

# UTOPI

Paper clothing

## UTOPI, THE FUTURE OF CLOTHING BY MAGIC PULP

UTOPI is not just a garment; it is a forward-thinking vision of the future of textiles. Developed by Magic Pulp, a pioneer in the art of paper, UTOPI reinvents the materials used in clothing manufacturing, offering an innovative, lightweight, durable, and sustainable alternative. This manufacturing patented process relies on a unique transformation of paper, capable of meeting the diverse needs of multiple sectors while adhering to eco-responsible principles.

## ECO-RESPONSIVE EXPERTISE

UTOPI garments are made from carefully selected papers chosen for their fineness and strength. Each fiber is treated to provide flexibility, comfort, and durability, while maintaining a low ecological footprint through the use of non-polluting inks and finishes. This innovative process paves the way for lightweight, breathable textiles, while ensuring exceptional performance in demanding environments.

## INNOVATIVE AND FUNCTIONAL USES

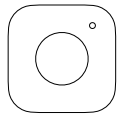

UTOPI garments go beyond fashion by offering innovative solutions for sectors such as events, healthcare, laboratories, and personal protective equipment (PPE). Robust and practical, they are ideal for disposable clothing, hygiene protections, and lightweight, comfortable PPE for laboratories, medical settings, or events. UTOPI combines durability with a reduced environmental impact compared to traditional textiles.

## A VISION OF THE FUTURE

UTOPI embodies the future of textile materials, with a decidedly sustainable and innovative approach. By transforming paper into a high-performance, eco-responsible material, UTOPI opens new possibilities in industrial, medical, and event sectors, providing a functional, lightweight, and environmentally friendly solution.
