

# nfk® Gutter Brackets

Designed for maximum safety and uncompromised versatility, LEMP nfk® gutter brackets combine an enlarged, hole-free area with an innovative hole pattern while maintaining full compliance with current trade standards. Their smart hole arrangement allows for effortless, professional fastening in challenging installation environments, while the included ZVDH (German Roofing Trade) material guarantee offers ultimate peace of mind.

Available in all common materials, shapes, and sizes—including copper-jacketed steel options—they provide a complete, dependable solution for any project.

Innovative hole pattern for fastening that is compliant with technical regulations

High-quality corrosion protection

Continuously galvanized and angled front spring

Professional fastening using countersunk fixing holes

Enlarged hole-free area

DIN EN 1462 quality standard

Beyond our standard nfk® range, we deliver a comprehensive line of specialized bracket solutions engineered for every structural challenge. Our lineup features fascia board, on-roof, and bead brackets, alongside custom options designed specifically for trapezoidal and corrugated sheet metal. For complex mounting needs, we also offer brackets with extended fastening legs as well as twisted models designed for seamless lateral rafter attachment, providing absolute flexibility for any installation.

## nfk® Pipe Clamps

Built for certified performance and effortless compatibility, our nfk® pipe clamps strictly adhere to both ZVDH (German Roofing Trade) and ZVSHK (German Plumbing Trade) regulations. Available in both round and box-shaped designs across all standard sizes and materials, they offer total flexibility for any system setup.

To complete your installation, we offer a full range of high-grade accessories—including fixing brackets, facade adapters, hanger bolts, threaded rods, and thermal anchors—ensuring a secure, professional finish every time.

High-quality corrosion protection and circumferential galvanizing with rounded edges

Hinge pin closed on both sides made of aluminum alloy

5-fold guided hinge pin for additional stabilization

Stainless steel eyebolt

M6 threaded nut with at least 4 load-bearing threads

Custom fit shape

M10 threaded nut

## nfk® – Our Quality Seal

True quality is not always obvious on the surface, yet cutting corners with sub-par materials introduces unnecessary risk. For installers and contractors, identifying products that guarantee top-tier performance and safety at a glance is essential for delivering flawless results.

That's precisely why we created the nfk® seal of quality. This clear mark confirms full compliance with all strict regulations of both the German Roofing Trade (ZVDH) and the German Plumbing Trade (ZVSHK). By providing instant visual proof of professional-grade standards, the nfk® seal ensures your workmanship is always fully compliant, reliable, and completely risk-free.
