

# Pieksäwood

## Genuine wood is a timeless and responsible choice

Pieksäwood is a Finnish family-run business at the heart of Savonia, at Pieksämäki. The production of wooden products was started more than 70 years ago.

Pieksäwood produces high quality panels and bench boards for saunas, homes and interior design.

# Pieksäwood

We use responsibly produced aspen and alder as raw material, with or without heat-treatment. You can also get pine and radiata pine from us.

Thanks to the heat-treatment, the wood becomes even more durable, and it does not swell or warp over time, but keeps its dimensions.

## Black Alder

The black alder is branchless and resin-free. The beautiful reddish hue creates warmth and a cozy atmosphere around it, also in other parts of the interior.

The heat-treatment gives the wood darker and deeper shade.

## Aspen

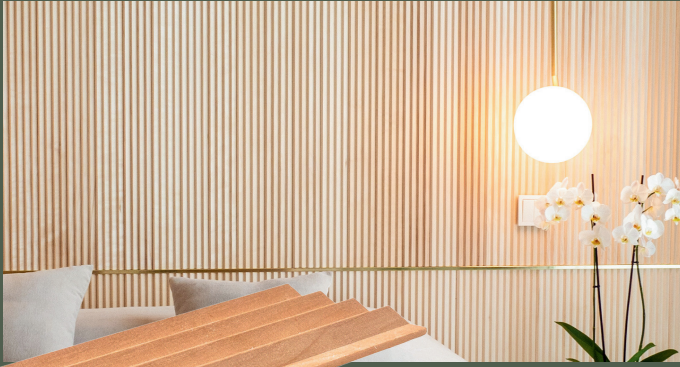

Aspen's light color, knotless and resin-free gives a sense of space, it's very common to the Scandinavian interior decoration. The luxurious aspen is perfect for a sauna.

The heat-treatment gives the aspen beautiful brown shade - making atmosphere warmer and comfy.

## Design panels

### TUNTURI

TUNTURI 15 x 90 mm is a harmonious design panel which plays with light and shadow - creates posture and elegance in the sauna, bathroom and other home interior.

TUNTURI- name comes from the beautiful fells of Lapland.

### SOLA

SOLA 26 x 110 mm is trendy and modern slat panel.

This panel makes it easy to create trendy walls, ceilings or any interior design solutions in wet and dry spaces.

### Groove panel

A popular and timeless panel with groove in rounded or flat profiles.

The heat-treatment deepens the look and plays with shadow.

### Finger panel

The finger panel - like a breath of old times with modern twist.

The finger panel goes and comes, it never disappoints.

---

Please note that we also manufacture heat-treated Finnish pine in several different dimensions and lengths. The natural resin of pine is lost during heat-treatment, which makes pine an excellent choice.

The best features of the wonderful radia pine include its striking appearance, beautiful color and vivid surface, easy workability and durability.

# Pieksäwood

We are proud that we are able to produce our products in an ecological and poison-free manner using genuine wood, and that the operators are genuine people.

We also produce panels in special dimensions according to the customer's needs.

**Be inspired!**
