Who we are

LATE-AYA brings together clinical centres, researchers, patient organisations, and tech experts across Europe to build a secure, supportive digital ecosystem that empowers young cancer survivors.

What we are working on

We develop an AI platform empowering survivors to monitor their quality of life, providing medical teams with secure insights to personalise care and anticipate late effects.

What's the one thing we need next

We need to execute our multicentric clinical study to validate our AI platform, establish new guidelines, and transition our digital ecosystem into standard European survivorship care.
