Cyber Guard

Overcome the limitations of existing MDRs with Cy-Napea®

Existing MDR solutions have a siloed focus on stopping threats with partial remediation capabilities, requiring further integrations that increase complexity, costs, and time-to-value on your end.

Cy-Napea® MDR (powered by Novacoast)

A simplified, continuous, effective endpoint security service designed for service providers to deliver unmatched business resilience to clients while optimizing resource allocation.

- Amplify security effectiveness with 24/7/365 monitoring & support by a world-class SOC team, outsourcing day-to-day operations to focus resources on strategic initiatives.
- Unlock unmatched business continuity leveraging remediation that includes seamless recovery with options for full outsourcing.
- Get prioritized visibility on security incidents in a platform that integrates data protection, cybersecurity, and endpoint management services, unlocking up to 60% better TCO through consolidation.

Cy-Napea® partnership with Novacoast

Novacoast, an international cybersecurity company specializing in IT services and software development, powers Cy-Napea®'s MDR:

- 25+ year proven track record
- Based in Southern California, USA
- Builds and maintains IT security solutions for the world's largest organizations
- Enhances Cy-Napea®'s EDR telemetry with proprietary SIEM & SOAR systems for additional analysis

24/7/365 outsourced SOC at your disposal

Fully outsource endpoint protection services via Cy-Napea®'s certified MDR partner, Novacoast:

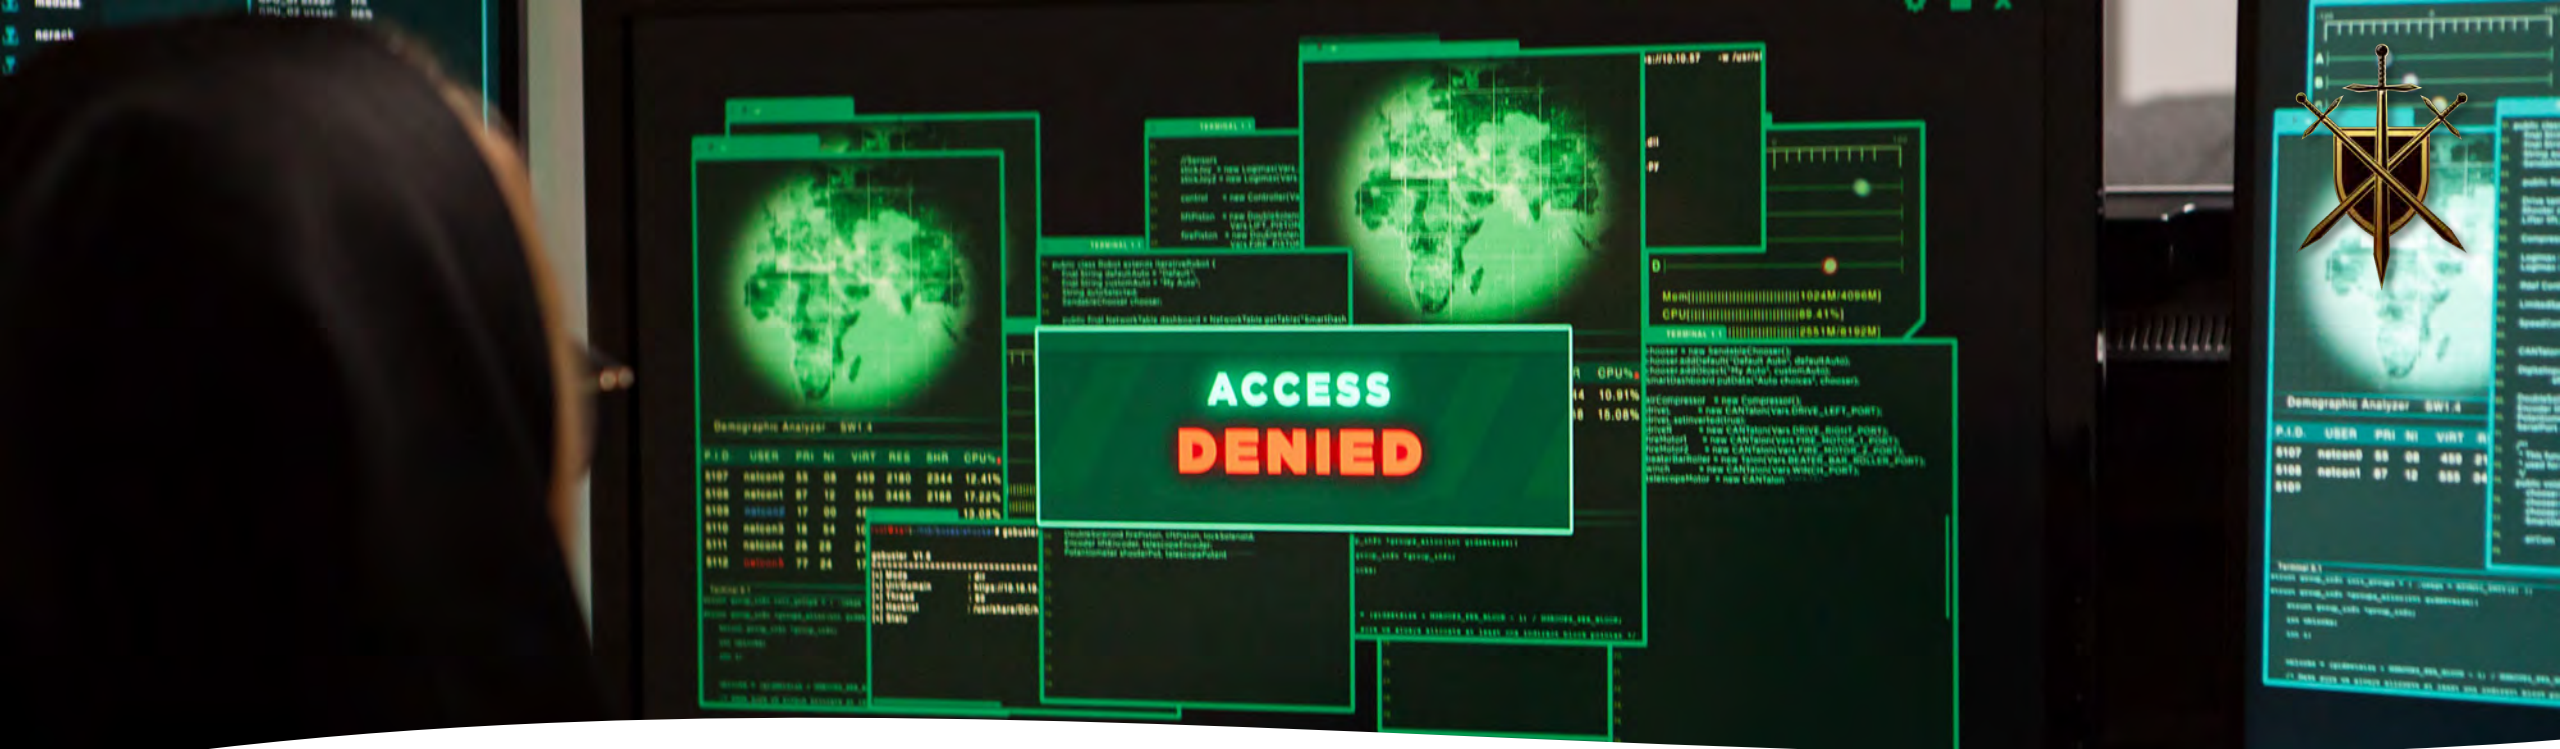

1. Effortless provisioning – single-click deployment with outsourced SOC handling everything
2. Continuous monitoring of endpoints to identify threats
3. Expedited investigations leveraging rich telemetry, threat intelligence, and deep forensics
4. Event triage and prioritization with real-time alerting
5. Endpoint isolation & threat containment to prevent further spread
6. Rapid response, including recovery, with full outsourcing options
7. Continuous reporting to demonstrate value to clients

An MDR that stops the breach and ensures business continuity

Succeed where other MDRs fail, unlocking the full power of integrated remediation & recovery for unmatched business resilience:

- Instantaneous threat containment by isolating the affected workload
- Rapid remediation, including killing malicious processes and quarantining threats
- Vulnerability management to close vulnerabilities leveraged in attacks
- Integrated recovery, attack-specific rollback, file- or image-level recovery, and disaster recovery with full outsourcing options

Cy-Napea® MDR:

Top 5 use cases

- Amplify team effectiveness & optimize resource allocation
- Identify and block attacks before a breach
- Respond before damage is done
- Enable compliance and cyber insurance
- Consolidate solutions

Why Choose Cy-Napea® MDR?

- Comprehensive, continuous protection for your endpoints
- Seamless integration of cybersecurity and data protection
- Outsourced expertise with 24/7 monitoring and rapid remediation
- Peace of mind with unmatched business continuity and recovery
