

Who we are

WISH unites patient advocates, clinicians, researchers and technology partners to make breast cancer survivorship care more accessible, continuous and closer to home.

What we are working on

We combine hospital and primary care through a digital platform for symptom reporting, coordinated follow-up, triage and specialist support.

What's the one thing we need next

We need empowered patients with strong health and digital literacy to actively manage symptoms, treatment and shared survivorship care.

**5 years Mission Cancer:
Stronger Through Connection**
