

AI-Native Transformation Built for Microsoft-Driven Operations

CONAIS helps organizations move from AI experiments to production workflows across Microsoft 365, SharePoint, Azure, custom apps and business automation.

Service outcome targets

30%

productivity boost

80%

less manual data entry

95%

data extraction accuracy

50-60%

faster approval cycles

Based on CONAIS AI Services typical outcomes. Final KPIs depend on the selected workflow and implementation scope.

What we offer

- AI readiness assessment and automation opportunity mapping
- Microsoft Copilot, M365, SharePoint and Azure AI integration
- Intelligent document processing and workflow automation
- Custom business applications, agents and system integrations

Best-fit conversations

- Teams blocked by manual processes and slow approvals
- Companies modernizing SharePoint, Teams and Microsoft 365
- Organizations needing AI-powered search, routing or reporting
- Leaders looking for a practical AI roadmap and pilot execution

How we work

01

Assess

Map workflows, data sources and automation opportunities.

02

Design

Define use case, KPIs, architecture and rollout plan.

03

Build

Deliver the pilot in sprints with live demos.

04

Optimize

Train users, monitor results and scale what works.

Start with one workflow. Prove the value.

AI consulting, Microsoft cloud expertise and workflow automation by CONAIS.
