

Who we are

The PAEC Hub connects exercise oncology, patient advocacy, health policy and implementation expertise to make evidence-based exercise a standard part of cancer care.

What we are working on

We are building an implementation infrastructure that identifies, compares and transfers best-practice exercise models across healthcare systems, considering feasibility, cost and sustainability.

What's the one thing we need next

We need clinical, research, patient, policy and funding partners to validate, pilot and scale the PAEC Hub across different healthcare systems.

**5 years Mission Cancer:
Stronger Through Connection**
