Challenges

4 key challenges that companies must actively address today in order to play a role tomorrow.

01
Transformation

Are your organization and internal processes able to cope with accelerated market dynamics? Is there a practised culture of questioning, adaptation and renewal?

02
Digitalisation

Are your processes running efficiently at the key points and are you utilizing the full potential of automation? Are your customers integrated into your processes in the best possible way?

03
Modernisation

Is your IT landscape up to date? Is it fit for the dynamics of the market and can it grow in line with increasing requirements?

04
Innovation

Do you want to expand your business model digitally? Or secure a clear competitive advantage by introducing an innovative digital product idea?

We analyse the requirements with you and develop a concept for maximum future security on this basis.
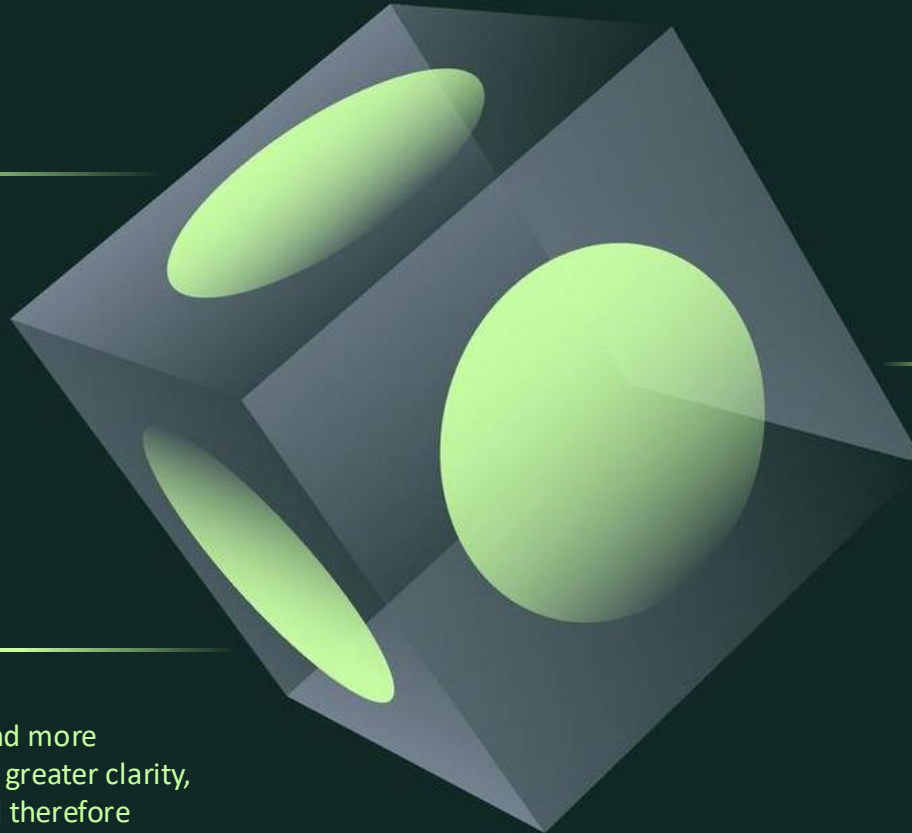

holisticon strategy

Our holistic consulting approach

Strategy

The first step is to look at the core of your company. How does the current business model work? How do we translate and expand it for the digital space in order to be even more successful in the future?

Technology

State-of-the-art software ensures better and more efficient processes and enables new products. It is individually developed in the right places and optimised from the outset for flexible scalability and the highest security requirements.

Organisation

We make your organisation more agile, faster and more innovative. Agile methods and new roles ensure greater clarity, more efficient cooperation, better decisions and therefore greater business success.

holisticon strategy

We turn digital strategies into reality

- Regardless of the starting point or the scale of the ambitions and challenges, Holisticon is ready to support with extensive expertise, years of experience, proven methodologies and recognised industry experts.

- The core is our unwavering attitude and energy required to not only support, but also take responsibility for the success of your endeavour.

- Through our dedicated support and commitment, we ensure that every project is accompanied by the highest quality and results in measurable value.

We translate the strategy

We plan and implement

Corporate strategy

Strategy validation & Challenge	Identification of business opportunities	Strategic schedule	Business Model & Case Design	Business Case Tracking & KPI Framework	Product Vision & Roadmap	Client & User Insights	Solution Design and technical architecture	Product Design (UX & UI)
Prioritisation of business opportunities	Fact-based business case	Strategy monitoring	Agile Team Setup & Development	Front- & Backend Product Development	Quality Assurance & Testing Strategie	Release Strategy & Planning	Product Security & Data Protection	Product Tracking & Analytics

Holisticon Delivery Model

Holisticon Strategic Framework

Holisticon Product Ownership Framework

Identification and validation of business opportunities	Priorisation and control	Monitoring added value and impact	Business Planning	Product & Process Design	Agile Realisation & Empowerment	Solution Design & Architecture	Security & Data Protection	Development, Testing & Release	Usage & Incident Analytics

The modular approach allows projects to be customised:
1) Utilising the best existing skills of you and Holisticon
2) A focus on critical tasks in order to work efficiently and minimise the use of resource
3) Defined times for strategic reviews guarantee the success of the project
