

Atlas Intelligence is built to make complex work simple. By combining automation, smart AI agents, seamless integration, and enterprise-grade security, it empowers teams to plan faster, manage smarter, and deliver with confidence at scale.

## The Foundation: Powering your Daily Work

### Fits into how your teams already operate

Meet your teams where they work—across shared tools like SharePoint, Teams, and email—embedding intelligence into the day-to-day flow without disruption.

### Accelerates functional execution

From PMOs to Regulatory to Clinical Ops, reduce time spent on manual work—automate charters, reports, and documentation so teams can focus on higher-value delivery.

### Secure, integrated, and enterprise-ready

Connects directly into your ecosystem with compliance, auditability, and access controls that align with team roles and enterprise governance.

### Drives action, not just productivity

Surface the right insights to the right people—enabling better coordination, faster decisions, and smarter teamwork across functions.

Plan Smarter

Automate Workflows

## Intelligent Learning: Our expertise, your context, growing smarter

### Atlas Nucleus Engine

Trained by Atlas experts, it embeds trusted knowledge and processes to make Atlas Intelligence AI accurate, reliable, and consistent from the start.

### Context Mesh

Powered by the Nucleus Engine with embedded expertise, then tailored to your unique context. It aligns with your policies, priorities, and ways of working so Atlas Intelligence AI delivers insights that are relevant and practical.

### Adaptive Intelligence Layer

Atlas Intelligence AI becomes smarter over time. By learning from data and feedback, it continuously improves predictions, decisions, and outcomes.

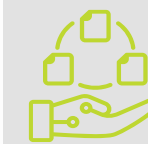

Surface Insights

## From Planning to Delivery: Use cases that matter

### Project & Program Management

Auto-generate compliant project plans, charters, risk logs, and timelines—all tailored to your standards.

### Clinical Operations

Accelerate SDTM spec creation, testing documentation, and site activation materials with AI-powered precision.

### Medical Affairs

Simplify MLR content generation, standardize document creation, and drive faster medical review cycles.

### Regulatory Affairs

Create submission-ready documents, streamline global compliance, and manage audit trails with confidence.

### Portfolio & Executive Reporting

Ask a question, get the answer—instantly. Deliver conversational dashboards and summaries that reduce time to insights across portfolios.

Manage Tasks

Strengthen Delivery
