EN

System Partner

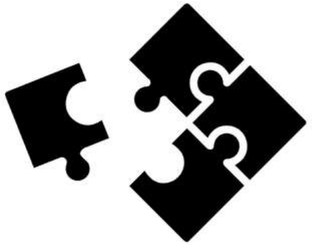

CTCweld. Your partner for industrial implementation.

Challenges

Projects do not fail due to the concept.
They fail due to execution.

- Time pressure from poor planning
- Shortage of skilled workers
- Inadequate quality assurance
- High rework and inefficient processes

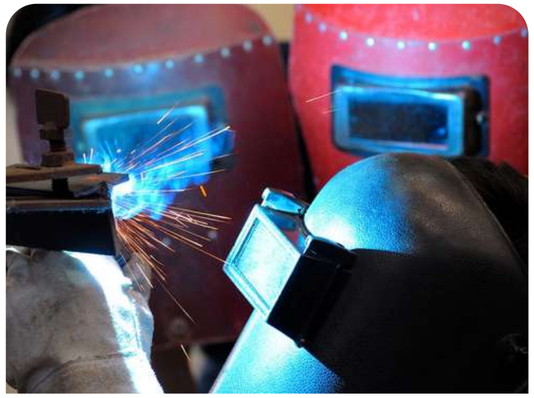

Impact

Problems always have consequences.
They lead to measurable losses.

- Delays in production
- Increasing costs due to rework
- Quality risks and claims
- Loss of trust and reputation

System Partner

CTCweld. An integrated system.

Training

Consulting

Supervision

Recruiting

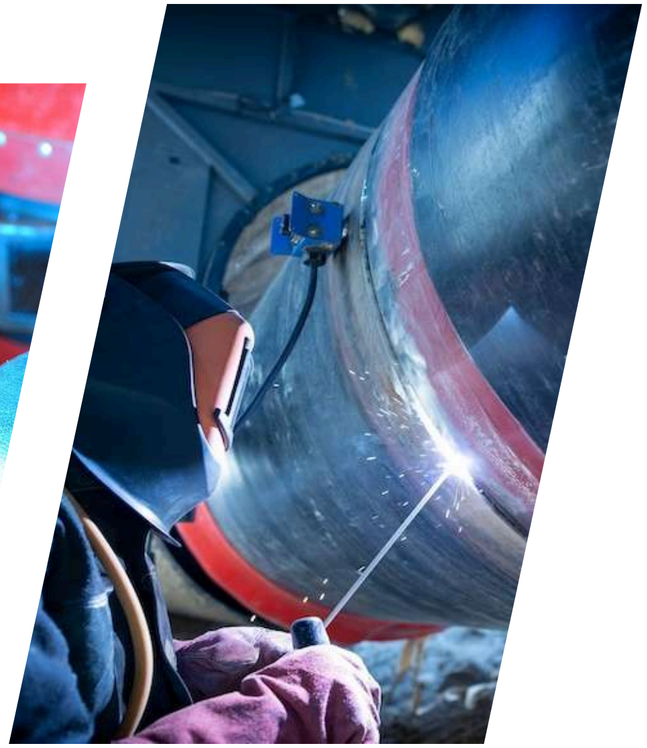

Training

Industrial welding training

- ISO 9606 / ASME IX standards
- In-house or on-site
- Train-the-trainer programs
- Theory & practice

Knowledge is applied.

Consulting

Process analysis

- Technical audits
- Process optimization
- Efficiency improvement
- Cost reduction

Knowledge is implemented.

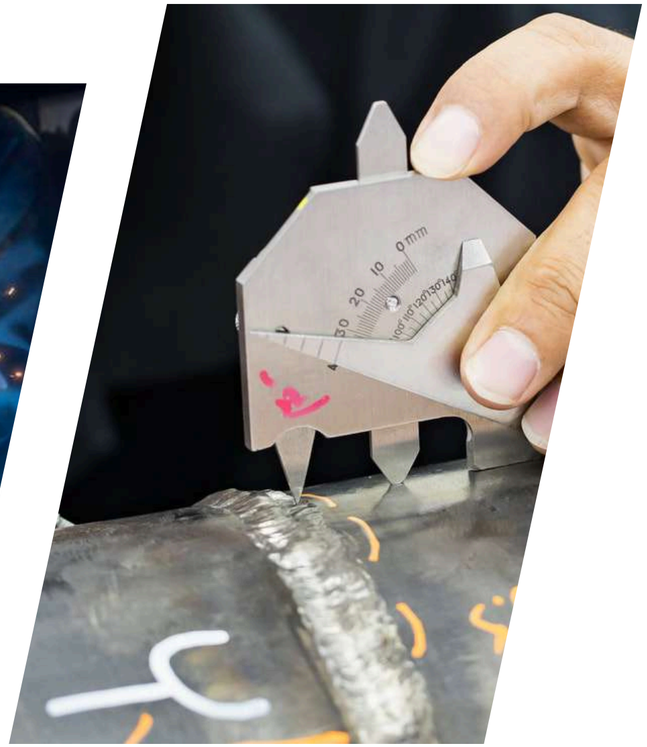

Supervision

Manufacturing supervision

- At the supplier or on-site
- Quality management
- Reporting
- Production through to FAT

Knowledge is ensured.

Recruitment

Job-specific preparation

- **Apprentices and skilled workers**
- **Theory & practice**
- **Language training**
- **Culture & integration**

Knowledge is tailored.

End-to-end provider

From audit to final acceptance.
One integrated system.

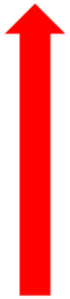

Audit | Training | Supervision | Quality assurance | Final acceptance

Why CTCweld?

From analysis to effective implementation.

Increase productivity and quality

Reduce cost and time

Why CTCweld?

Quality is created in the process. We act there.

Deep process understanding
From practice,
not from models.

Integrated approach
Training, consulting and
implementation aligned.

Intervention in the process
Prevent errors,
where they occur.

On-site execution
Presence in the process,
not just remote control.

Why CTCweld?

Proven results in practice.

-50%
Labour hours per unit reduced
- UAE -

-60%
Production cycle time reduced
- Morocco -

-30% to -80%
Cost and time reduced
- Kenya -

+1000
Welders qualified
- Worldwide -

Why CTCweld?

Your project. Our responsibility.

- **Clear structure and project leadership**
- **Hands-on implementation within the process**
- **Measurable results**
