

Purchase of MRI and CT machines for the central city hospital

MPT

KT

The goal is to provide a full range of high-quality medical services by the Korosten Central City Hospital, which is designated as a key medical institution of the entire Korosten district.

What does the community need?

- search and attraction of financing (1.3 million euros) for the purchase of medical equipment
- search for community partners for free transfer of equipment to the balance of the medical institution

What does the community already have?

- the bomb shelter was repaired in cooperation with UNICEF
- renovation of the maternity ward of the hospital and purchase of medical equipment in cooperation with UNICEF
- humanitarian aid in the form of functional beds, mattresses from Ayuda Contenedores, Association Europa con Ukraina and local public organizations.
- the reconstruction of the 8-story building of the central city hospital is being carried out with the funds of the state budget
