

Company profile

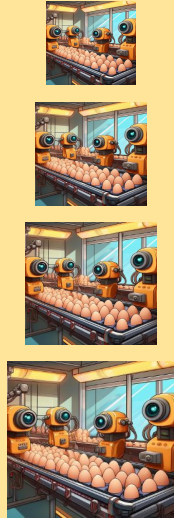

Design and development of solutions to automate quality controls

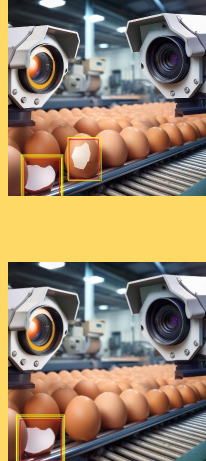

Automatic quality control Advantages

+++ Speed
- - - Costs

Scalability

Repeatability

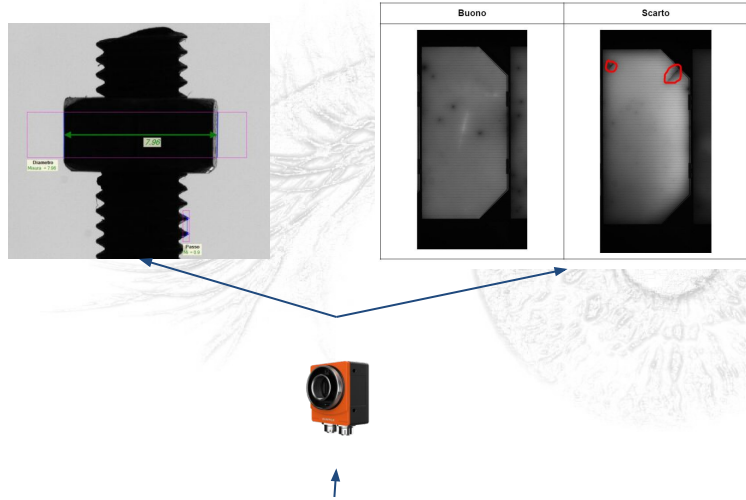

**Supervising
monitoring
Industry 4.0 5.0**

**100% check
production**

GENERAL SOLUTION

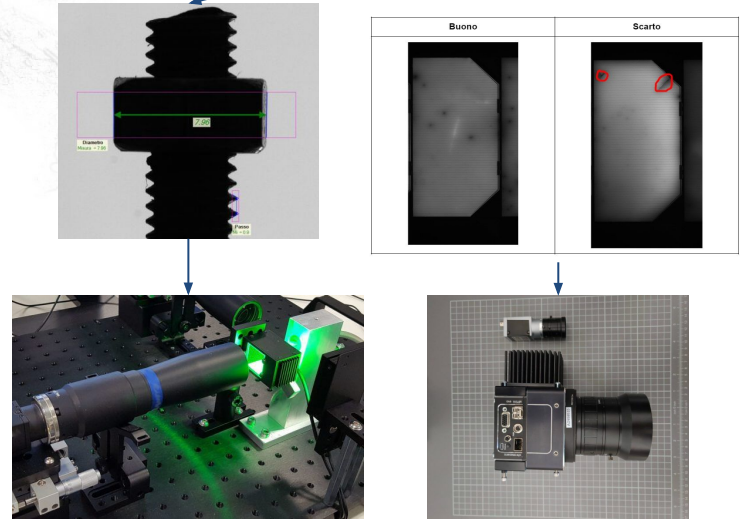

Same Hardware and software
to solve different problems

Start

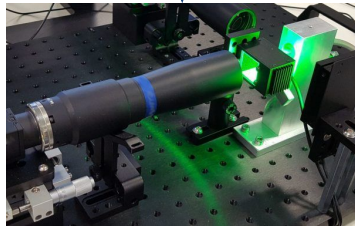

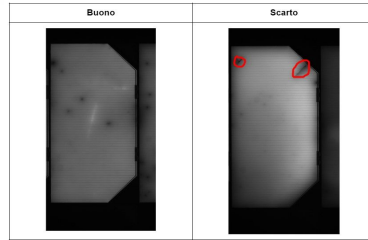

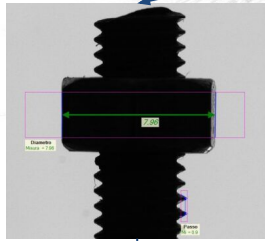

Start

Problem analysis then find hardware and
build custom software

OUR SOLUTIONS

Problem analysis then find hardware
and build custom software

Higher Accuracy

Higher Throughput

Easier to integrate

Where we apply AI

Anomaly Detection

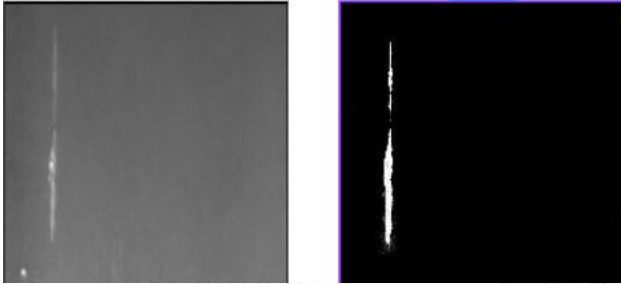

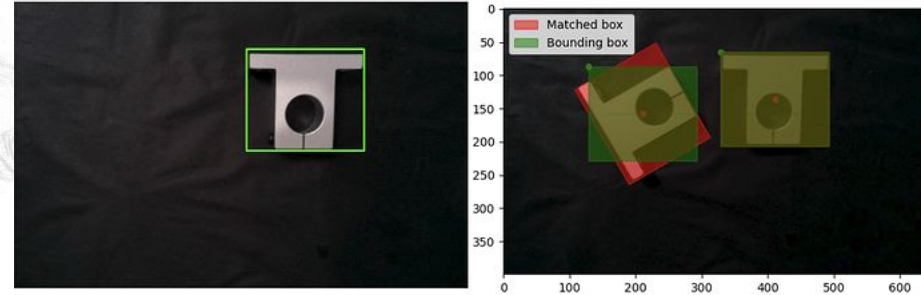

Image Matching

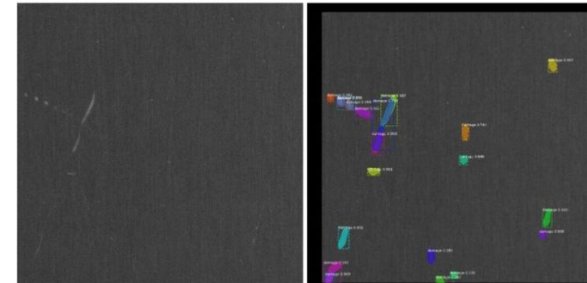

DeepOcr

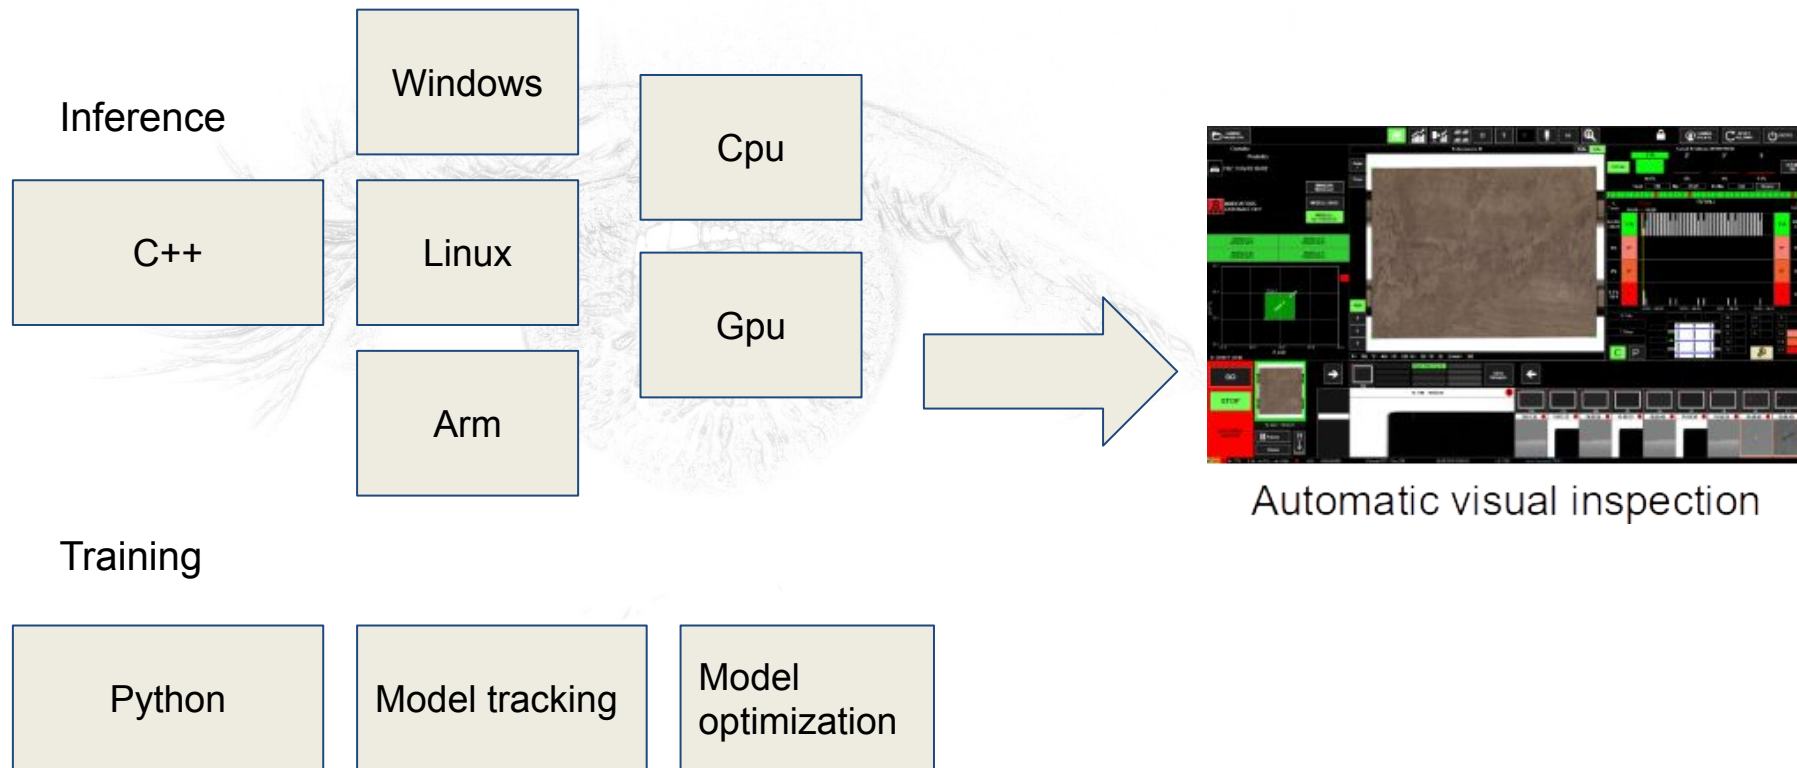

Expiring date detection:
20/04/2024

Scratch Detection

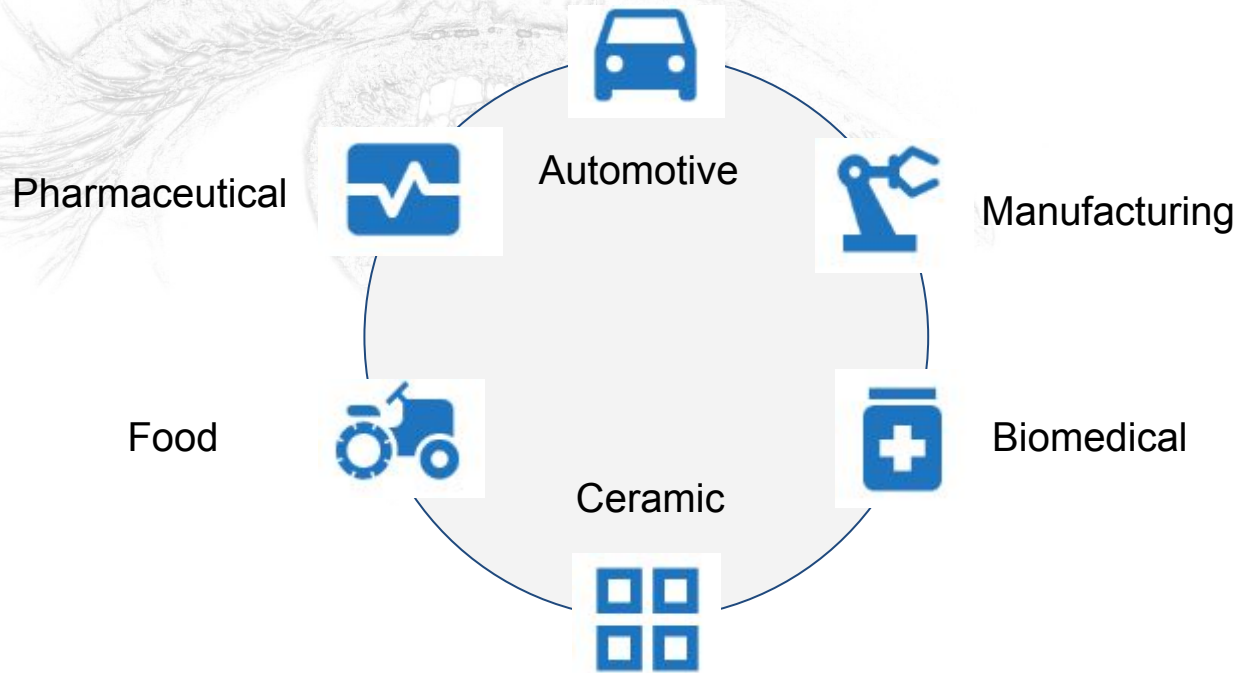

How we apply AI

Our Market

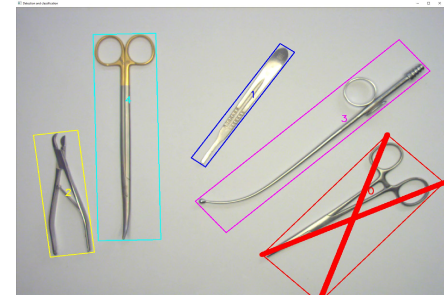

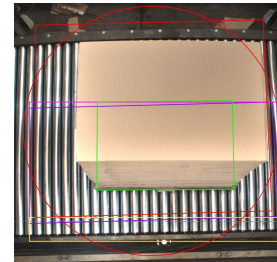

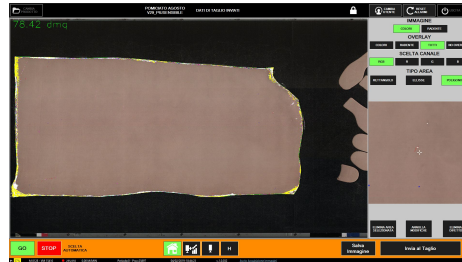

- We provide our advanced vision solutions for different types of market
- Our customers are end user or OEM usually with revenue > 50 mln €

- ★ Strong scientific background. Our team is composed mostly by computer vision engineers
 - ★ More than 200 machine vision system designed and installed
- Strong industrial experience in selecting hardware and design software for specific applications

Automatic visual inspection
