

IMMERSIA®
SEE BEYOND

Data turned into visual narratives that drive
analysis and **action**

With over 8 years driving **digital transformation**, we optimize the power of data through **visual analytics** and **artificial intelligence**

— Trusted by Industry Leaders

Next-generation platform based on **digital twin** technology that merges analytics, AI, and advanced visualization.

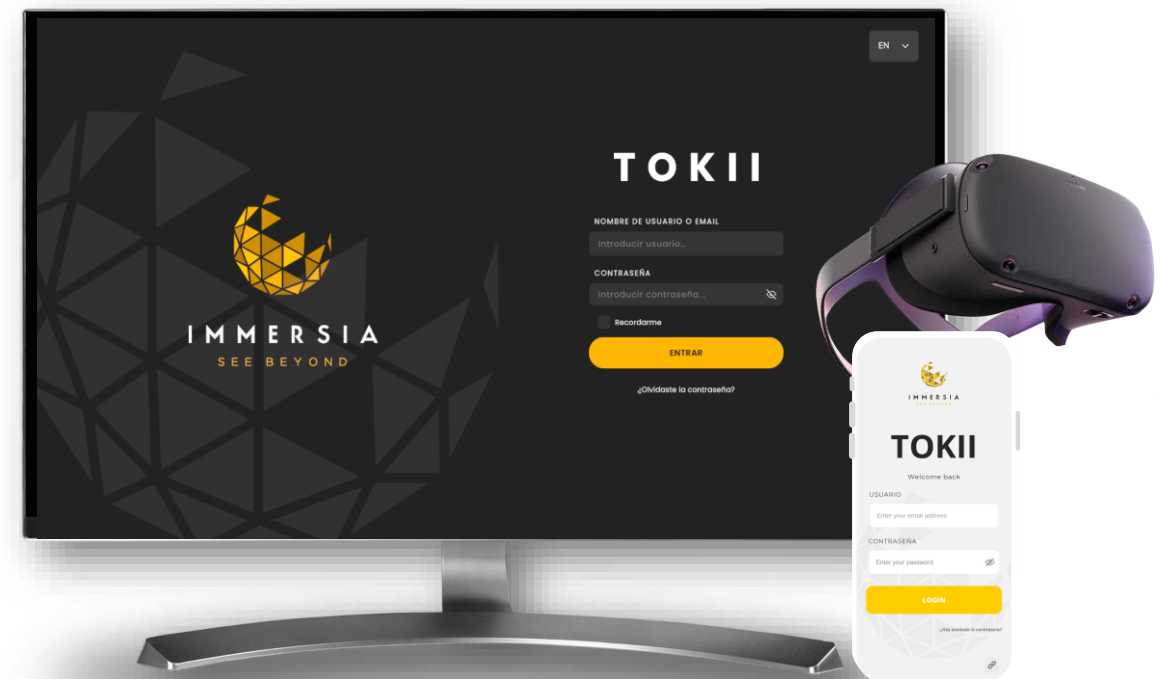

TOKII enables centralized management of the entire application ecosystem (PC, tablet, mobile, etc.) acting as a central interpretation hub.

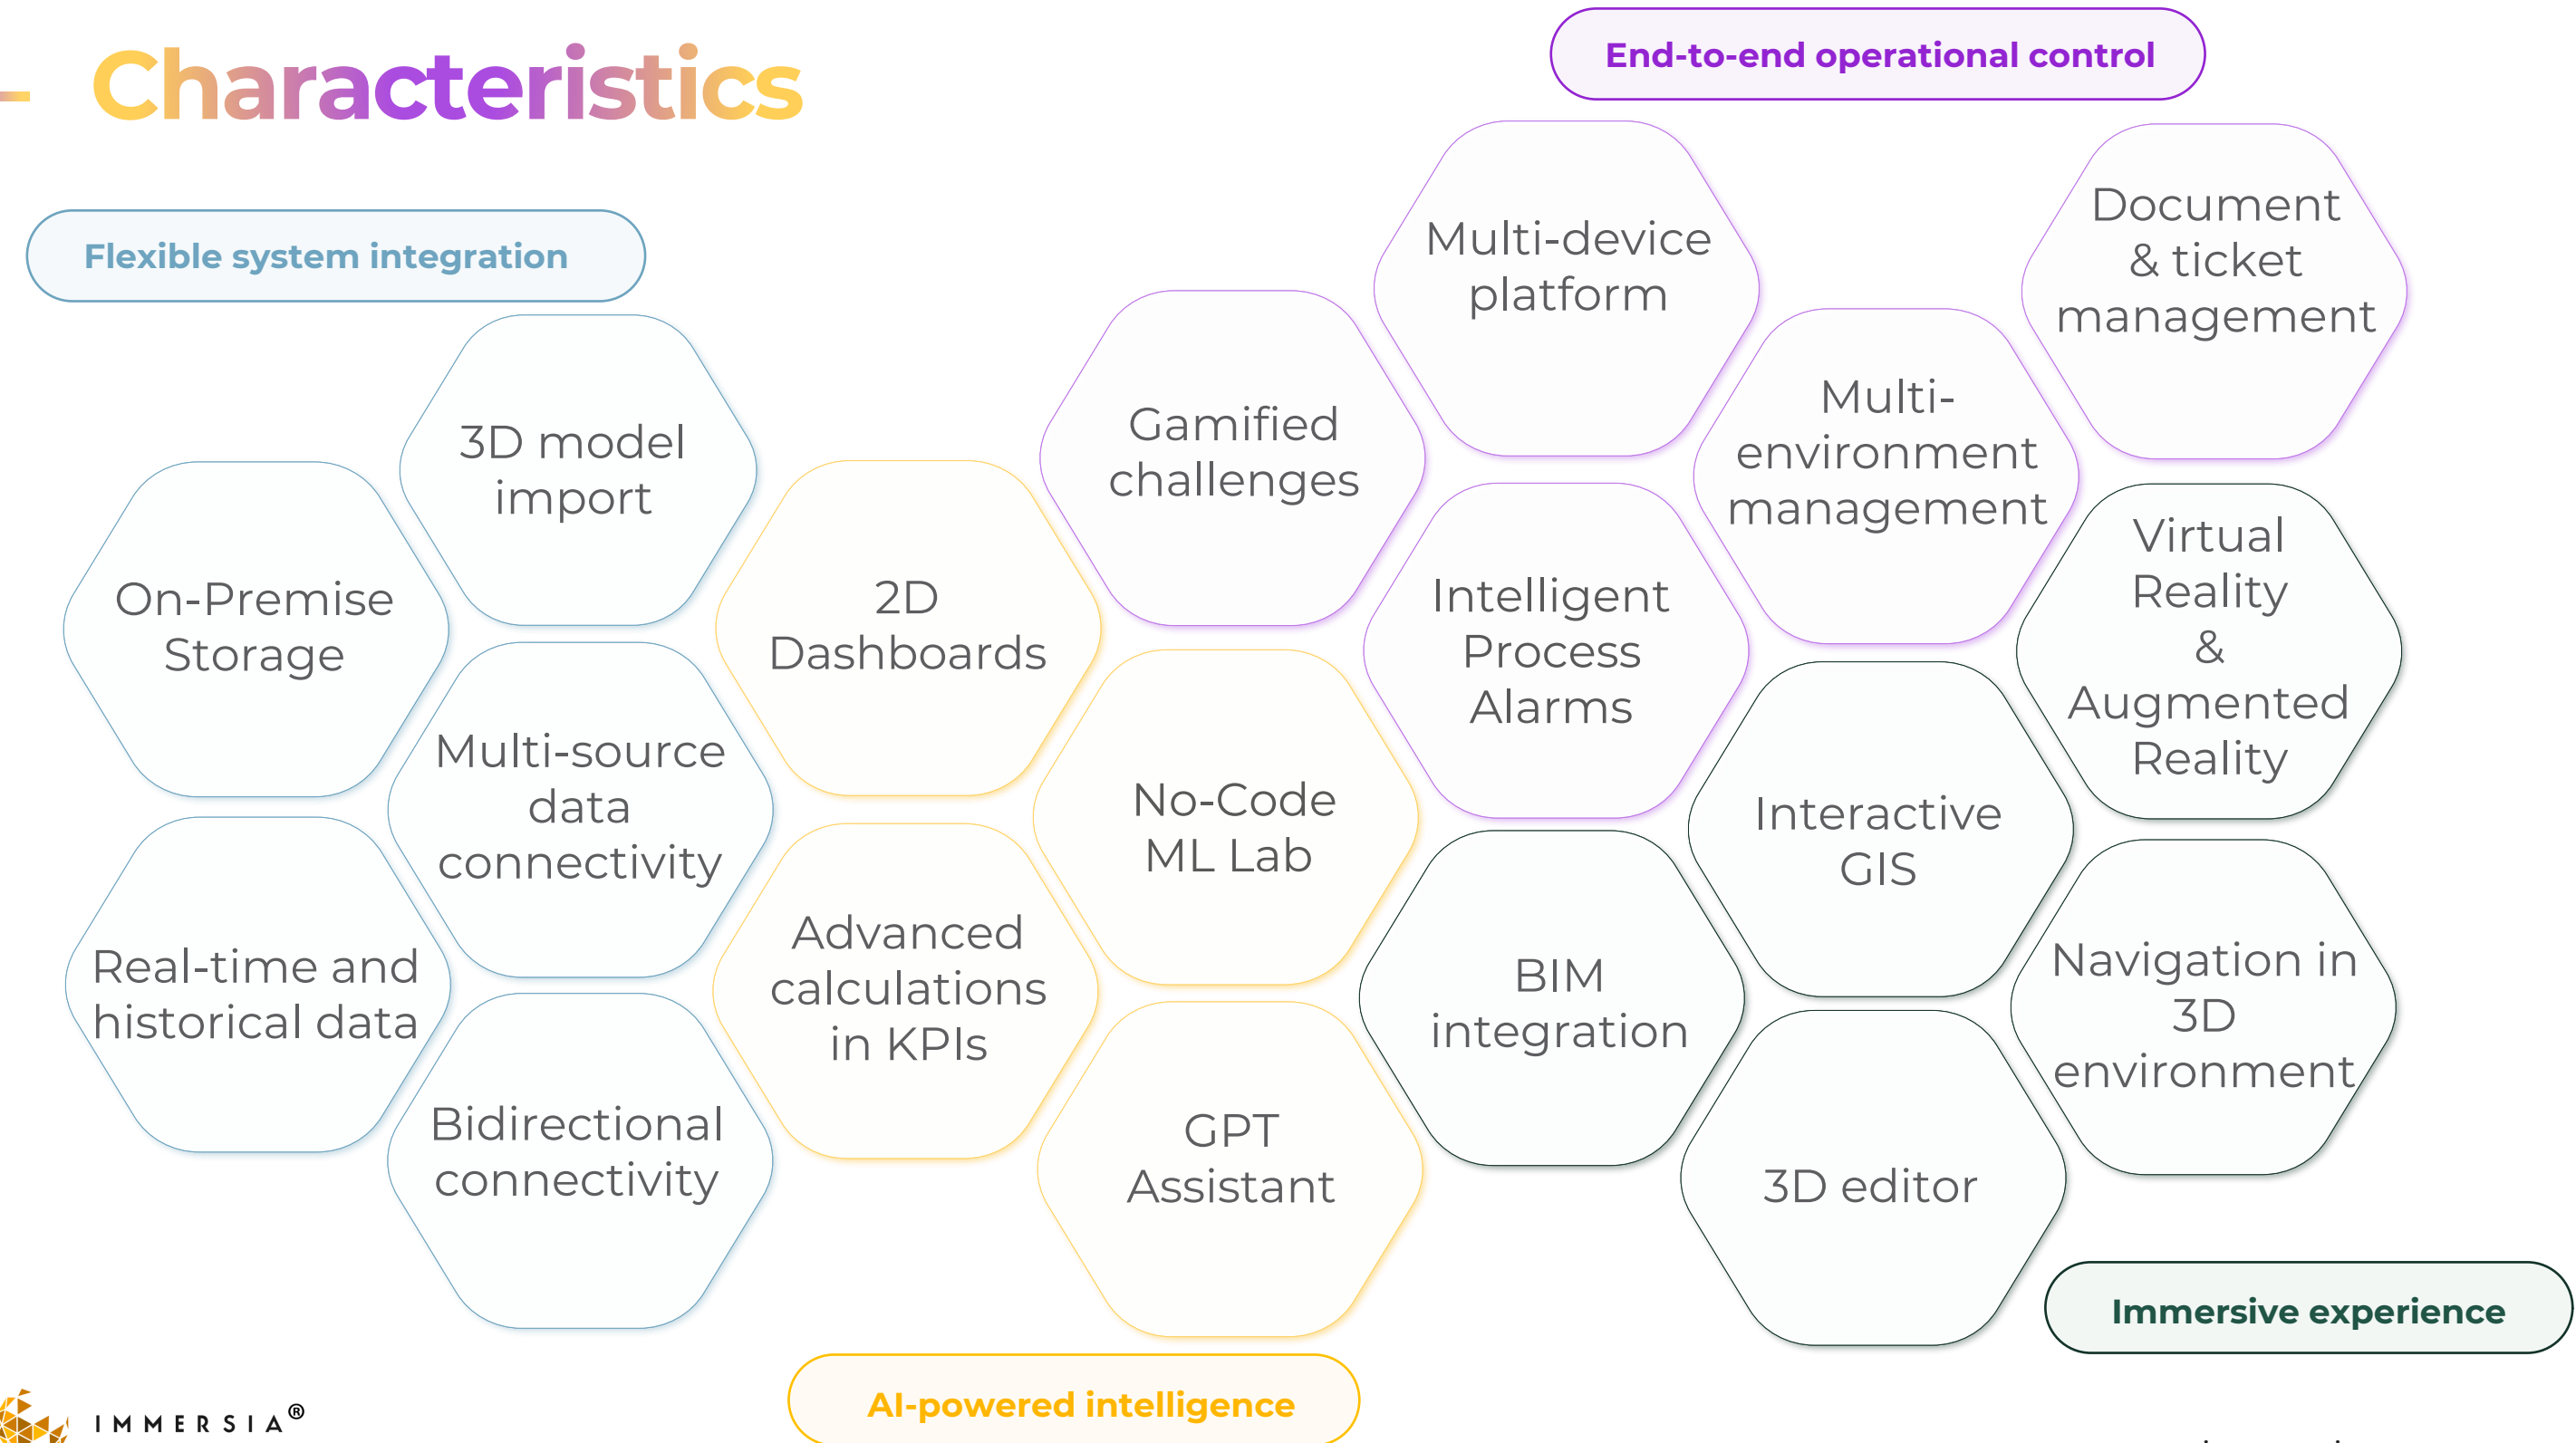

TOKII

TOKII 3D

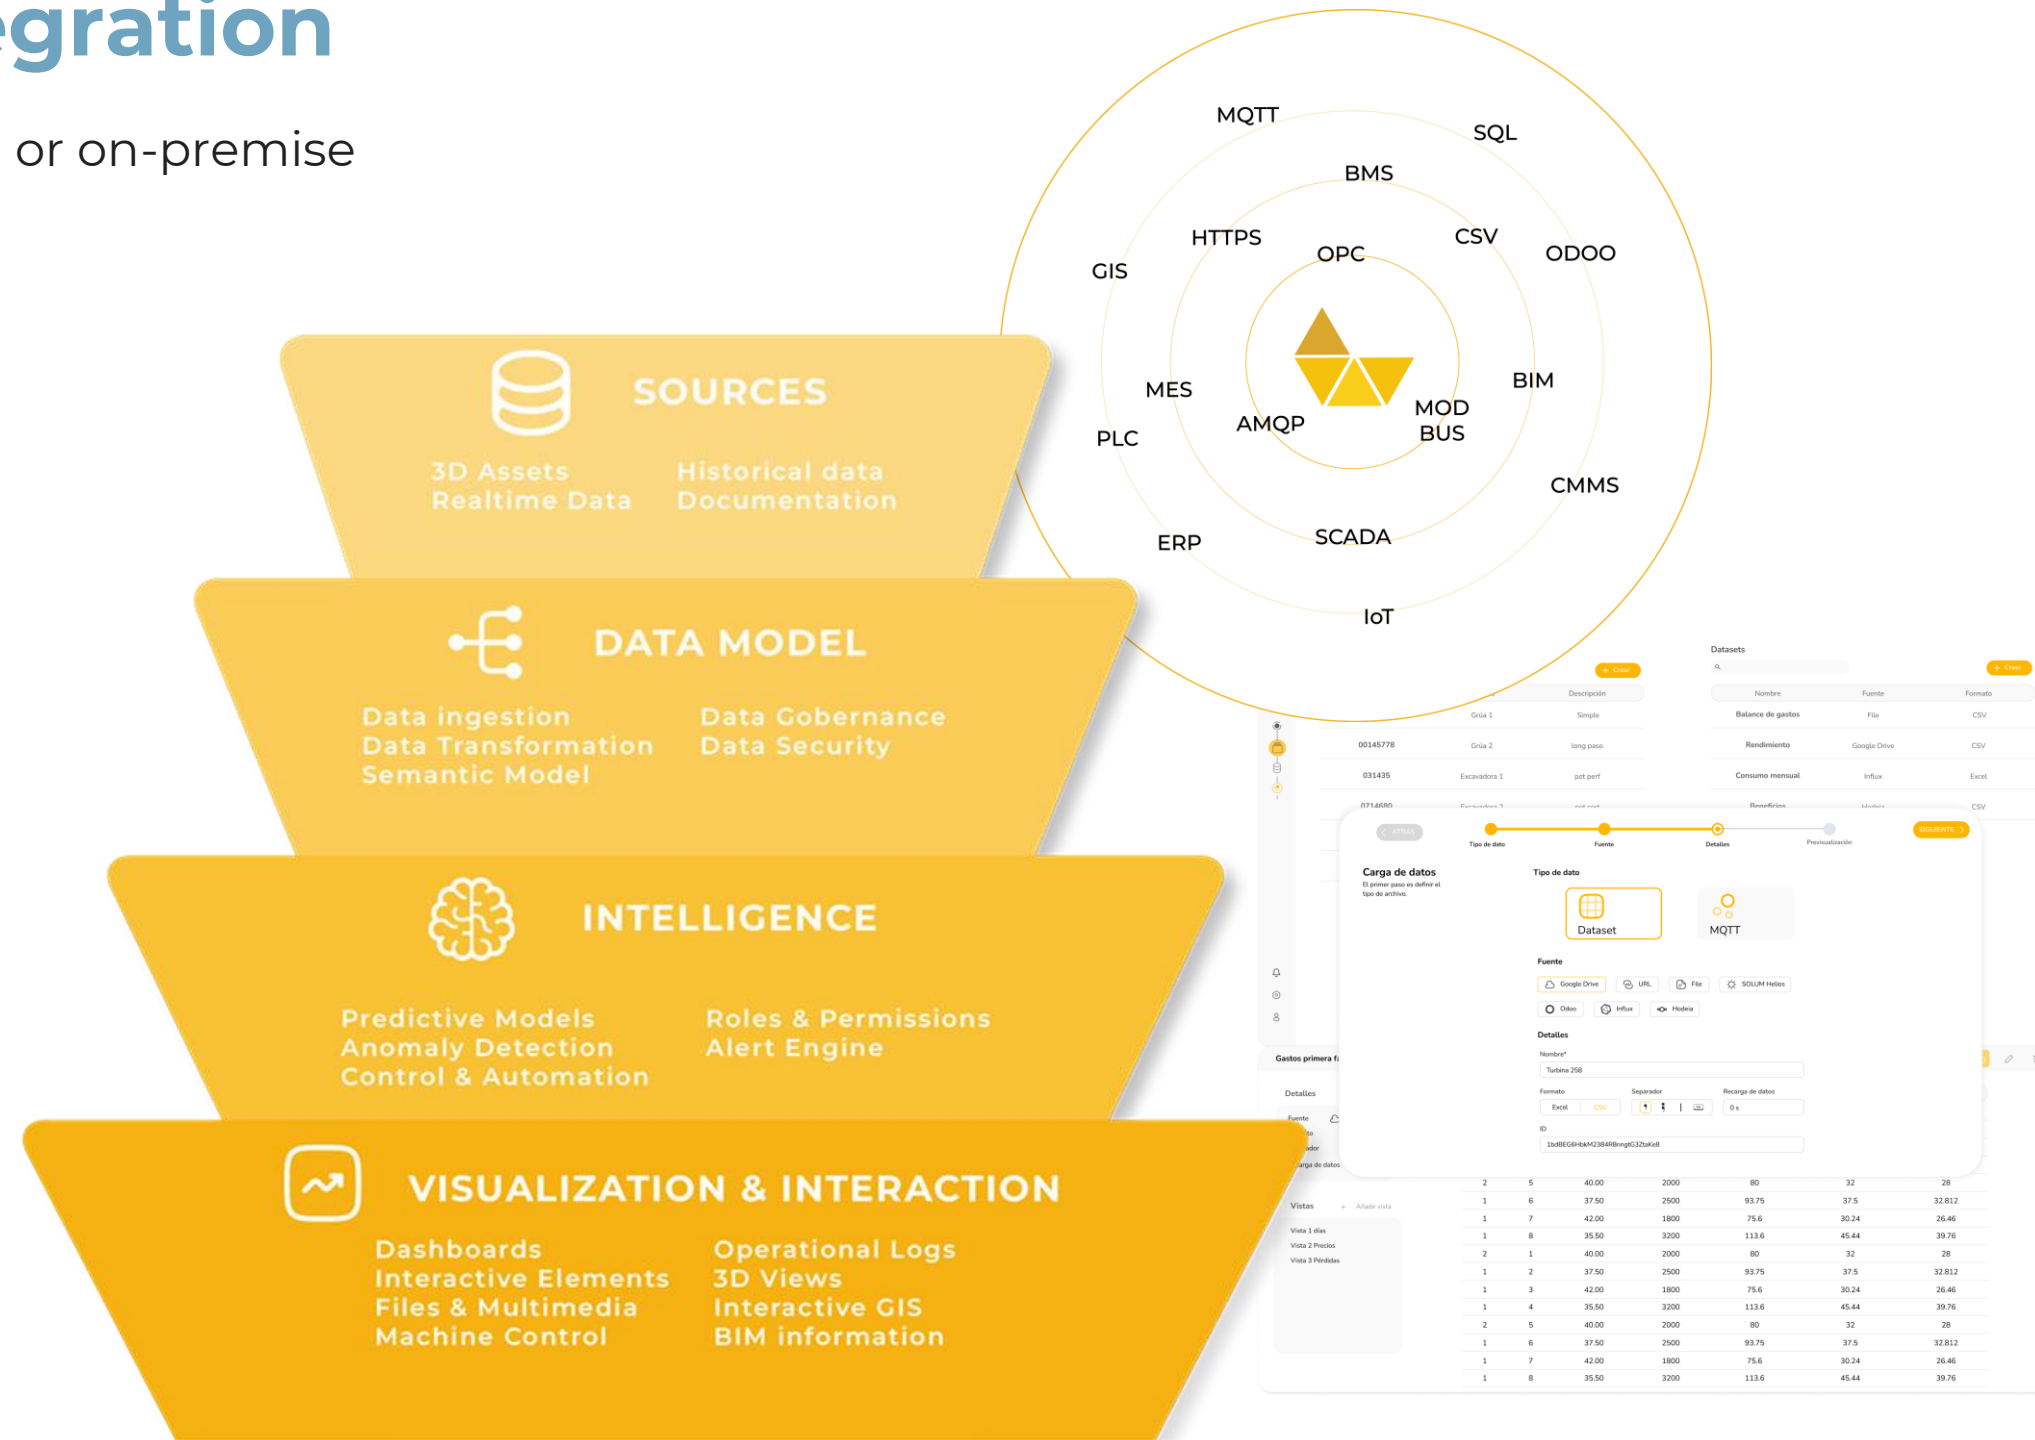

Characteristics

Flexible system integration

Unified data in real time, in the cloud or on-premise

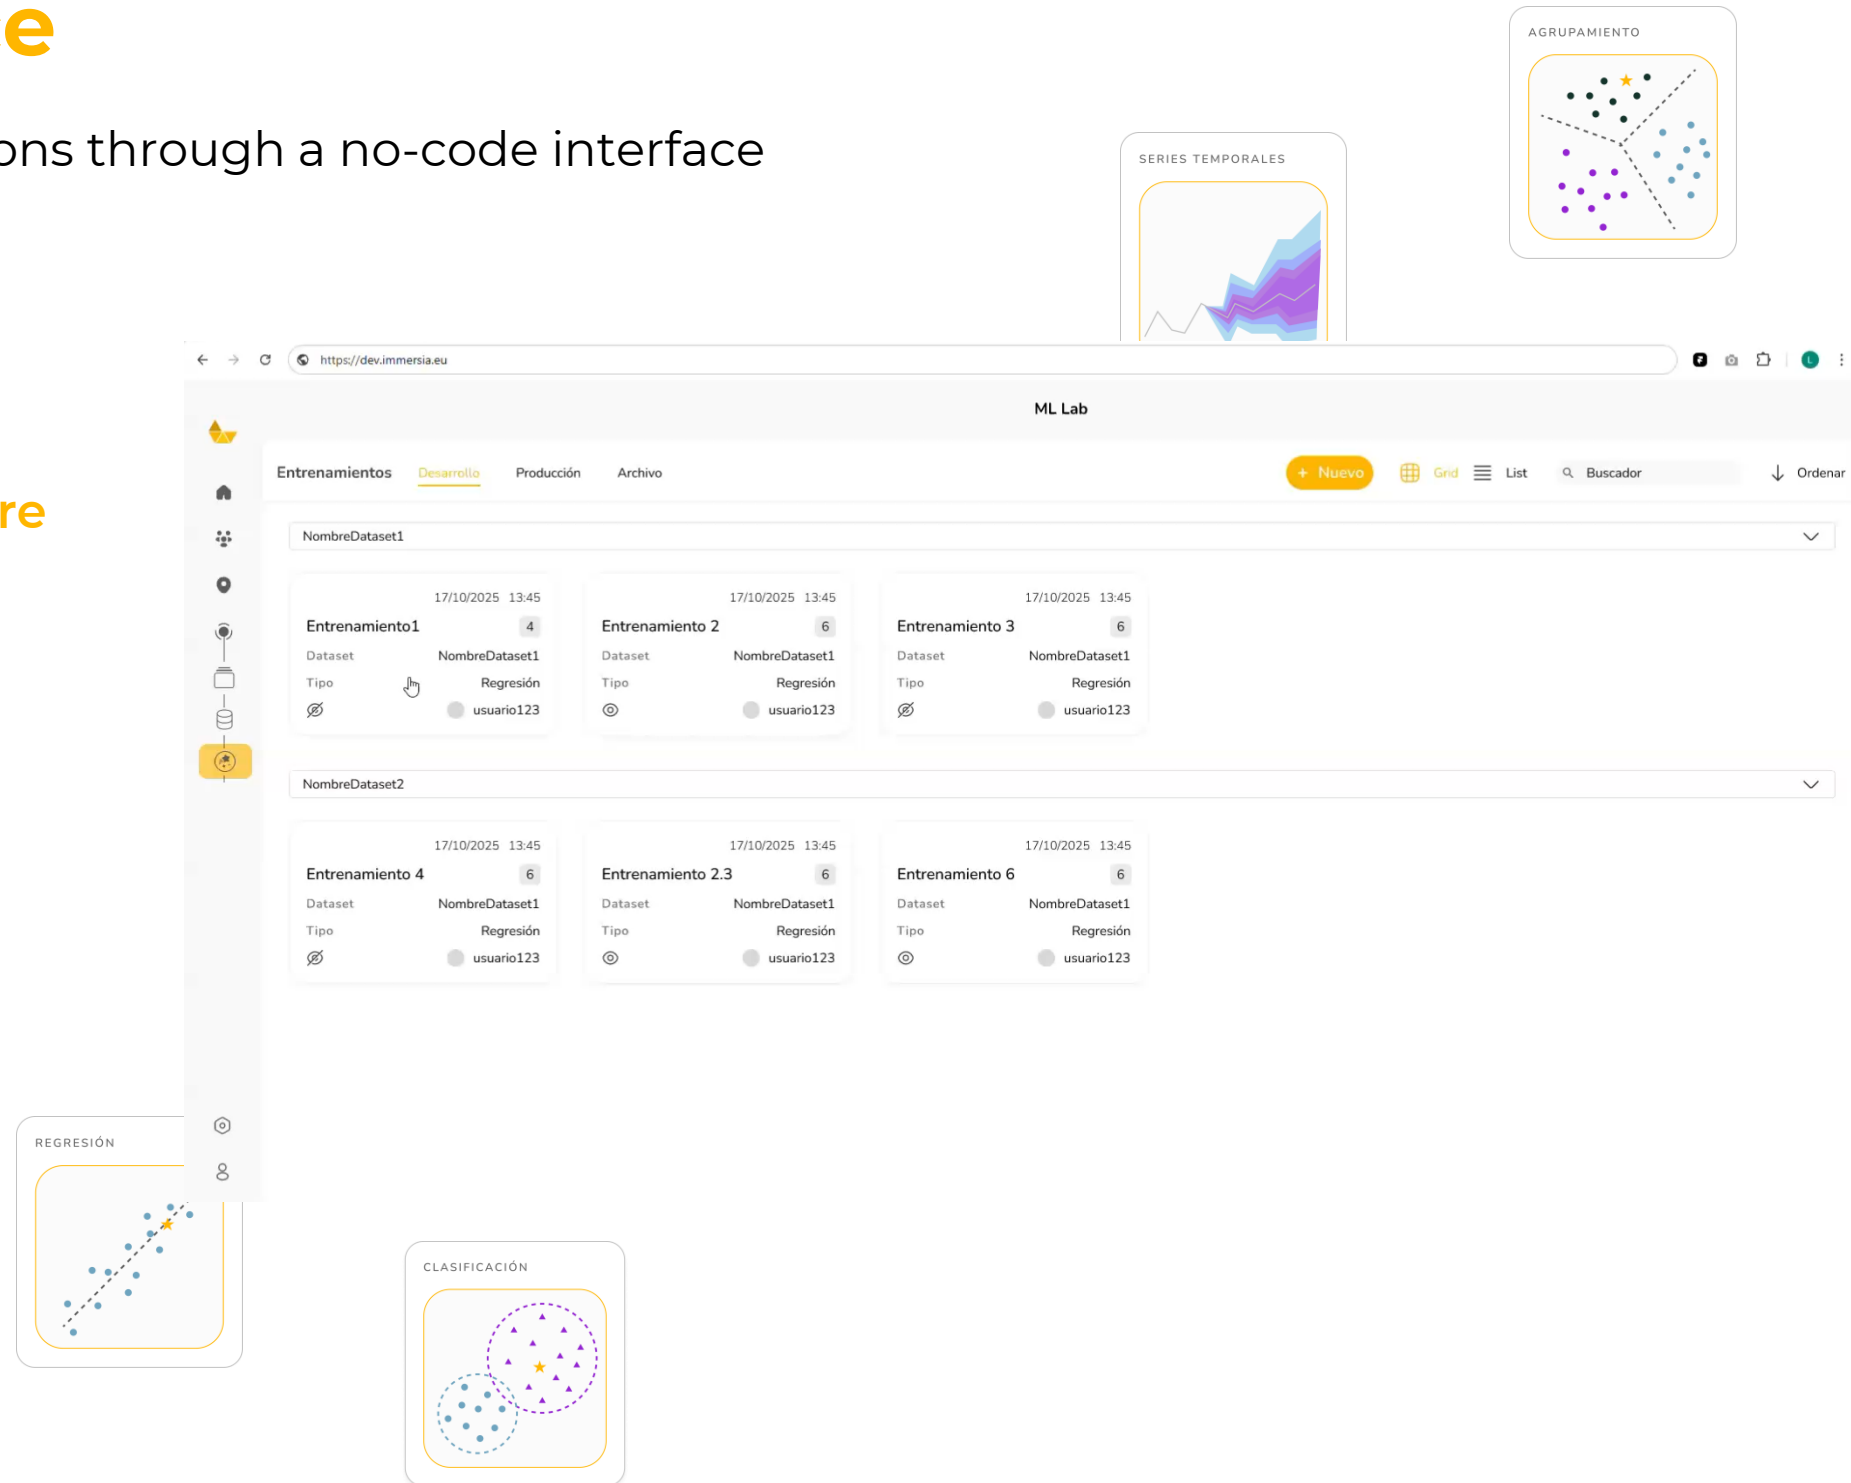

- Bidirectional connectivity
- 3D model import
- Drag & drop dashboards
- Multi-source connectivity
- Real-time and historical data

AI-powered intelligence

Predictive analytics and real-time simulations through a no-code interface

- A unified BI view: past, present and future
- Train ML models in a few clicks
- Or integrate your own algorithms
- Natural Language AI Assistant
- Advanced KPI calculations

No-Code ML Lab

Easily transform operational data into predictive models

The entire process, from start to finish, in a single environment: **preparation**, **analysis**, **modelling** and **exploitation**.

Automatic processing and analysis

- Data cleansing and validation.
- Dataset completion and structuring.
- Advanced transformations: grouping, aggregation, and more.

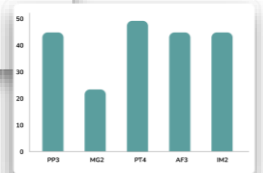

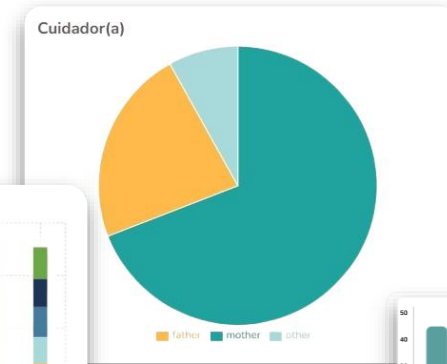

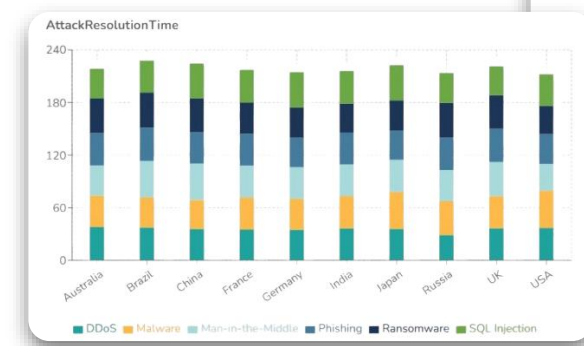

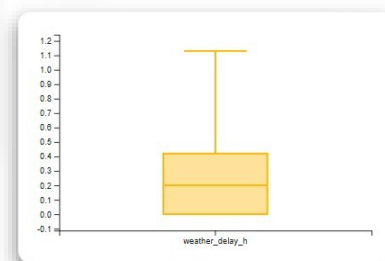

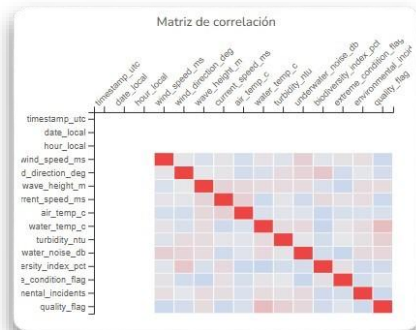

Advanced modeling and configurations

- Problem and algorithm selection.
- Performance metrics: accuracy, error, confusion matrices, etc.
- Model comparison.

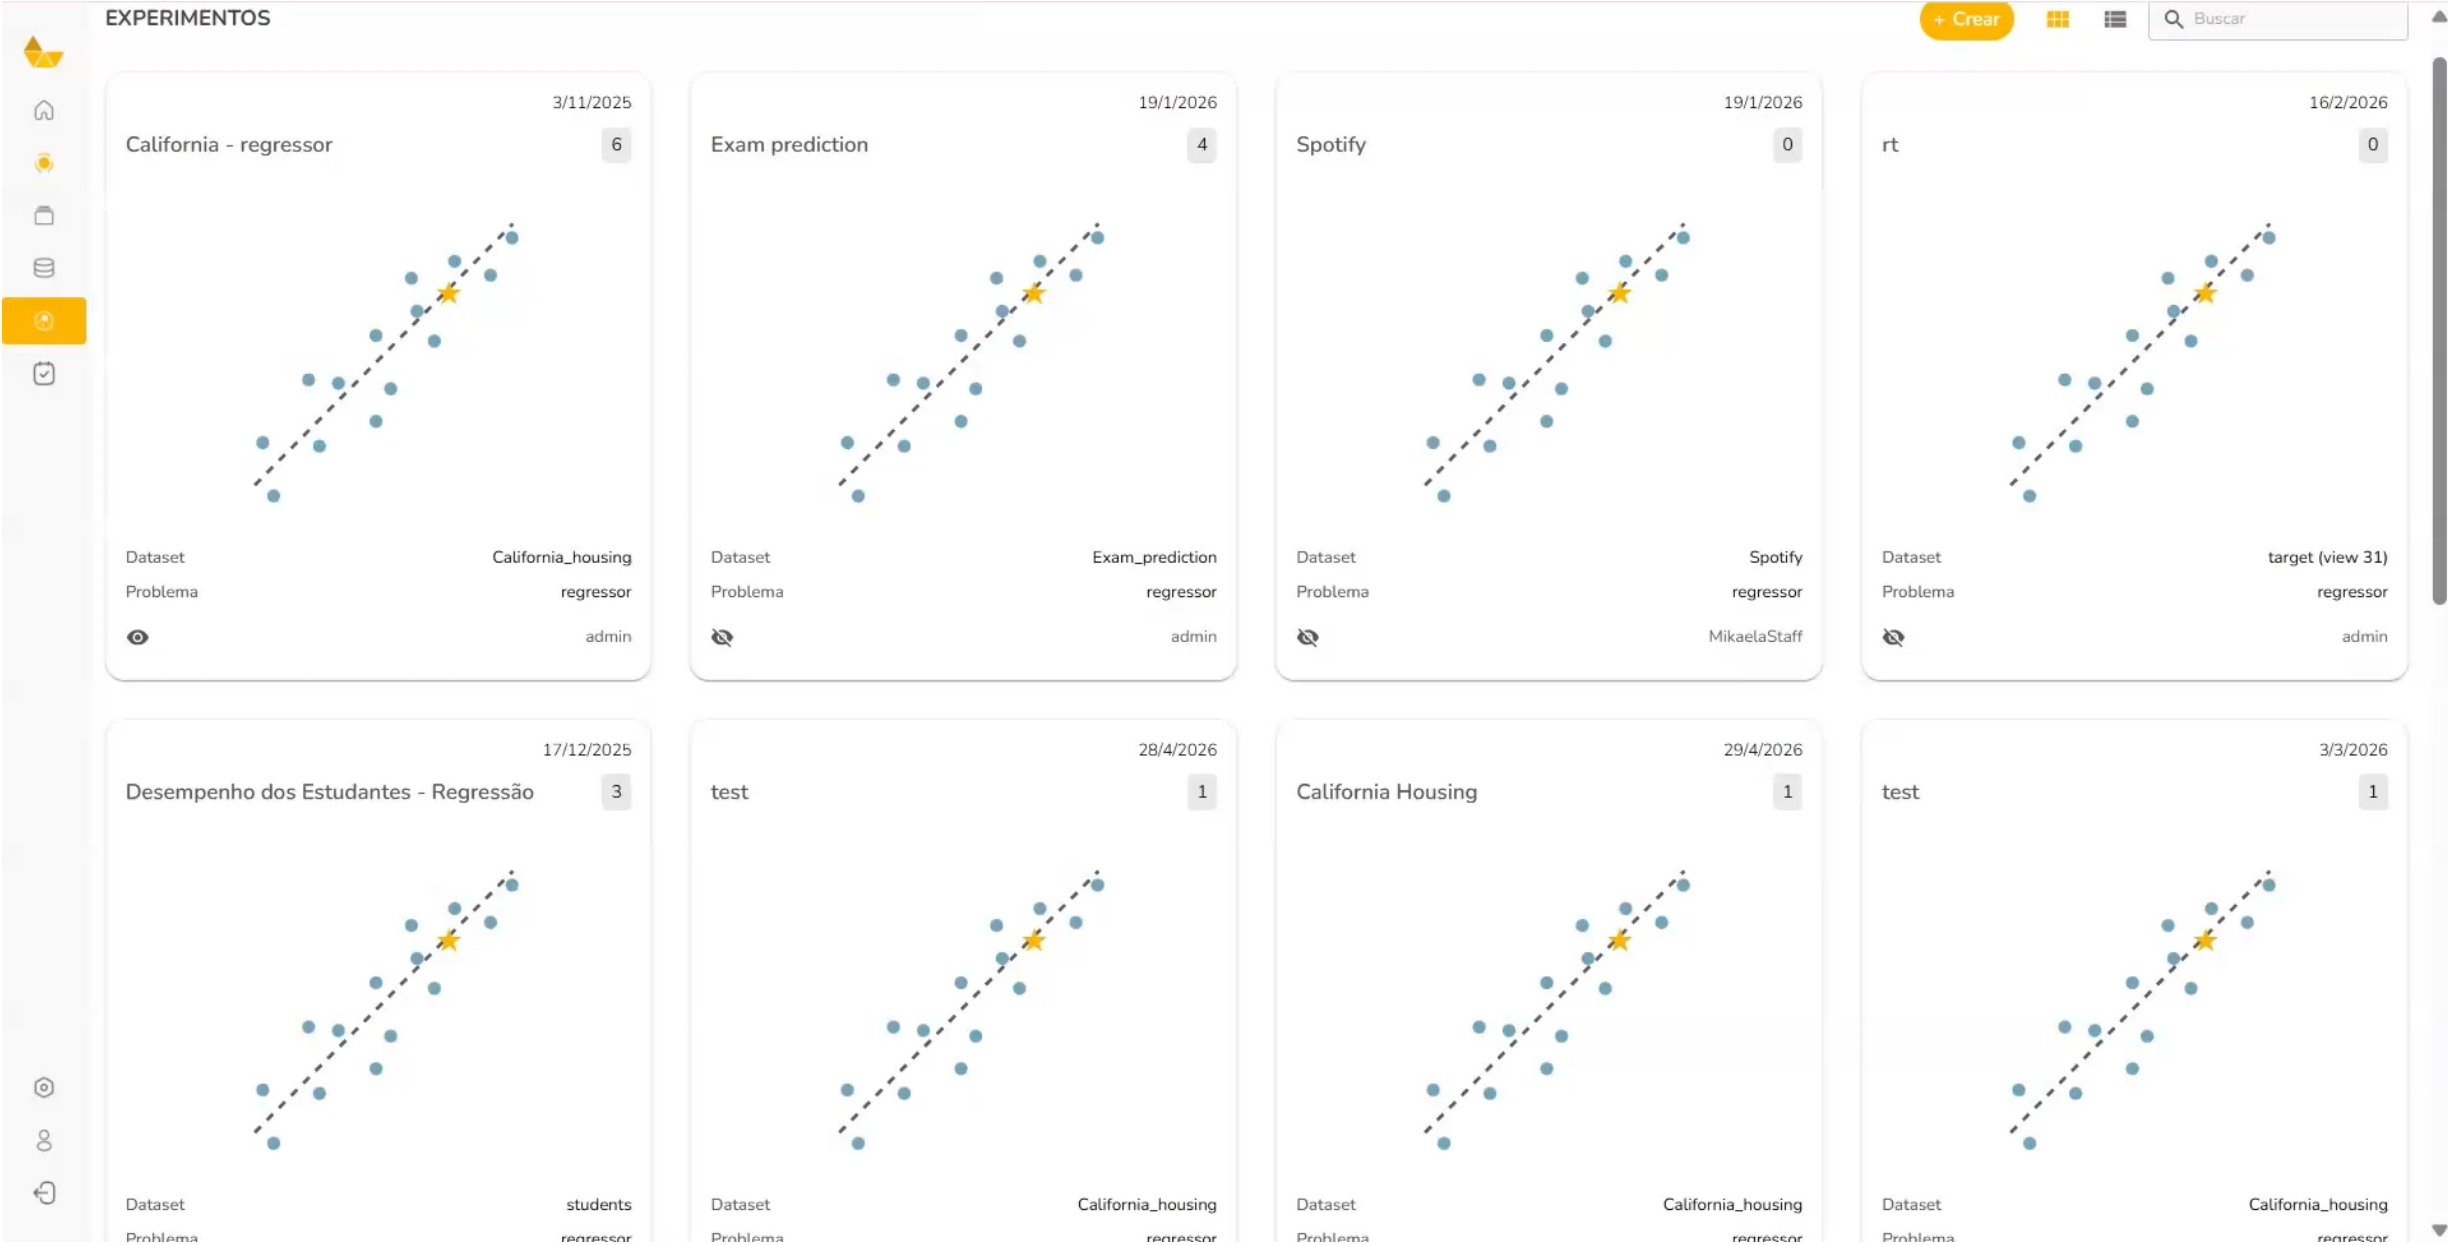

Advanced evaluation and statistics

- Visualization of distributions (histograms, boxplots, etc.)
- Relationships between variables.
- Redundancies and dependencies.

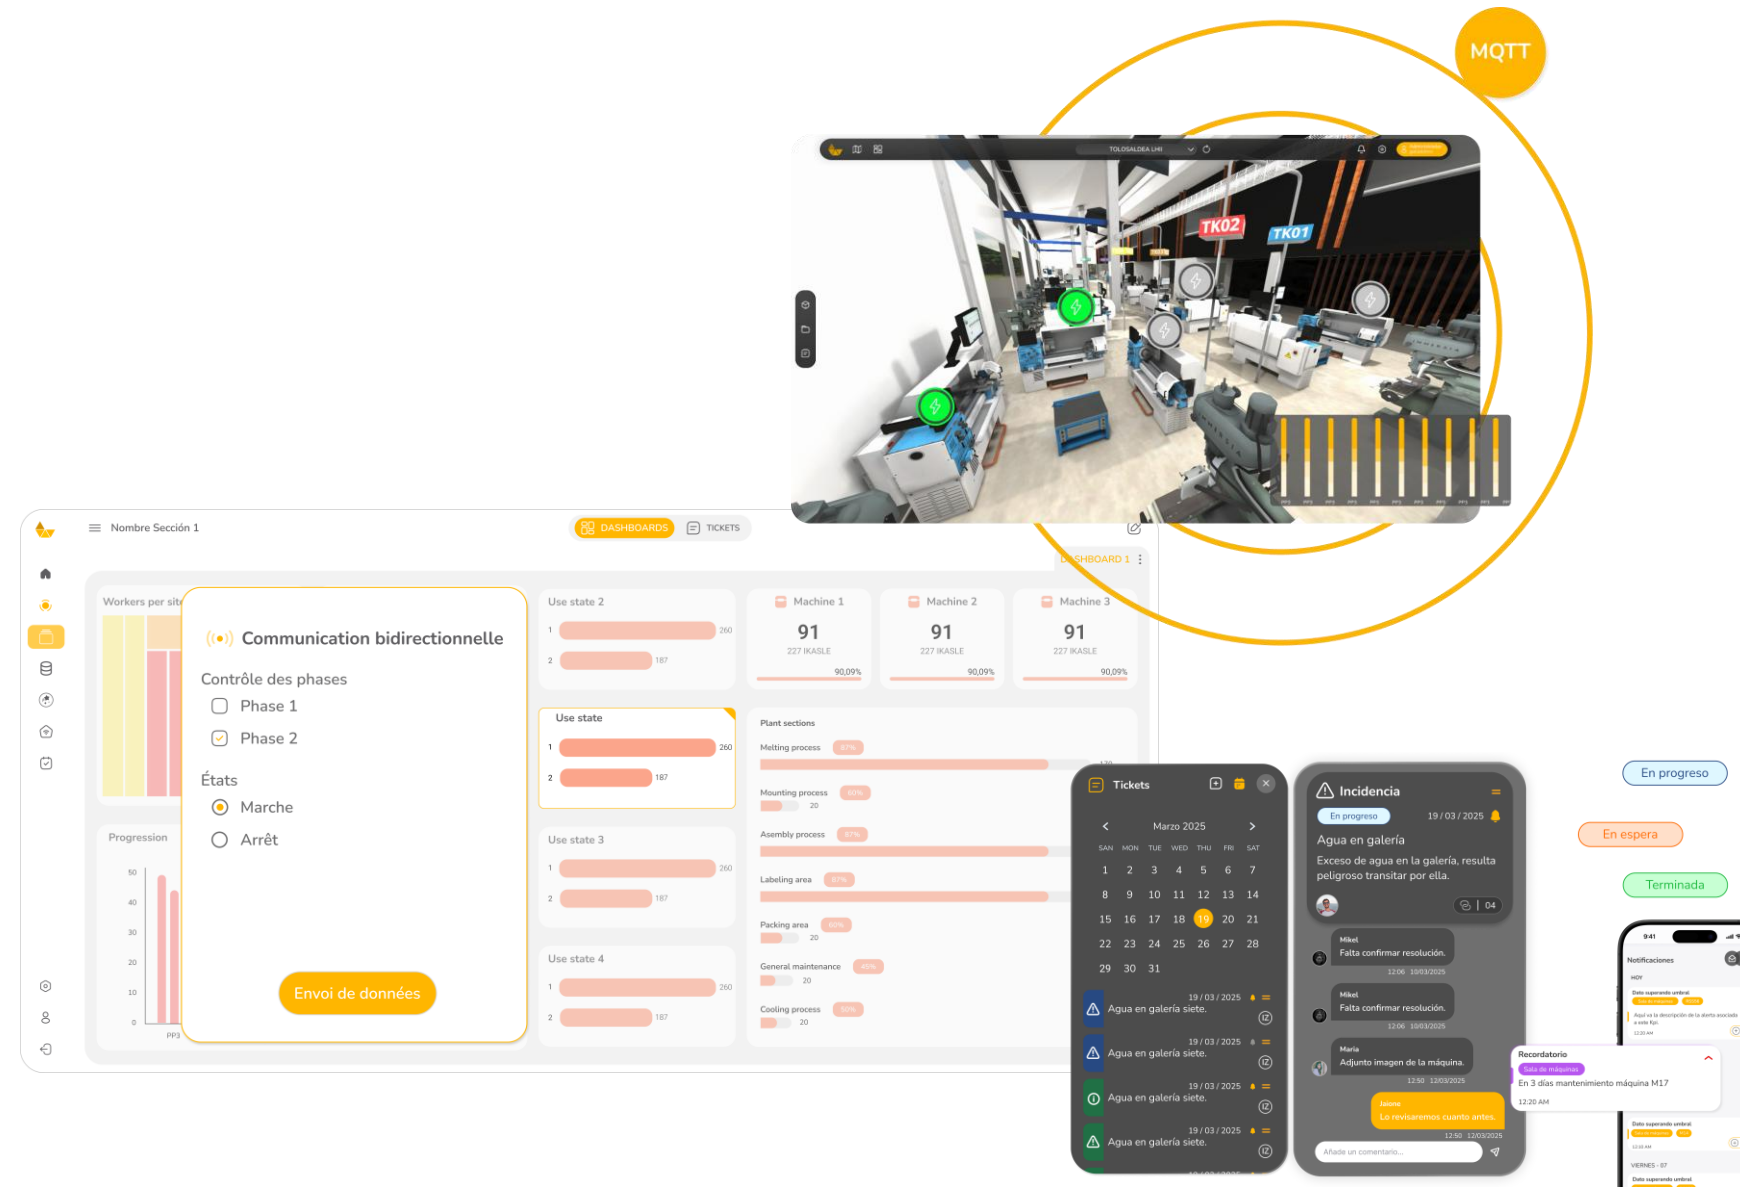

No-Code ML Lab

End-to-end operational control

Integrated asset monitoring and incident management for complex operations

- Alarms, tickets, and task tracking
- Collaborative document management
- Unified multi-environment view
- Integration with ERP, CMMS, and others

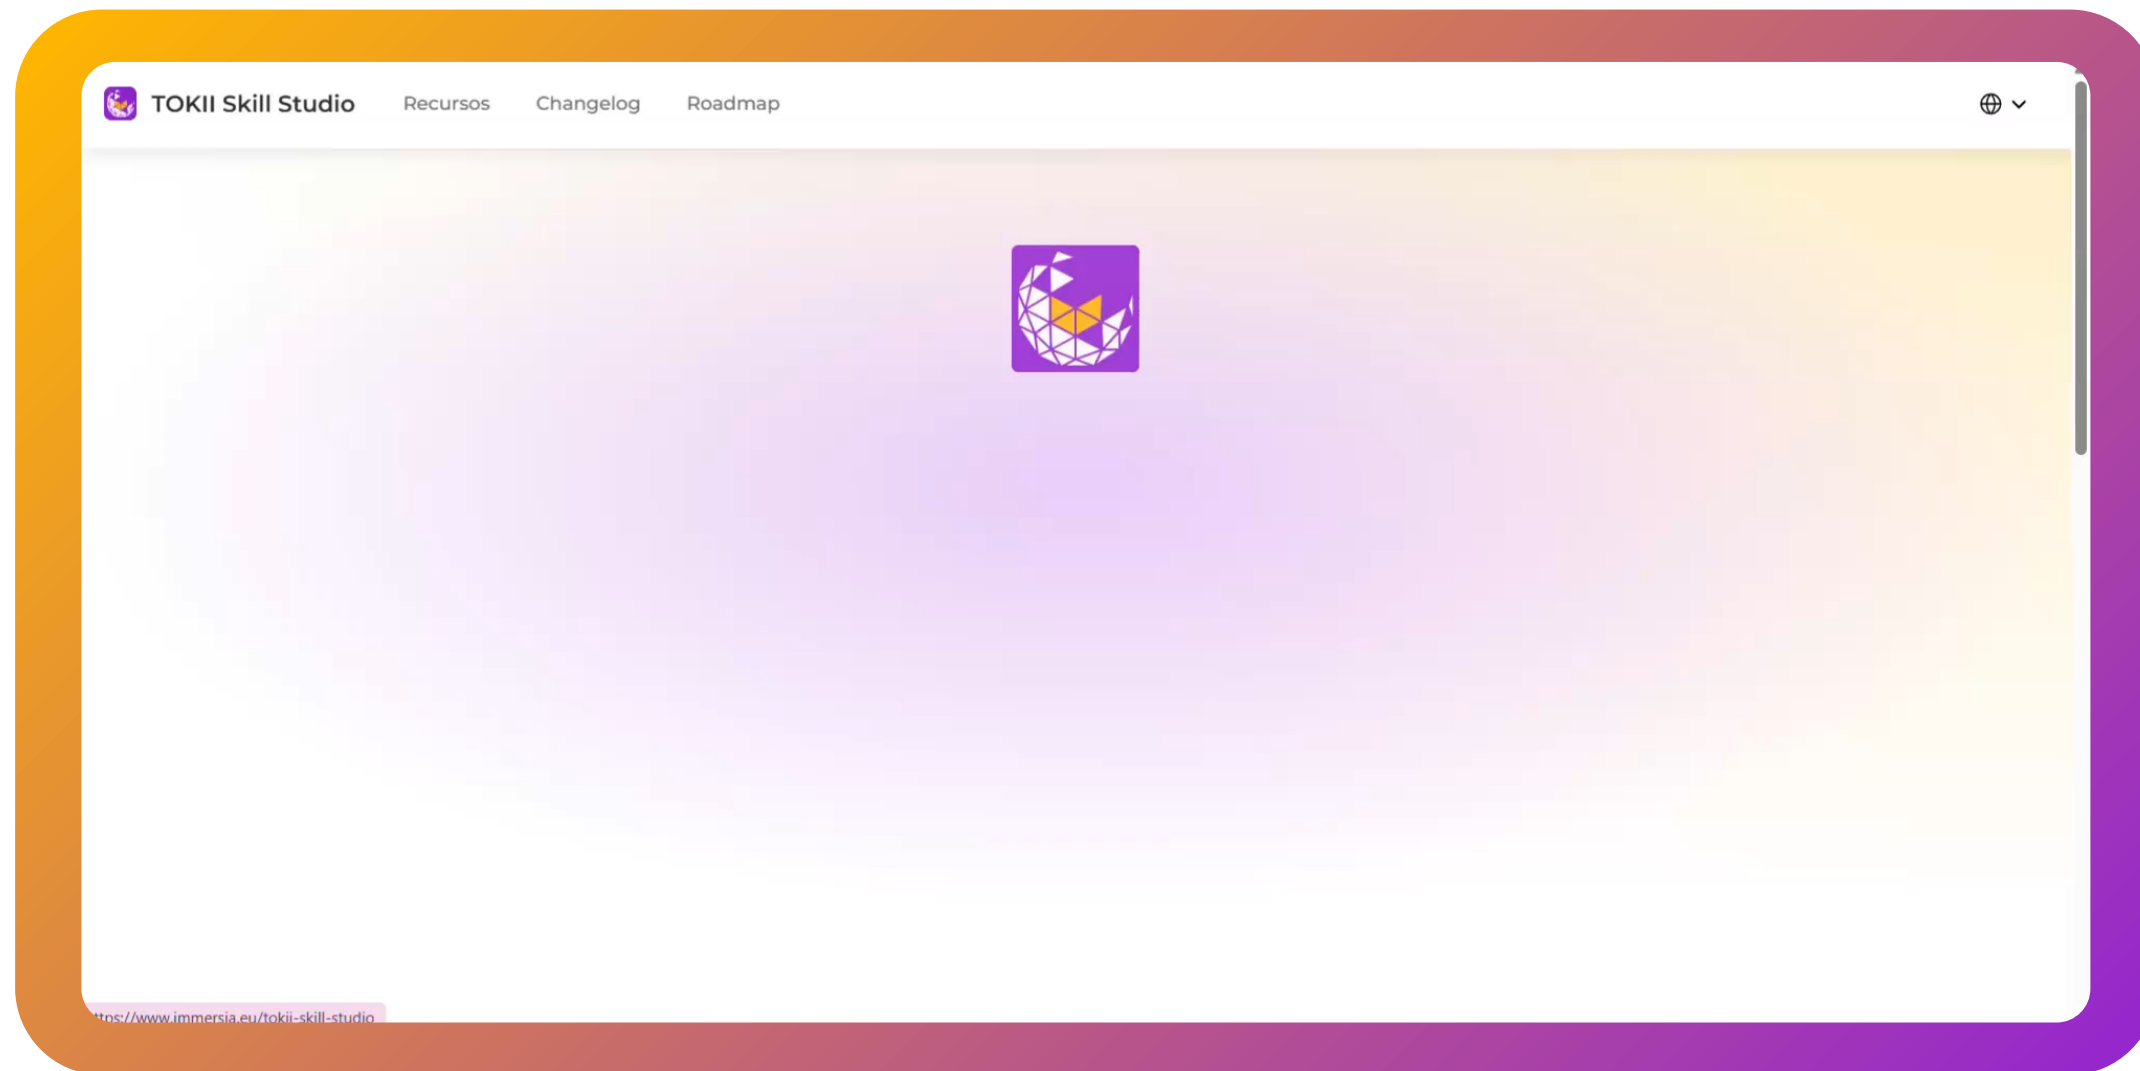

Immersive Experience

3D navigation and no-code editing in an advanced interactive visualization platform.

- BIM information layer
- Interactive GIS with Augmented Reality
- Customizable environment
- Virtual Reality Integration
- Intuitive environment navigation

TOKII Skill Studio

— Success stories.
