03

Prescribe & configure

Programmable protocols;
active/sham stimulation for
controlled tDCS/tACS.

Deliver in clinic or at home

Clinician-managed protocols;
guided home sessions with
the patient app.

Monitor treatment and symptom change

Dose and adherence tracking;
PHQ-9, GAD-7 & WHODAS
captured through the connected
system.

Routes to collaboration

Clinical partnerships first. Potential contribution to a research consortium in following areas

CALL / TOPIC FOCUS

POTENTIAL SOOMA ROLE AND FIT

MED-TECH	HORIZON-HLTH-2027-01-STAYHLTH-01 Disability, independent living and inclusion	Clinician-supervised home care
MED-TECH	HORIZON-HLTH-2027-02-DISEASE-01-two-stage Innovative interventions for non-communicable diseases	Depression / pain related to e.g., diabetes or cancer
MED-TECH	HORIZON-HLTH-2027-01-DISEASE-10 Children and young people (GACD)	Adolescent mental-health crisis, ADHD
DIGITAL MEDICINE	HORIZON-HLTH-2027-02-TOOL-01-two-stage AI biomarkers of progression and treatment response	Intervention and response data, alongside specialist biomarker partners.

Your clinical question. Our platform.

Open to new hospital-led research projects and existing consortia.

Your hospital or clinic

- Clinical leadership and a defined need
- Patient population and care pathway
- Study delivery and clinical follow-up

Sooma

- Treatment and research platform
- Device configuration and study-app setup
- Protocol implementation and data capture

Get in touch with a clinical need or a research project.
