To Whom It May Concern,

I am pleased to write this letter of recommendation in support of Mr. Hesborn Apwoyo, Founder of Green Community Guardians, as he applies for funding through

Green Community Guardians is a youth-led initiative based in Busia County, Kenya, committed to advancing afforestation, reforestation, and climate resilience through grassroots engagement. At this early stage, their priority is to complete the formal registration process as a CommunityBased Organization (CBO), a critical step toward unlocking future funding opportunities, building credibility with partners, and expanding their environmental impact.

The financial support would enable Mr. Apwoyo and his team to cover the required registration fees and associated costs, removing a significant barrier to the organization's operational launch. With registration completed, Green Community Guardians will be positioned to fully engage stakeholders, mobilize local youth, and implement their environmental initiatives with transparency and accountability.

As Founder & CEO of Green Horizon Alliance, I have been advising Mr. Apwoyo on project development, funding strategies, and partnership building. His dedication, vision, and leadership give me confidence that this investment will yield meaningful returns for both the local community and the broader environmental movement in Kenya.

I strongly endorse Mr. Apwoyo's application and encourage you to consider this request favorably. The completion of this registration will set the stage for Green Community Guardians to grow into a well-structured, impactful organization.

Should you require further information, please do not hesitate to contact me directly at antoniawhite@greenhorizonall.org or +1 901-379-4229.

Sincerely,

Antonia White
