

# SCIENTIFIC CYBERSECURITY ASSOCIATION OF UKRAINE

## Prerequisites of creation

### Low level of cybersecurity

Ukraine ranked 78th in the Global Cybersecurity Index 2020 (39th in Europe)

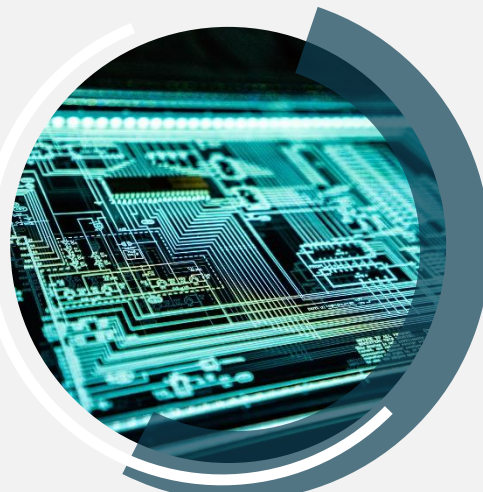

### A large number of threats

- Ukraine has become a testing ground for various scenarios of cyberattacks
- A hybrid war is being waged against Ukraine
- A large number of cybercriminals

### Considerable intellectual potential

- More than 50 universities that train cyber specialists
- Availability of specialized research institutions

## Mission, vision

**The main goal** of the Scientific Cybersecurity Association of Ukraine is to increase the general level of cyber security of Ukrainian society.

To realize the specified goal, SCSCA.UA develops and implements projects and integrated strategies in the **following areas**:

- development of scientific directions;
- development of education (formal and informal) in the field of cybersecurity;
- integration of efforts of specialists and companies in the field of cybersecurity;
- growing reputation and image of Ukraine in the world.

## Tasks of the organization

- Creating a conscious community of active scientists and practitioners united by the idea of developing the cybersecurity industry.
- Carrying out research (scientific-technical), project and analytical work in the field of cybersecurity.
- Implementation of innovative educational activities in the field of cybersecurity.
- Organization of specialized trainings, scientific conferences and seminars in the field of cybersecurity.
- Promotion and implementation of cybersecurity ideas in various industries.
