

ClimEdge Hub Limited

Driving Sustainable Change, Together.

Company Profile

ClimEdge Hub Limited is a Nigeria-based climate innovation and consulting firm dedicated to accelerating Africa's electric mobility revolution. We exist to transform how people and goods move across African cities and rural corridors, replacing polluting, costly internal combustion engine (ICE) vehicles with clean, affordable, and locally relevant electric mobility solutions.

Our name... **ClimEdge** captures our mission: where Climate meets the Edge of innovation. We operate at the forefront of sustainable transport, designing and deploying integrated electric mobility ecosystems that reduce emissions, create green jobs, enhance energy access, and build resilient urban, peri-urban and rural economies.

Our Vision

To be Africa's leading electric mobility catalyst and think-tank, empowering communities, businesses, and governments to transition rapidly and inclusively to zero-emission transport.

Our Mission

ClimEdge Hub Limited advances a just and inclusive electric mobility transition across Africa by delivering end-to-end advisory, infrastructure, and innovation services. We design, test, and scale electric 2- and 3-wheeler ecosystems from policy and financing to swapping infrastructure, battery circularity, and rider enablement ensuring mobility is clean, affordable, and accessible for all.

Our Core Values

Sustainability

We embed circular economy principles—from battery reuse to local assembly—to ensure long-term viability.

Inclusivity

We ensure women, youth, gig workers, and informal transport operators lead and benefit from the transition.

Impact

We measure success by kilometers electrified, emissions avoided, jobs created, and lives improved.

Collaboration

We co-create with riders, OEMs, governments, financiers, and communities to maximize impact.

Innovation

We pioneer context-specific, tech-enabled mobility solutions grounded in data and user needs.

Integrity

We uphold transparency and accountability in every electric mobility project we lead.

Our Services

At ClimEdge Hub, electric mobility is not just a service, it is our singular strategic priority.

Every offering we provide is designed to accelerate its adoption, scalability, and sustainability across Nigeria and Africa.

Electric Mobility Strategy & Ecosystem Design

We help governments and private sector clients develop national and city-level electric mobility roadmaps, including:

- Regulatory and incentive frameworks (e.g., tax breaks, import waivers, low-emission zones)
- Fleet electrification strategies for logistics, ride-hailing, and public transport
- Gender-inclusive rider onboarding and financing models.

Battery Swapping & Charging Infrastructure Deployment

Recognizing grid limitations, we specialize in off-grid and hybrid-powered battery swap stations that ensure high uptime and low operating costs. Our services include:

- Site feasibility and energy integration (solar + storage + smart grid)
- Standardized station design for rapid replication
- Operations and maintenance protocols for safety and reliability

Battery Circularity & Second-Life Innovation

To address cost and waste concerns, we design closed-loop battery value chains, including:

- End-of-life battery collection, testing, and repurposing for stationary storage
- Partnerships with recyclers and local assemblers
- Policy support for Extended Producer Responsibility (EPR) schemes

Market Intelligence & Investment Readiness

- We generate investor-grade insights to de-risk e-mobility deployment:
Demand mapping for last-mile delivery corridors
- Total Cost of Ownership (TCO) modelling for riders and fleets
- Feasibility studies and bankable project documentation for DFIs and impact investors

Capacity Building & Rider Enablement

- We empower the human backbone of e-mobility:
- Technical training for EV technicians and swap station attendants
 - Financial literacy and digital platform training for gig riders
 - Safety, maintenance, and customer service certification programs

Innovation Incubation for African E-Mobility Startups

- Through our E-Mobility Innovation Lab, we:
- Mentor early-stage startups building locally adapted EVs, batteries, or software
 - Connect founders to pilot opportunities, OEMs, and climate tech investors
 - Support business model refinement and investment readiness

Our Services

Why Partner with ClimEdge Hub?

Africa-First Expertise: Deep understanding of informal transport, fuel economics, and urban dynamics.

End-to-End Capability: From policy to pilot to scale—under one roof.

Proven Collaboration Model: We work with OEMs, DFIs, state governments, and rider cooperatives.

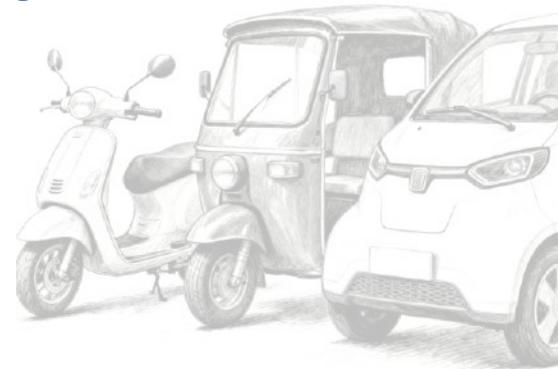

Impact-Oriented: Every project is designed for measurable emissions reduction, job creation, and gender inclusion.

Address: FCT, Abuja, Nigeria

At **ClimEdge Hub**, we believe the future of climate action lies at the intersection of innovation, collaboration, and bold leadership. Our name represents this conviction: Climate meets the Edge — the point where ideas become solutions, and sustainability transforms into opportunity.

Our logo captures this essence.

The circular motion reflects interconnected systems — from ecosystems to economies — reminding us that everything we do has ripple effects across communities and the planet.

The gradient of green and blue represents harmony between nature and technology, while the bold lightning bolt signifies the spark of innovation powering clean energy, sustainable mobility, and resilient agriculture.
