

WE GUARANTEE **SUCCESS**

USER PERSPECTIVE

Human-Centered Design (HCD)

ENGINEERING PERSPECTIVE

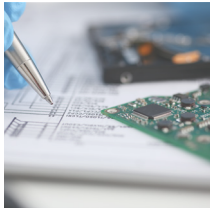

Design to Properties (DtX)

LIFECYCLE PERSPECTIVE

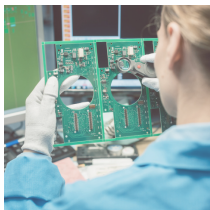

Design for Excellence (DfX)

WE PROMOTE **SUSTAINABILITY**

Ecodesign

We design to last. We have in consideration reparability, recycling, energy efficiency and restriction of dangerous substances.

Friendly Manufacturing

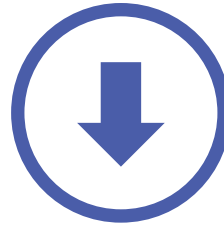

We use components with conflict-free minerals.
We apply ethical manufacturing and supply chain politics with people and the environment.

Responsible Management

We take responsibility for our designs.
We make society aware of its proper use and an adequate end of life.

ABOUT TEKHNĚ

We develop electronic hardware products from its conception to its market launch, or we adapt to meet at the exact point where you need us.

“ **We design for the most demanding environments, we have high experience in railway EN 50155** ”

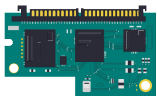

Modular and personalized design of all types of analog, digital and power electronics, with the latest technologies

SBCs

Single Board Computer

SoMs

System-On-Module

Carrier Boards

For SoMs expansion

OUR SERVICES

Ideation

We transform ideas into disruptive products, co-innovating and focusing on the end user

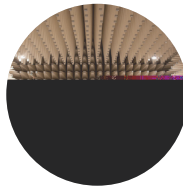

Design

We combine talent with state-of-the-art tools to design the most advanced products

Prototyping

We prototype in an agile way to measure and validate the continuous response of clients and users

Certification

We carry out pre/certification tests to ensure the highest quality and speed up Time-to-Market

Industrialization

We develop processes and means that allow large-scale industrialization while minimizing costs and time

FREE Quotation

Do you want to launch an innovative own product to the market? We are your technology partner

OUR WORK

Industrial tablets

Ticketing systems

Sensor hubs

On-board units
