Applications

Industrial Automation: PLBlox modules are ideal for a wide range of industrial automation applications. They provide reliable and efficient control and monitoring of critical processes, ensuring optimal productivity and safety.

Building Automation: PLBlox modules play a vital role in building automation systems, enabling centralized control and monitoring of HVAC, lighting, security, and other systems.

Personnel Access Control Systems (PDKS): PLBlox I/O modules offer a game-changing solution for Personnel Access Control Systems (PDKS), empowering businesses to optimize workforce management and reduce labor costs. By seamlessly integrating with turnstyle systems and automatic door control, PLBlox takes employee tracking to the next level, delivering unparalleled efficiency, accuracy, and security.

For a more sustainable future

Reduce your operating costs and contribute to the environment with less power consumption.

- Reduce the amount of electronic waste with modular and compact designs, recyclable materials and repair possibilities.
- Contribute to a sustainable production with clean production technologies, efficient resource utilisation and minimised environmental footprint.
- Protect the long-term value of your investment with long-lasting designs, easy maintenance and repair.
