

**Sion Net d.o.o. Belgrade** is a distributor company with more than 20 years of experience in the placement of ICT, IP, Security and electrical equipment, as well as consumer electronics products, on the territory of Serbia and the region (Montenegro, BiH, and N. Macedonia). Thanks to our team of highly qualified engineers, we can provide our partners and system integrators, most quality support at all stages of the sales and post-sale process. Our sales portfolio includes exclusive equipment of world-renowned producers.

Our sales programs cover the following:

- Active and passive network equipment
- IP video surveillance
- Data center equipment
- Uninterruptible Power Supplies (UPS) and Power Distribution (PDU)
- AV equipment
- Network communication cabinets, cable distribution, devices for testing optical networks
- Equipment for VoIP systems and contact centres
- Industrial equipment: electrical wiring, electrical cabinets, industrial networking products, power conditioning, IoT devices
- Electrical products for offices, hotels and homes
- A large range of accompanying equipment, tools, marking systems ...
- Consumer electronics products

Company Sion Net offers more than 20.000 articles at the moment, which enables us to provide our partners with the most optimal solution in every required/possible scenario.

The following pages provide a brief description of the companies we distribute in the regional market.

**b2b**

ABB is a technological leader in the field of electrification and automation, enabling a more sustainable future with efficient use of resources. The company's solutions connect engineering know-how and software to optimize the way things are manufactured, moved, powered and managed. Building on a 130-year tradition of excellence, ABB's success is driven by 105,000 talented people dedicated to driving innovation that accelerates industrial transformation.

ABB is present on the market through four global business sectors, namely: electrical equipment, process automation, electric drives and robotics.

## CANOVATE®

Canovate Electronics is a member of the Canovate Group, founded in 1979. Company is leading provider of IT and telecom infrastructure technologies. Through large investments in its R&D department, Cannovate managed to place itself at the forefront of the Digital Transformation era, with cutting-edge innovations and patented products. As an end-to-end systems manufacturer, Canovate Electronics provides and manufactures innovative, environmentally friendly, sustainable and cost-effective network solutions in following categories: Data Centers, Fiber Optic Infrastructure, Structured and Racks and Cabinets.

[www.canovate.com](http://www.canovate.com)

## CONTEG

Conteg is one of the biggest producers of IT and industrial racks and data center solutions in EMEA. Based in the Czech Republic, Conteg, in its product portfolio, has a full range of telecommunication, data, industrial and outdoor racks and cabinets, as well as a complete solution for data centers, including systems of precision cooling, intelligent power distribution, monitoring, and cable management systems.

[www.conteg.com](http://www.conteg.com)

## DIETZEL UNIVOLT

Dietzel Univolt, an Austrian company, is the pioneer in developing halogen-free and flame retardant materials. Today, Dietzel Univolt is the world's number one in producing PVC & HFFR Cable Management systems famous for the quality of their rigid plastic conduits, pliable corrugated conduits, fittings, cable ducting, drainage pipes, and so often mandatory - halogen-free plastic conduits.

[www.dietzel-univolt.com](http://www.dietzel-univolt.com)

## eissound

Electronica Integral de Sonido S.A, (EISSOUND) is a Spanish company founded in 1993 that introduced a novel idea to the Multiroom Audio Sector - the first Audio Control Unit designed to fit aesthetically with the most popular light switches. COMBISOUND is the most complete solution for integrating public address and sound systems. This revolutionary concept combines the best of our ambiance sound products with any public address system for large building projects.

[www.eissound.com](http://www.eissound.com)

## GEWISS

Founded in 1970, it now operates in over 100 countries and employs over 1,600 people in 6 production facilities located in Italy, Germany, and Portugal as an international pioneer in the production of systems and components for low-voltage electrical installations. Gewiss has become a prominent participant in the market for home, energy, and lighting production solutions because to continuous investments in research and development, training for all employees, and expansion of production facilities. With five lines to address every need: Installation, Energy, Building, Lighting, and Mobility, its range has changed from goods that present answers to those that provide a service.

[www.gewiss.com](http://www.gewiss.com)

## KELINE

Based on many years of experience in the LTA domain, Krugel Exim, a European private company, has developed its own brand – Keline, offering an "end-to-end quality" with a full range of top-quality products for structured cabling. Key KELine system components are tested under the most rigorous international, European, and U.S. standards for structured cabling. All products/components are certified in accordance with EN/ISO 9001:2008, ISO/IEC 11801:2017 and under constant supervision by independent international laboratories - 3P, DELTA, and GHMT. KELine, like all other major SCS producers, is offering a 25-year warranty, applied on the installations performed by certified KELine® partners and after the mandatory audit of final measurement results.

[www.keline.com](http://www.keline.com)

Klein Tools has been committed to American manufacturing since 1857. For more than 160 years, Klein Tools has remained committed to professional tradesmen around the world, with a commitment to producing the finest hand tools in the world. This manufacturer doesn't just make great products, they make great products that meet the demands of the professionals who use them every day. Klein Tools is dedicated to designing and manufacturing innovative tools that are recognized for durability and dependability, and proven to withstand the different jobsite conditions that tradespeople encounter daily.

[www.kleintools.com/](http://www.kleintools.com/)

From its start in 1906, Leviton, a USA company, has grown to be the largest, family-owned, global provider of products and solutions for electrical and network wiring, lighting, energy management, and data infrastructure. In 2015, Leviton acquired Brand-Rex, a trusted name in high-performance cabling for more than 45 years. Leviton/Brand-Rex is based in Scotland, manufactures a full range of copper and fiber optic cabling products, including those for military, rail, automotive, industrial, or aerospace applications. Leviton offers reliable network infrastructure and high-performance copper and fiber optic cabling products, whether it is a high speed, robust connectivity within the classroom, lecture theater, patient information systems, or solutions for mission-critical applications and extreme environments. Leviton network connectivity is installed in some of the most advanced data centers and applications in the world.

Snom Technology, founded in 1997 in Germany, initially based its product line on the H.323 protocol. From 2000, SNOM implemented SIP support, and later, all VoIP products were exclusively based on SIP protocol (Session Initiation Protocol). SNOM's products are interoperable for enterprise communication systems and compatible across standards-based VoIP platforms from different vendors. With the vast array of Snom products, businesses can quickly and easily find the right endpoints for each endpoint user in the office. Devotion to perfection, attention to detail, and German engineering create voice quality differentiation compared to most other vendors.

[www.snom.com](http://www.snom.com)

Teltonika, established in 1998 in Lithuania, in the last 20+ years, became a leading manufacturer of geolocation solutions (GPS trackers). As one of the first international satellite monitoring HW & SW manufacturers, with its own R&D and production, Teltonika also became a leader in the field of 2G/3G/4G cellular routers. Vast knowledge in R&D of mobile GPS trackers and 2G/3G/4G cellular routers gave Teltonika a unique opportunity to think like a most experienced developer of an IoT / M2M device. Actually, almost all of Teltonika's work is today called the Internet of Things (IoT), so it can genuinely be said that Teltonika is one of just a few companies globally with 20 years of IoT experience!

[www.teltonika.lt](http://www.teltonika.lt)

## | allocacoc |

Since the company's creation in the Netherlands in 2011, Allocacoc has established a philosophy to redefine daily living by innovating already existing products. Allocacoc is an industrial design company that sells redesigned everyday products such as the PowerCube. The company creates such innovative products by adding unique, unprecedented designs but still affordable to everyone. As a one-of-a-kind company, Allocacoc has established that industrial design is not limited to any category or any current industry. With an uncompromising commitment to delivering more user-friendly and original products, it fuses industrial design with quality and value.

[www.allocacoc.com](http://www.allocacoc.com)

## belkin

Established in 1980., Belkin is a leader in the accessories market, delivering power, protection, productivity, connectivity, audio, security, and home automation solutions for a broad range of consumer electronics and enterprise environments. Designed in Southern California and sold in more than 50 countries worldwide, Belkin creates products that empower people through technology, whether at home, at work, or on a new adventure. The Belkin ensures that every product is thoughtfully engineered, made of the highest-quality materials and thoroughly tested before making its way to you. Belkin is also the parent company for Linksys (from 2012), WeMo branded products & services, and the smart home water management company - Phyn.

[www.belkin.com](http://www.belkin.com)

## LEXON®

With nearly 30 years of existence, more than 180 design awards, fruitful collaborations with some of the most prestigious designers, a presence in 90 countries and more than 6,000 points of sale, as well as a significant activity in the corporate gift business, Lexon has established itself as a French design brand known worldwide. Its timeless collections of objects and luggages, designed for the home, office, travel or urban nomadism, combine a strong identity with simplicity of use, bringing an aesthetic pleasure to everyday life.
