Trust HQ

board of cyber

Entering Governance 2.0

Created by CISOs for CISOs, the solution enables the automation of cyber governance operations and assists CISOs in their continuous improvement efforts.

The increasing number of cyberattacks targeting organizational supply chains is leading to a rise in third-party risks. Large corporations often have supply chains involving thousands of suppliers, requiring them to manage an ever-growing volume of data and risks.

TrustHQ is a SaaS platform that assists CISOs in their continuous improvement efforts, both internally and externally, through a unified dashboard and the automation of risk management and cybersecurity governance processes.

This solution enables cybersecurity leaders to support their suppliers in improving their cybersecurity while automating cyber governance operations.

- CISOs oriented
- "File-less" simple and configurable
- SecNumCloud hosting
- A time-saving advantage through simplified governance
- A proactive approach to risk management
- Centralized audits

58% of CISOs consider cybersecurity governance to be one of the top three most important issues for the company.

ABOUT BOARD OF CYBER
Board of Cyber is a French start-up founded in 2022, specialising in cyber risk management. Its fully automated SaaS solutions enable customers to assess, manage and continuously improve the cyber performance of their organisation and ecosystem. With a staff of 40, Board of Cyber supports more than 500 customers. Its mission is to help create an ecosystem of trust around organisations.
