OT-secure®

FULLY AUTOMATED

OT SECURITY ASSESSMENTS

INSTANT INSIGHT

NO CONSULTANTS NEEDED

OUR GOALS

Gain immediate insight into OT vulnerabilities as a manufacturing company, industrial organization, multi-site enterprise, or IT & OT team. With our automated assessments, you can identify risks per location, receive targeted recommendations, and achieve compliance faster.

ACT INSTEAD OF REACT

The world is full of hidden threats that evolve rapidly. Standing still is not an option. At OT-Secure, we know that proactive action and protection make the difference between success and failure.

Our platform is built to empower manufacturing companies, industrial organizations, and multi-site enterprises to take immediate action. With a clear assessment of the OT environment and action-oriented recommendations, you put your site(s) one step ahead. Proactive action is no longer optional – it's the standard. Together, we build a future where security is always a priority.

Insight, control and compliance for manufacturers, industrial companies and IT/OT teams

The production environment is changing rapidly—and with it, new risks emerge. We help you safeguard operational continuity and meet increasingly strict compliance requirements—without manual audits or expensive consultants.

Our fully automated platform performs an in-depth OT Security Assessment, tailored specifically to industrial environments. You get immediate insight into vulnerabilities, a clear OT Security Score, and actionable recommendations. Ideal for both single-site factories and multi-site organizations.

- **For manufacturing and industrial companies: Focus on continuity and safety.**

- **For multi-site organizations: Compare security levels across locations.**

- **For IT & OT teams: Reduce cyber risks with minimal effort.**
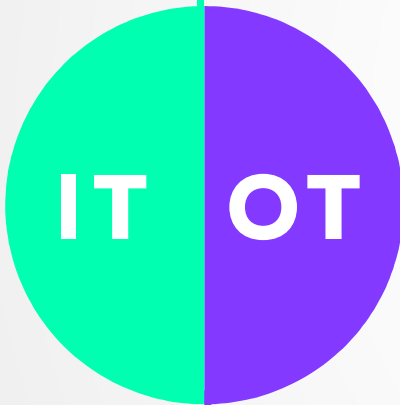

ASSESS WITHOUT STRESS

We believe the best solutions don't just work — they're easy to apply. Our automated assessment requires no deep specialist knowledge and is broadly applicable, regardless of complexity. The result?
A blueprint of your OT environment with clear, actionable insights that you can immediately turn into measures to strengthen your clients' security.

Our approach brings tomorrow's technology within reach today. While we continuously optimize our platform, you — as the person responsible for multiple locations — take the next step: clear, efficient, and with lasting impact.

Focused on data security & Business processes.

**IT OT**

Controls physical processes and infrastructure

THE GAP BETWEEN IT & OT

Unique Challenges of OT:
- Legacy systems without built-in security.
- Not easily patchable due to continuity requirements.
- Physical impact: Cyberattacks can cause production loss and damage.

Why OT-Specific Security

OT requires specialized tools and expertise to manage both physical and digital risks.

GUIDED BY INSIGHTS

Insight without action is like a map without a compass. At OT-Secure, we believe real change begins when insight leads to action. Our assessments go beyond evaluation; they provide a complete picture of OT security maturity — with clear steps to resolve security issues.

Our experience is your advantage. OT-Secure doesn't just deliver a stand-alone analysis, but a concrete action plan for all your sites — clear, practical, and results-driven.
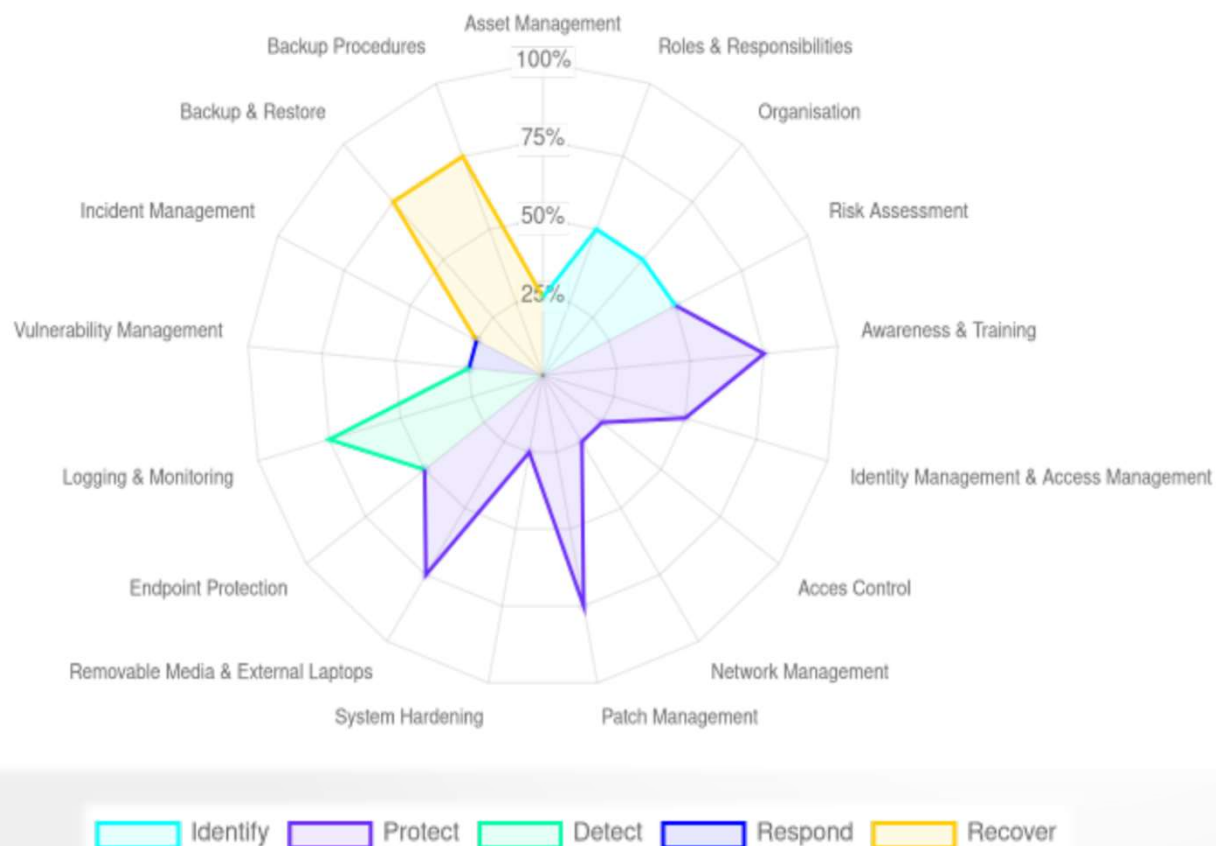

THE URGENCY OF IT/OT MATURITY ASSESSMENTS

Unsure about the state of your OT security across all your sites? You are aware of the risks if it's not properly managed. OT-Secure offers more than just insight — we help you think through concrete solutions and the costs involved. So, you can quickly regain control, without getting stuck in long and expensive processes.

Benefits we offer:

- Specialized knowledge and experience.
- No time-consuming manual.
- Transparent pricing across all packages.
- Clear reports with action-oriented recommendations.
- Compliant with NIST 800-53 and IEC 62443.

ASSESS WITHOUT STRESS

HOW...

The results of the IT/OT Maturity Assessment are presented in **5** categories.

Divided into **4** maturity levels.

The advisory report provides insight and an overview across **17** subcategories, with specific outcomes based on technical and/or management activities.

For each subcategory, targeted improvement points are identified where there is room for progress.

SECURE
YOUR
BRAND

Your organization stands for reliability — and OT-Secure helps you deliver on that promise. Our platform provides every site with the security and assurance it needs. The assessment is designed to seamlessly align with your brand and scale across multiple locations.

By investing in the right security technology today, you not only protect operational continuity but also strengthen your reputation and growth potential. OT-Secure helps you keep every location one step ahead in OT security.
