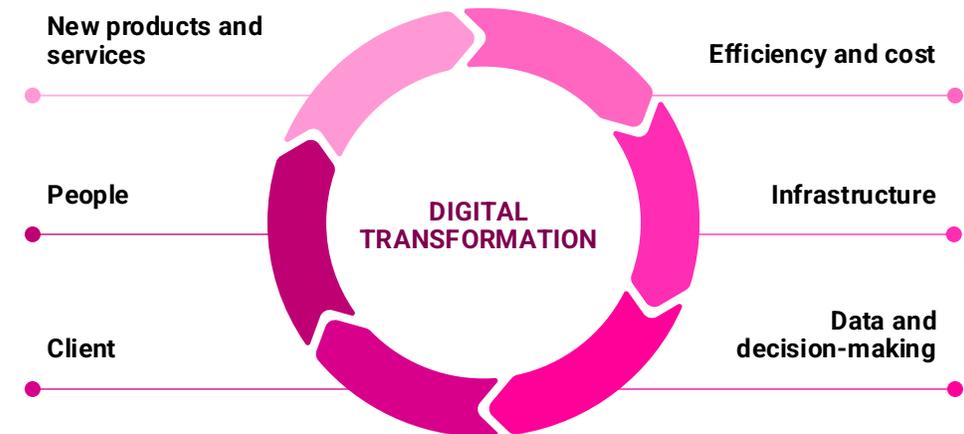

Digital Transformation

We provide a strategic vision of technology to the company:

Digital Transformation Master Plan. Drawing from our extensive knowledge and experience in the world of technology, we assist companies in charting a roadmap of technology projects that need to be undertaken to fulfill the organization's strategic objectives.

We approach the process of Digital Transformation by combining:

Business + Technology + People

ICT Training

We provide training and knowledge updates to optimize the use of available ICT technologies

It is essential to **maximize the potential of technology investments** at all levels of the company in order to achieve the highest return on investment.

We offer training solutions, aimed at CIOs, specialized technicians, and end users.

As an **official training center** for Microsoft and other manufacturers, we have certified instructors who bring a dual perspective, combining teaching with participation in technical projects.

We manage FUNDAE bonuses to **minimize costs for our clients** while providing training delivered by our top specialists.

We develop customized training projects for our clients, with the support of independent specialists and our partner manufacturers.

Public Administration

We collaborate in the digital transformation of the Public Administration

Helping to create a more efficient and secure government through our extensive experience in services and solutions tailored to its needs:

- Cybersecurity, governance, and regulatory compliance.
- Modernization of applications, systems, and connectivity.
- Audiovisual solutions, digitization, and printing.
