

Improved well-being
for residents.

Less stress for
care giver.

Limited time:

Affordable or free trial thanks to
public funding where available

Advantages for your Residents

Empathetic Conversations

- Natural, empathetic dialogues
- Patient, repeated explanations and attentive listening
- Friendly companion, freely selectable

Togetherness & Social Bonds

- Encourages new social connections – even beyond the facility
- Experience social appreciation from real people
- Strengthens the sense of community

Safety & Orientation

- Reminders for medications, appointments, and routines
- Notifies if conversation is interrupted or help is requested
- Supports daily organization

Engagement & Entertainment

- Memory exercises, stories, quizzes, and games
- Daily-structuring conversations and motivating prompts
- Customizable content tailored to the individual

Motivation & Mobility

- Short, simple exercise instructions
- Promotes physical well-being
- Supports adherence to therapeutic programs

Benefits for Care & Support Facilities

Reduced Staffing Costs

Lower staffing needs via the digital companion that can

- handle explanation and listening tasks on behalf of staff
- be used for staff training and information

Relieves Staff Workload

- Residents communicate with the digital companion
- Explanations are patiently repeated
- Mindful listening to repeated stories with empathetic responses

Higher Medication Adherence - Lower Effort

- Reduces hospital transfers for residents
- Medication reminders via the app instead of staff

Insight Tool

Analytics can be used for:

- Family caregiving support
- Targeted resident engagement
- Tracking health development

Reduces Care and Support Effort

The digital companion

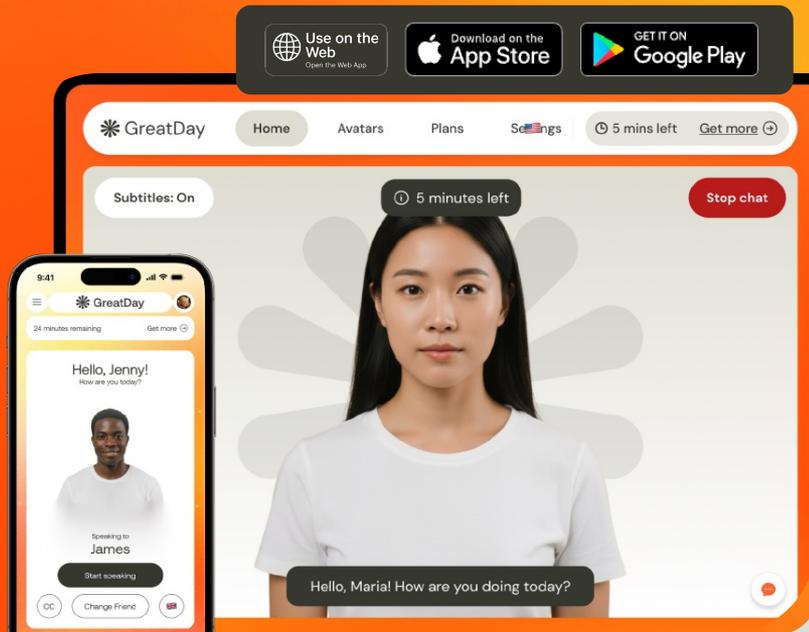

- Provides short, simple exercise instructions
- Promotes physical well-being
- Supports adherence to therapeutic programs
