# Our customers

## Our Core Products

**SMART**

# What is SmartTOS?

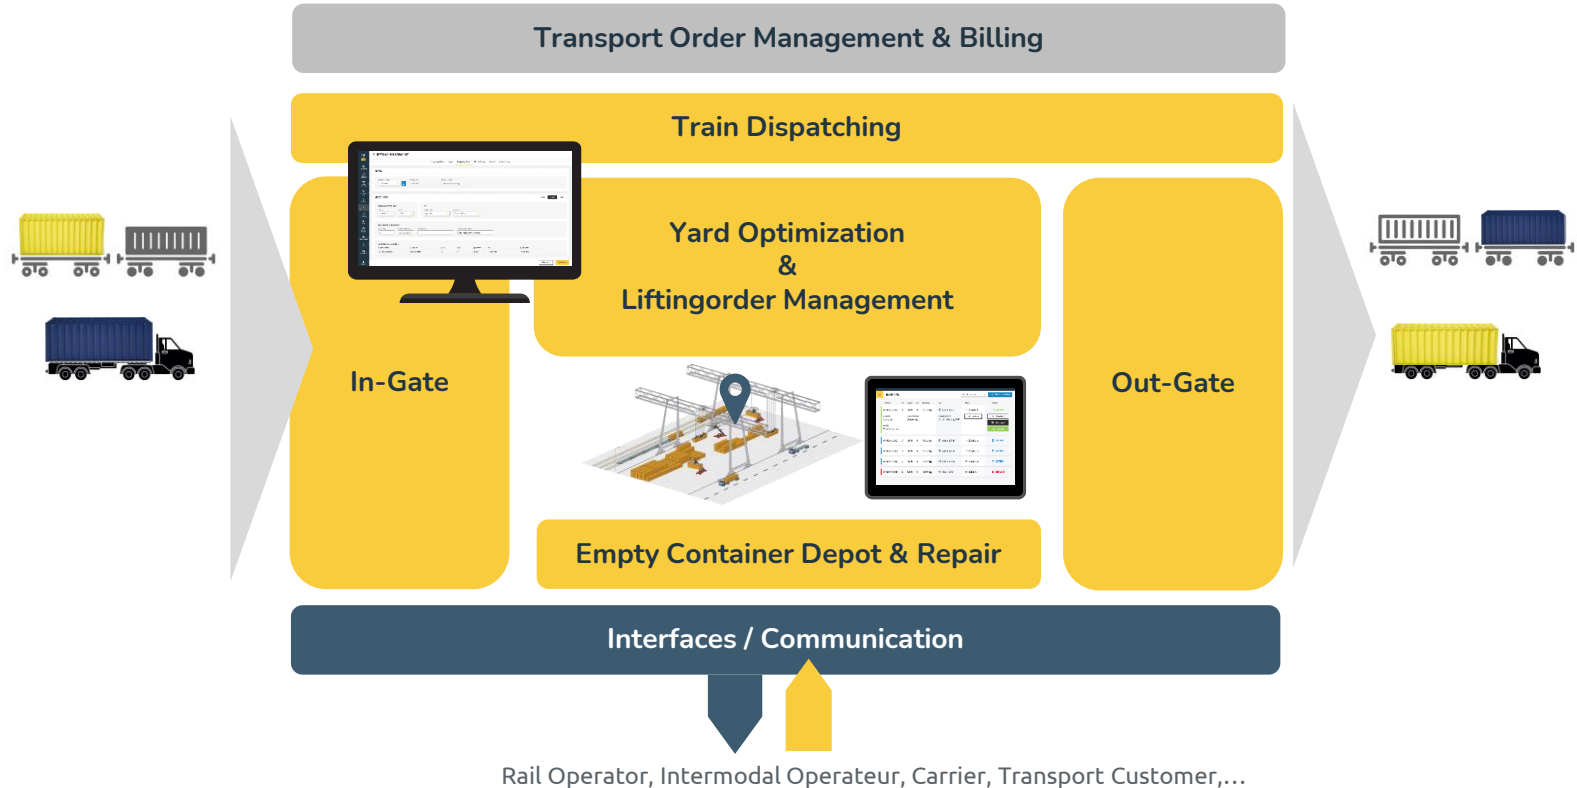

Cloud based solution for intermodal container terminals to digitalize and optimize

Internal processes

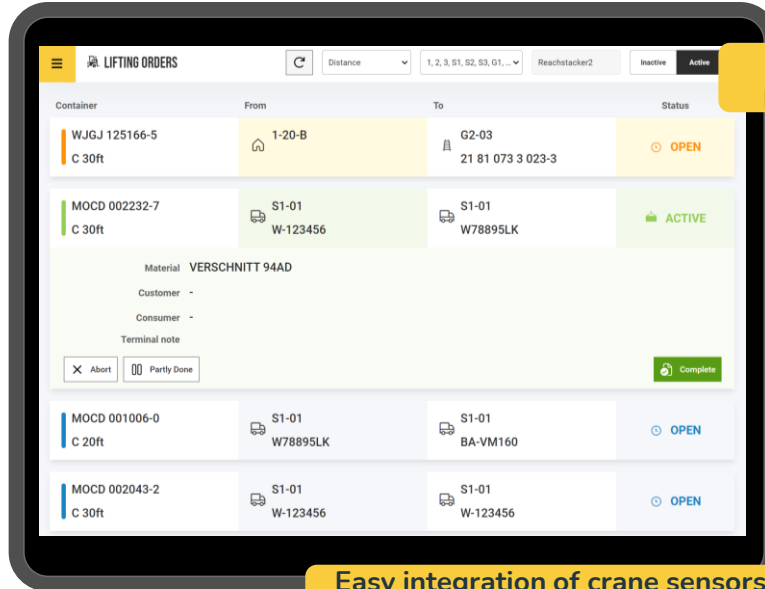

Communication to/from  
partners

# Process focused core modules

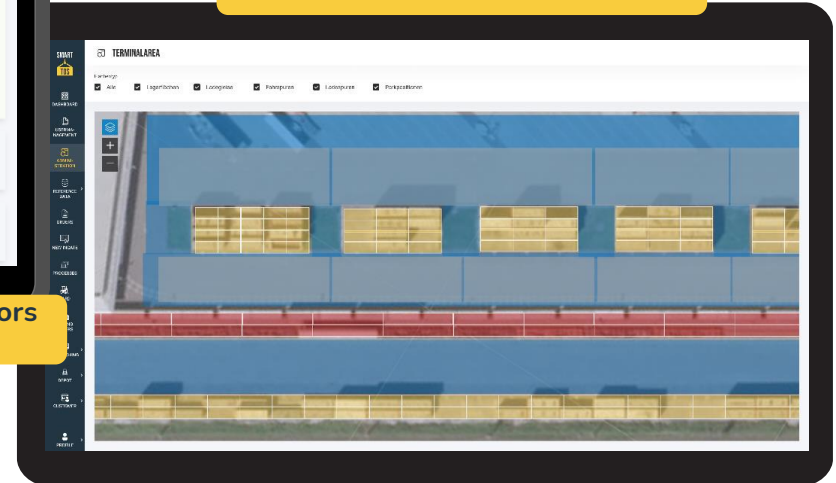

# Geo based lifting management

Optimization based on current position and operational needs

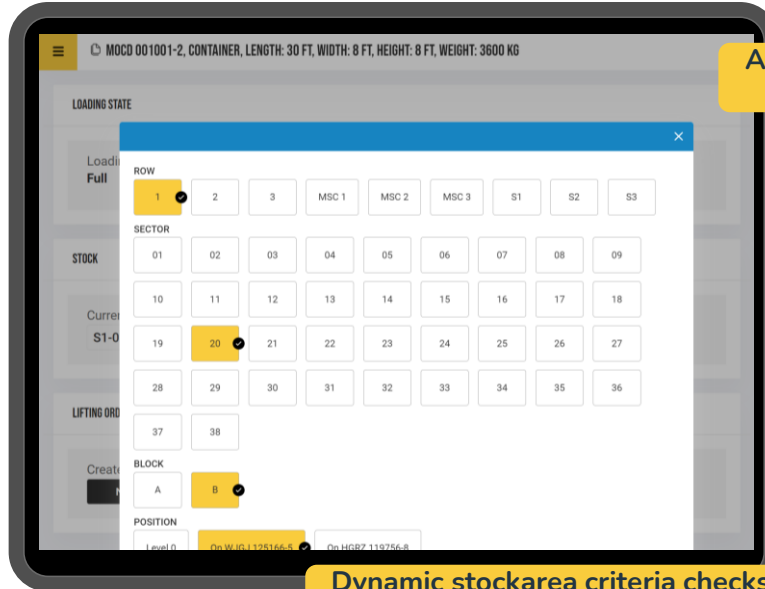

Geographical operation zones

Easy integration of crane sensors (Plug & Play)

# Criteria based yard optimization

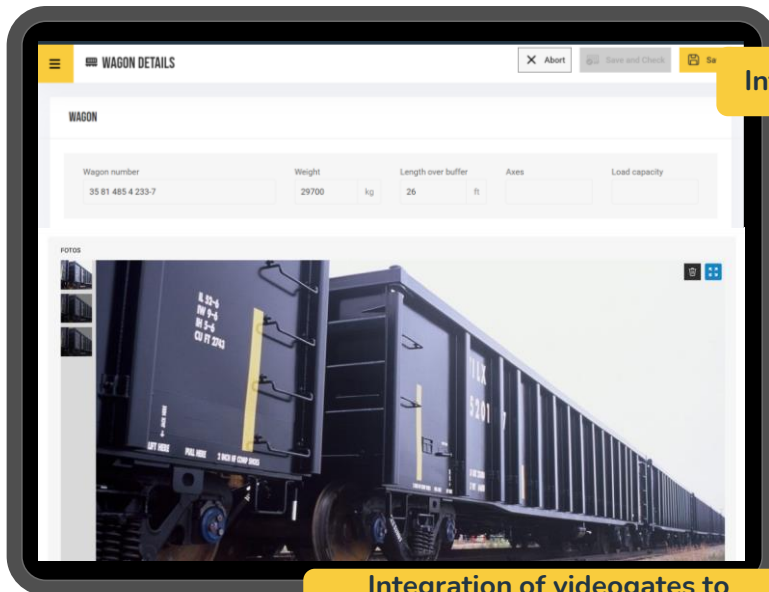

Automated calculation of best stockareas for incoming containers

Dynamic stockarea criteria checks for a structured stock strategy

Flexible stockoverview

Stock	ITU number	Loadingstate	Length (ft)	Material name	Owner	User	Container state	Arrival time
1-01-B	MOCD 001001-4	Full	30				in stock	14.11.2023, 16:05

# Efficient handling of trains

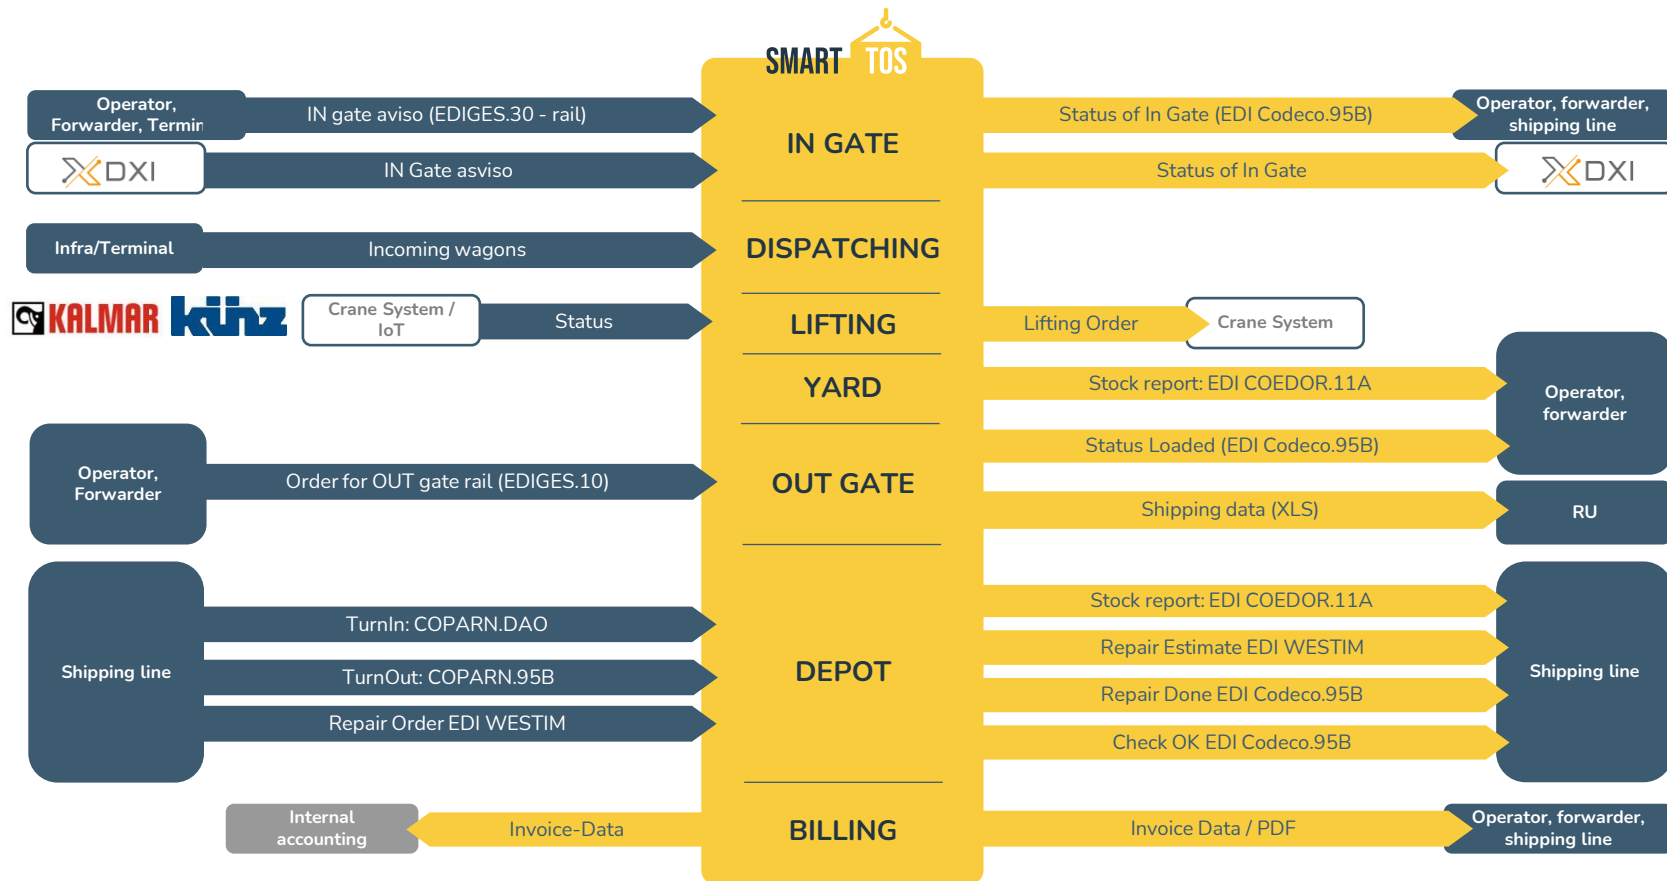

Intuitive mobile documentation of wagon groups

Supported Train Dispatching

Integration of videogates to accelerate the wagon check

# Standardized interfaces

# Advantages with smartTOS

- Agile IT organization with a very experienced team ensures modern implementation processes and technologies
- Modular, cloud based SaaS model for easy setup and reliable operations
- Intuitive application design with low training necessity
- Data analysis and interface management for ongoing operational optimization

*"A terminal with optimized and fully integrated processes in a digital logistics chain is a basic requirement for the market success of all intermodal transport itself."*

# Contact us (at our booth) when you...

... are seeking a partner to implement specialized Mobility and Energy solutions.

...you're ready to take your digital customer experience to the next level.

...you want to modernize and digitize your container logistics.
