## Our mission

»Building a future where intelligent sensors, satellite analysis, and AI agents revolutionize the way you interact with your assets.«

David Salzgeber, CEO and Founder

# Let your data speak.

# Let your data speak

baiond

## One platform. Unlimited potential

Customizable dashboard

baiond® is a smart IoT-platform that connects all your data, automates processes, tracks performance, and reduces your carbon footprint.

baiond® delivers real-time, AI-verified insights that power data-driven industries — from agriculture and smart cities to health, insurance, sports, retail, and beyond.

Vienna State Opera

Trusted in prestigious public buildings, and energy projects, baiond® helps your business to work smarter and save valuable resources.

[www.baiond.io](http://www.baiond.io)

## Data orchestration for insight-driven decisions

baiond® collects data from sensors, satellite images, IoT devices, APIs, databases, and other data streams, classifies and structures it to ensure precise orchestration. AI agents uncover the unseen within your data.

## Solutions for a more sustainable future

baiond® powers UNIDO projects across Africa, protecting forests, promoting clean energy, and advancing conservation efforts.

baiond® provides precise data for optimal food production using weather stations, AI, and earth and leaf sensors to assess and reduce possible risks.

Cutting-edge satellite data

baiond® utilizes advanced satellite data, APIs, and AI to track reforestation, boost farm productivity, and grow export potential.
