REKEN

Onion peeling
machine system

RAW MATERIAL RECEIVING LINE

REKEN

Benefits:

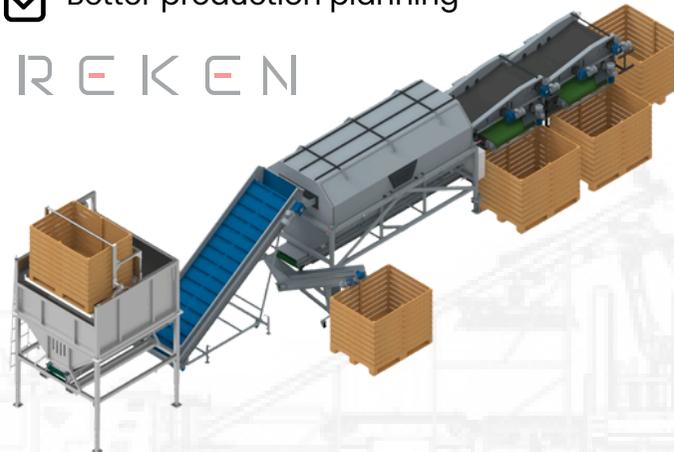

- Optimized labor costs
- Unloading 24 tons in 2 hours
- Unloading all types of trailers
- Ensures efficiency and work comfort
- Even filling of pallet boxes
- Pre-separation of contaminants
- Segregation of smaller-sized raw materials

LINE FOR SORTING AND CUTTING ONION TOPS

Benefits:

- ✓ Optimization of further processes
- ✓ Acceleration of the peeling process
- ✓ Improvement of the quality of the peeled product
- ✓ Minimization of raw material losses
- ✓ Hygiene and cleanliness of the process
- ✓ Protection of machines and stable operation of the production line
- ✓ Better production planning

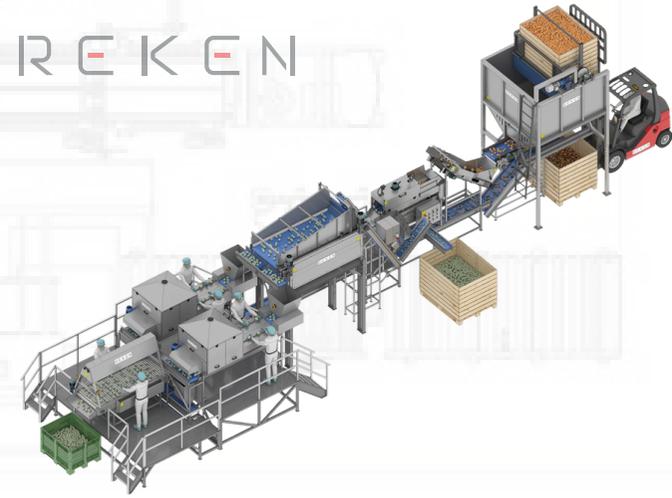

REKEN

We will prepare a complete line for you, including design and service!

COMPREHENSIVE ONION PEELING LINE

REKEN

Benefits:

- ▶ The capacity of the entire line for onions with a caliber of 50-70 is 2,500-3,000 kilograms per hour
- ▶ Blowing, sorting, and buffering without manual intervention – capacity of 240 onions per minute
- ▶ A maximum of 7 people are required to operate the line
- ▶ Optimization of the peeling process
- ▶ High-quality finished product
- ▶ Optical sorter that rejects uncut onions
