

Messagenius

SECURE ENTERPRISE MESSAGING

The largest independent electricity grid operator in Europe and 6th in the world

Terna adopts Messagenius to protect and optimize internal communications between **field personnel** and **control rooms**, with **messaging-driven workflows** based on operation manuals.

- **WORKFLOW** - User authentication required for critical steps, interdependencies between interactions, calls-to-action, task handovers, wait mode, etc.
- **BENEFITS** - Communications are digitized and made asynchronous; control rooms work on multiple tickets simultaneously; operations security increases; compliance with procedure manuals is ensured; margin of error drops, reporting times are cut.

The owner of Italy's national railway network

Since 2017 Rete Ferroviaria Italiana has integrated Messagenius in the field operations software used by **technicians** and **control rooms**. **Top managers** have leveraged Messagenius, as a complement of the intranet, to send **broadcast messages** to the **entire workforce**.

- Integration with **task management software**.
- **Dictation** feature for quick reporting.
- Frictionless adoption: **no training needed**.

FINANCIAL HOLDING

Specialized in asset management (under NDA)

A multinational finance and capital management company adopts Messagenius as corporate branded messenger to secure **internal comms** among employees (1000+), clients and managers.

Thanks to the on-premises installation and integration into their software, employees can exchange **sensitive information** via texts, voice messages, pictures, videos, files and position, with **no compromise on compliance**.

SUPPLY CHAIN SECURITY LEADER

Multinational company (under NDA)

A US-HQed multinational corporation, leader in supply chain security and specialized in **cargo crime prevention**, adopts Messagenius for communications between its **control rooms** and **law enforcement** agencies, **private security** firms, and **client** companies worldwide.

CRUISE LINES

Luxury, premium & contemporary segments (under NDA)

3 market-leading multinational cruise companies have integrated Messagenius into their apps.

- **Contemporary** (guests; guest & customer care)
- **Premium** (crew)
- **Luxury** (guest & concierge)

Instant messaging is made available **within the cruise line app**, enabling **on-board comms without Internet connection**, thanks to installation on **on-board servers** and **ship-to-shore** synchronization.
