

Who we are

THRIVE is an EU-funded multidisciplinary consortium of 13 partners across eight countries, uniting researchers, clinicians and patient advocates to improve paediatric and adult liver cancer outcomes.

What we are working on

We investigate tumour–host interactions, biomarkers and treatment resistance, combining molecular profiling, microbiome research, artificial intelligence and preclinical models to develop precise, affordable therapies for liver cancer.

What's the one thing we need next

We need access to diverse patient cohorts, high-quality samples and clinical data, plus sustained collaboration to validate biomarkers, AI tools and innovative treatments in real-world care.
