

**The full-service solutions provider for transport, handling and storage of subsea cables. Worldwide.**

# We are WIND

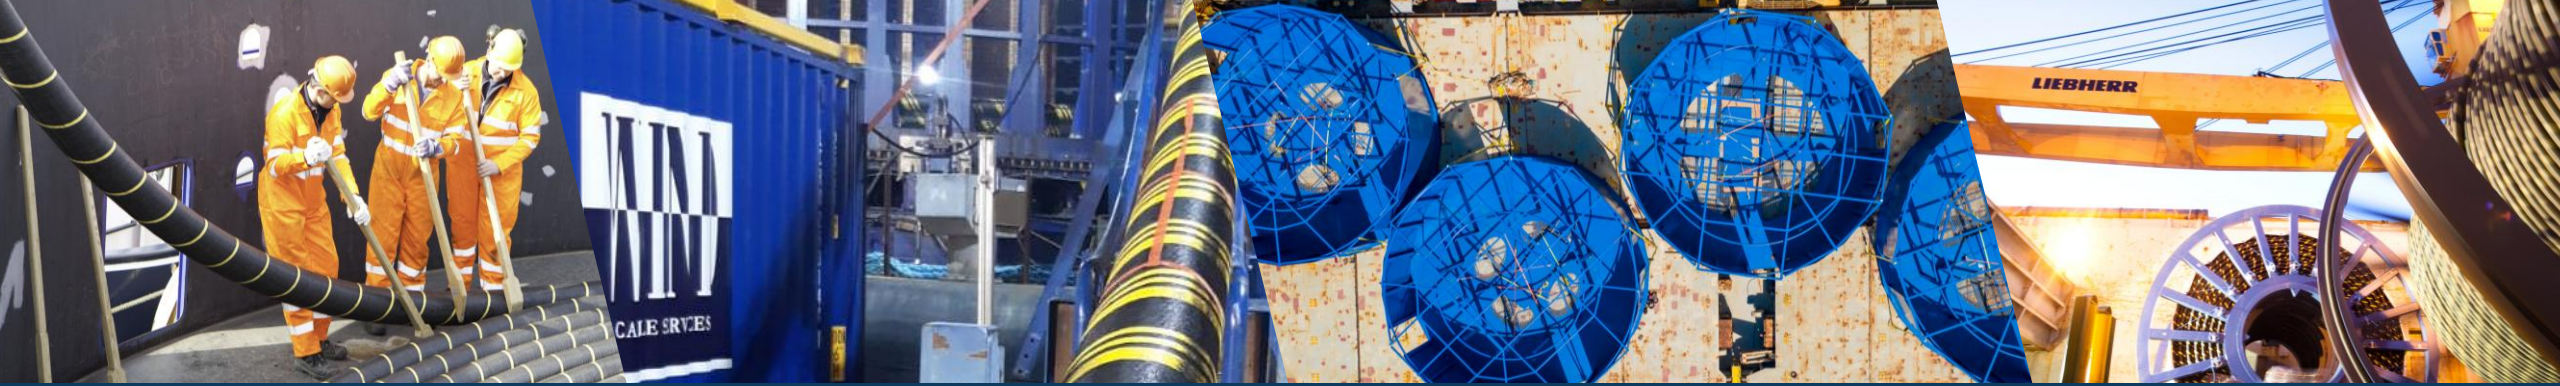

More than subcontractors. We are integral partners committed to the success of the full project.

We play our role in advancing offshore sustainable energy by delivering safe, reliable and innovative subsea cable services that accelerate the global transition to a sustainable future.

A culture built on Flexibility, Reliability, Creativity and the pleasure of working together.

# The WIND way

- ✓ **Standardized operations across all global storage yards** while adapting to local and client-specific requirements
- ✓ Experienced **local teams, inhouse project management** and **standby equipment** ensure fast logistics, efficient repairs, and **72-hour cable transfers**.
- ✓ Flat organizational structure ensures **short communication lines** providing each client with a dedicated contact for seamless coordination
- ✓ With extensive experience in cable transport, project and port coordination, and compliance with international regulations, we deliver **cost-effective, safe, and efficient solutions**.

Every project executed with  
WIND precision

'WIND combines decades of experience in the shipping industry with specialist hands-on expertise of subsea cable handling.'

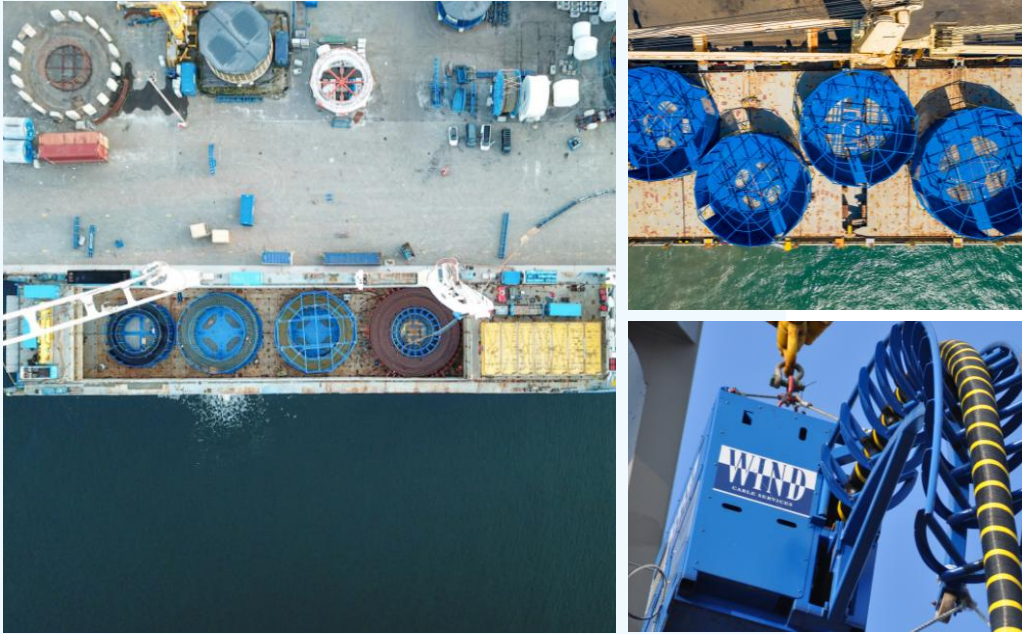

# Cable handling & storage

- ✓ Long- & short-term storage
- ✓ Factory and project intermediate storage
- ✓ Power cable repair
- ✓ Fibre Optic cable repair
- ✓ Worldwide intermediate storage services
- ✓ 24/7 transfer equipment standby
- ✓ 72 hours load-out mobilization

# CABLE

## Cable transport & equipment

### Expert Cable Transport Solutions, Ready When You Need Them

- Full-service transport from factory to CLV/storage yard
- Project engineering & management
- Supply of cable equipment
- Supply of cable crew
- Cable transfer services, worldwide
- Cable testing & reporting

WIND owns a large pool  
of cable handling equipment

ON THE  
MOVE

## Basket & Reel Supply

We design and supply custom storage baskets and reels tailored to client needs, ensuring safe, efficient cable handling and quick delivery for lifting and sea transport operations.

---

**ADDITIONAL SERVICES**

## Cable Testing

We offers pre- and post-load-out cable testing to ensure the integrity of cables before and after handling, providing peace of mind and operational reliability.

---

**ADDITIONAL SERVICES**

# Cable Repair Management

We use an advanced ERP system to track cable accessories and work closely with clients to plan effective repairs, ensuring all components are available and ready when needed.

---

**ADDITIONAL SERVICES**

## Marshalling Services

For intermediate storage projects, we offer complete marshalling services, managing indoor and outdoor storage and handling of key accessories on behalf of our clients.

- ✓ Production
- ✓ Commissioning
- ✓ Project Management
- ✓ Service & Maintenance

Our global onshore & offshore portfolio include:

## Lifting Tools

Jacket lifting tools,  
Pile lifting tools,  
A-frames & cranes

## Cable Handling

Tensioners,  
Roller boxes,  
Bend restrictors,  
Routing solutions,  
Bundling tools,

## Cable Loading & Storage

Reels,  
Carousels,  
Baskets,

## Pile Cleaning Tools

Cleaning,  
Brushing,  
Jetting tool.

## Subsea Tools

Rock dumping systems,  
Dredging tools,  
Trenchers,  
Ploughs,  
Vertical injector

## Vessel Tools

Winches, captans,  
Stone and rock dumping systems,  
and other deck equipment  
Upending tools,

## Handling Tools

Hydrographic sensor launchers,  
Moonpool actuators,  
Survey sensor handling tools.
