# Turning Complexity into Sustainable Value

CET Partnership | Solutions for Energy,  
Engineering, and Sustainability

---

**CET PARTNERSHIP**

2026

# Who we are

## How much energy waste are you underestimating today?

We are an engineering and consulting partner dedicated to addressing inefficiencies in industrial and service companies.

ENERGY EFFICIENCY

STRATEGIC  
SUSTAINABILITY

SYSTEMS OPTIMIZATION

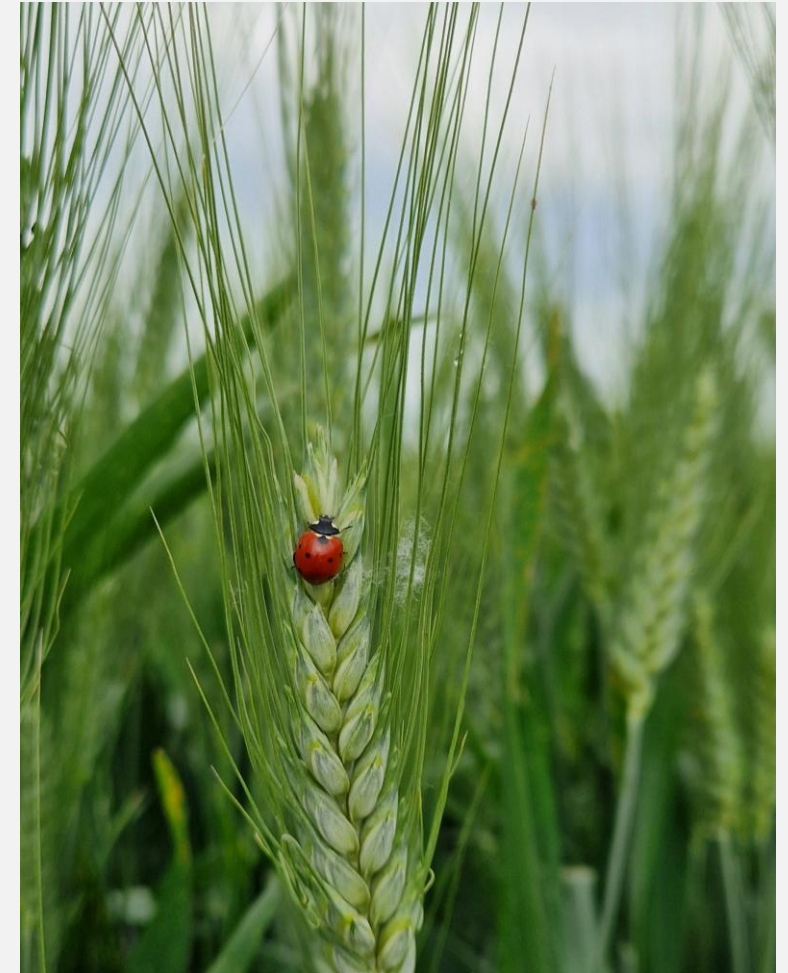

### Flexibility + Reliability

We combine an agile organizational structure with a broad network of experts to ensure fast responses and high-level technical expertise for every challenge.

### Cross sector experience

spanning industrial and service environments, including logistics, manufacturing, oil & gas, banking, insurance, retail and office buildings.

## Our strength

*“We rely on a solid technical foundation”*

**Dedicated team of energy  
engineers**

**Strong background in  
energy and building  
systems engineering**

**Structured problem-solving  
approach for complex  
industrial environments**

**Access to a qualified  
network of technical  
specialists**

# Our approach

*"Is your current engineering partner designing for today, or building for the next decade?"*

## TECHNICAL EXCELLENCE

Deep engineering expertise and specialized knowledge.

## MANAGERIAL VISION

Strategic alignment between technical solutions and corporate business objectives.

## VALUE-DRIVEN EXECUTION

Focus on delivering concrete, measurable and sustainable results.

## Core services

**Energy Audits**

**Energy Management**

**Energy Efficiency Optimization**

**Sustainability Strategies**

**Facility Management**

**MEP Design**

**Life Cycle Assessment (LCA) studies  
(via specialized partners)**

## Tender & Project Capability

We are structured to support technical and tender activities through:

- Fast technical evaluation and feasibility analysis
- High-quality engineering documentation
- Multidisciplinary technical competence
- Flexible scaling through partner network
- Focus on compliance, accuracy and delivery reliability

**We rely on engineering competence, structured methodology and execution capability.**

**Ready to support energy and sustainability projects from day one.**
