PANDO INFINITY

Collaboration Company

Pando Infinity is a technology provider specializing in software development that is tailored to provide high-tech solutions including Blockchain Development, Web/Mobile Development, and Artificial Intelligence/Machine Learning.

WHAT WE DO

DApp Development

Smart Contract

DEX/CEX Wallet

Marketing Building

DAPP DEVELOPMENT

AMELA offers one-stop dApp development, including smart contracts, frontend, backend, and design. Our dApp development process ensures that we are capable of abstracting the complexity of the blockchain and building a seamless user experience.

Staking Platform

Our complete white-label and customizable services help you eliminate middlemen from transactions and grow your business at a faster pace.

Yield Farming

Build on an open-source platform, our platform offers complete transparency and visibility to users and enables them to grow with ease.

Dao Development

Our experts can assist you with integrating a DAO protocol into your business. All your requirements will be included in the smart contracts that can achieve hardcore decentralization.

Marketplace Development

We develop NFT Marketplace on a multi-chain that meets the key requirements: Interoperability, Controllability, Secure Transaction, Economical Gas Fee and etc

SMART CONTRACT

We also offer blockchain-agnostic smart contract development. This allows you to build decentralized applications (dApp) that can interact with any blockchain.

Smart Contract Development

We provide the most accurately coded smart contract conditions to you. Our solution ensures that your Blockchain adheres to the right automation.

Audit smart contract

We provide smart contract validation services for various industries. Our end-to-end solution makes sure that smart contracts are not susceptible to attacks and hacks.

DEX/CEX WALLET

A cryptocurrency wallet enables users to earn, manage and transfer their virtual currency. Unlike physical currency wallets, cryptocurrency wallets record transactions based on blockchain technology. Our proficient team excels in creating different types of wallets including Web Wallets, Mobile Wallets.

Mobile Wallet

With an increase in mobile trading, we ensure that our wallets are compatible with both Android and IOS platforms with top-notch security and the best user experience.

Web Wallet

We ensure the secure management of all the assets of users with a web wallet that supports multiple currencies, supreme security measures, and a self-explanatory interface.

WORKING PROCESS

DELIVERY MODELS

Fixed-price

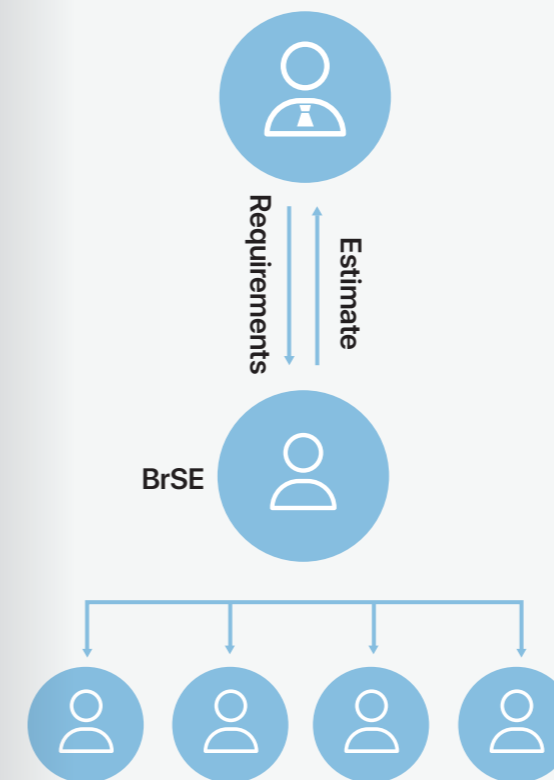

- Completed solution under a fixed budget
- Well-defined goals, vision, workflows, and results
- Unlikely to change for the course of development.

Labo contract

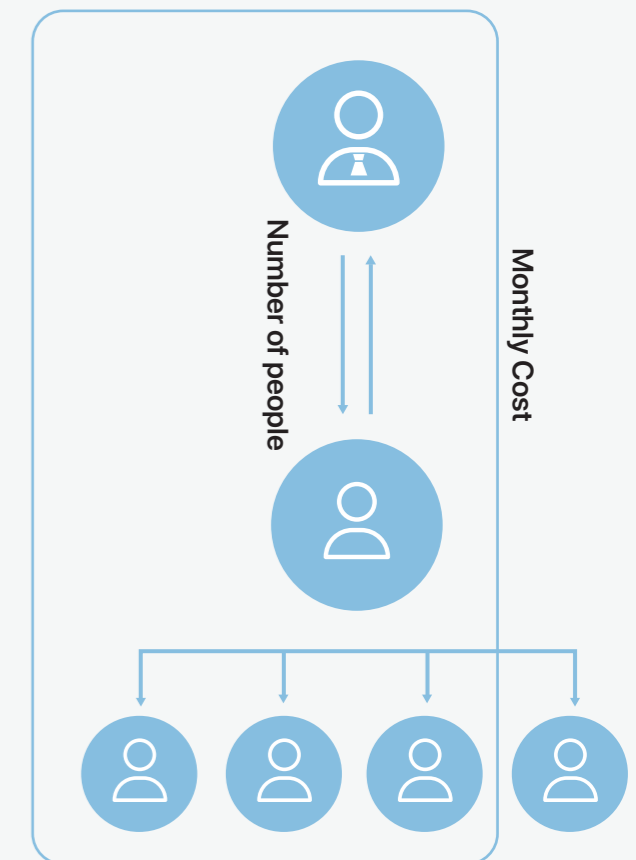

- The price will depend on the time and effort spent on the project
- You can flexibility to modify your requirements and to vary workload.

	Fixed-Price	Labo/T&M
Scope	Small	Medium & Large
Requirement	Defined	Evolving
Budget and time frame	Fixed	Flexible
Client's control	Little	Significant

Fixed-Price

Cost estimation bases on the reciprocal scope and project requirement

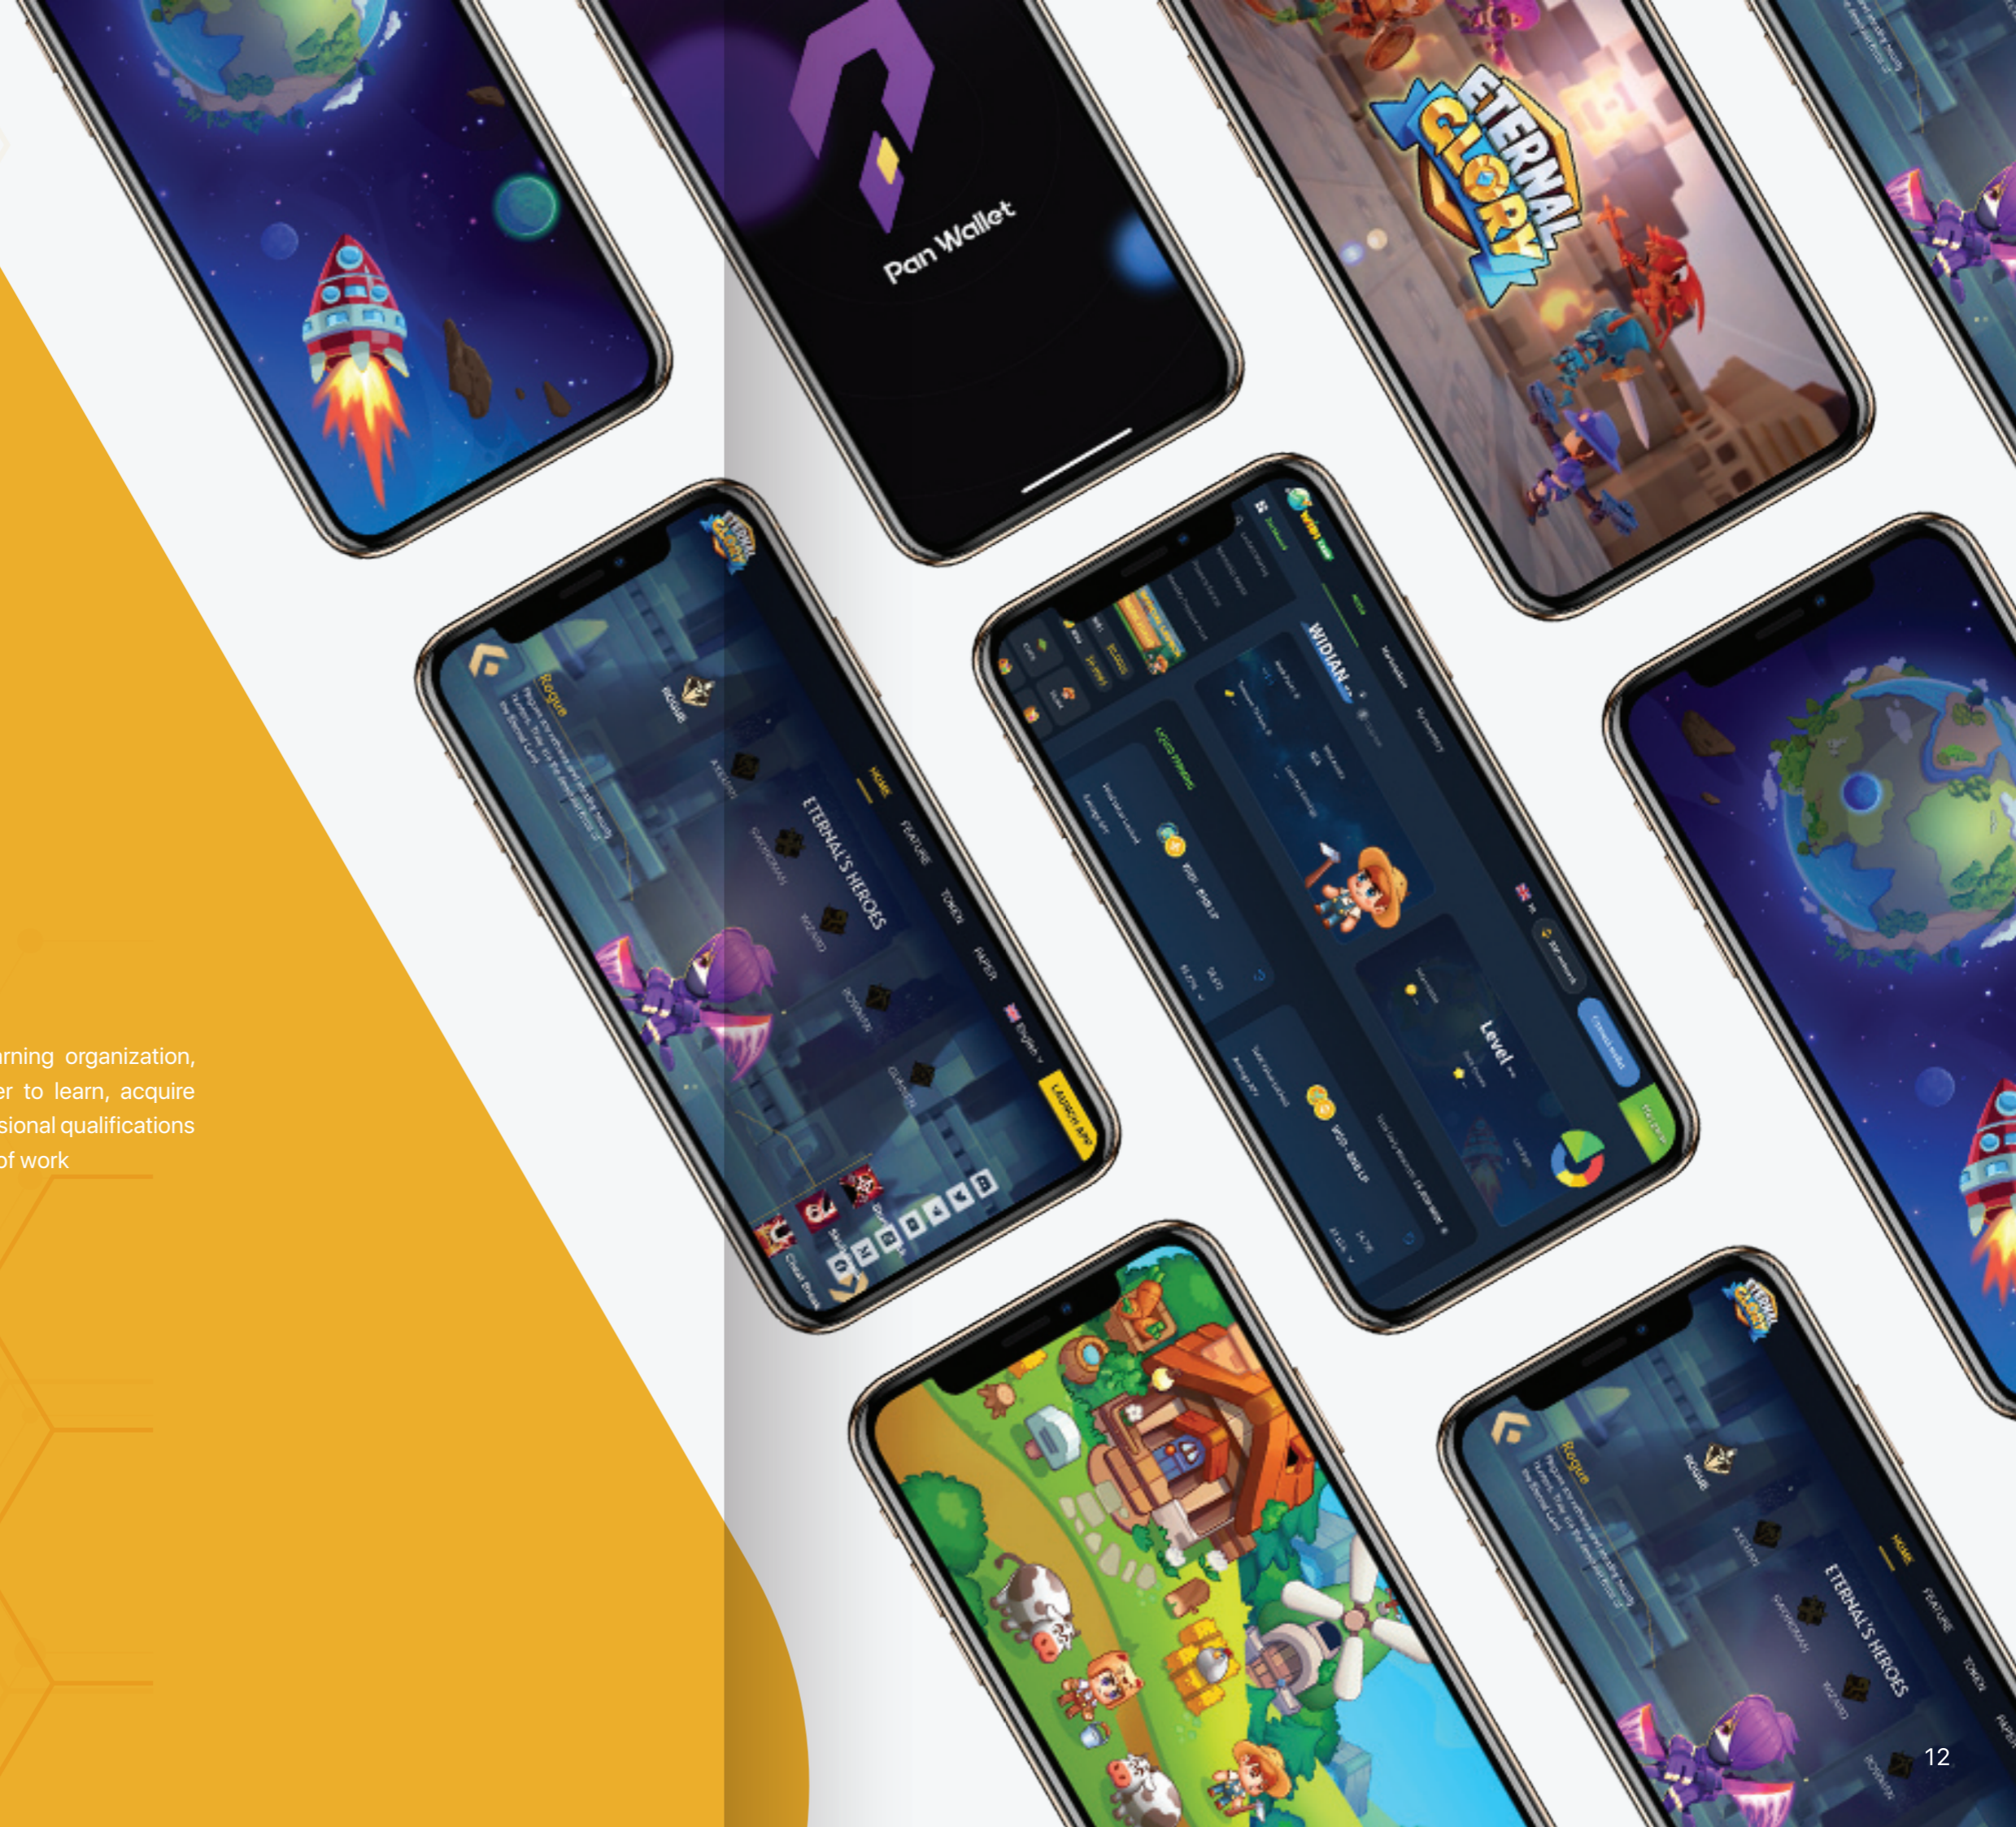

Labo/T&M

Hire a project team and pay monthly
Monthly cost = number of people x unit price
