

# JUUNOO

## THE WALL THAT PAYS OFF.

**JUUNOO DryClick:** a drywall innovation that installs 5x faster with complete reusability. It integrates patented click-connection technology into the edges of drywall boards.

Transforming how partitions are built and reconfigured in commercial real estate and data centers,

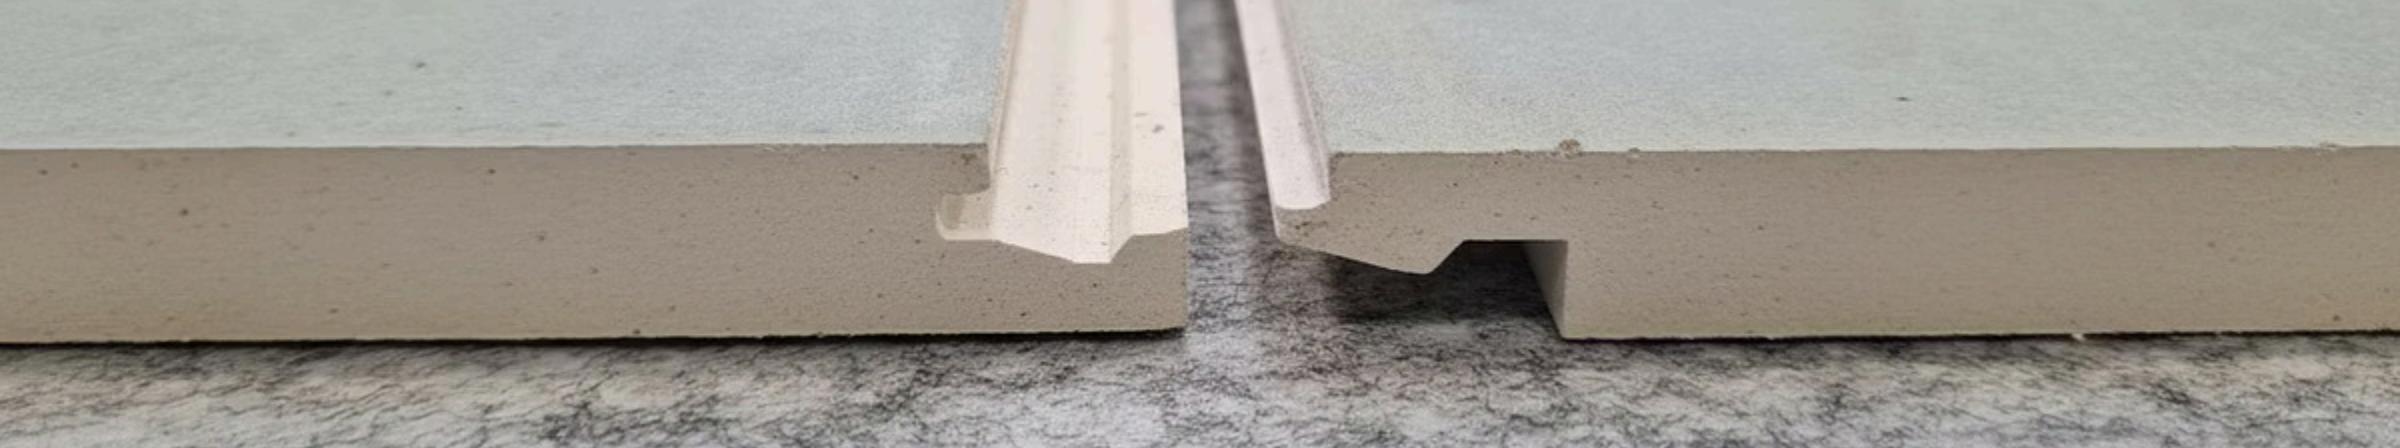

# The Problem with Traditional Drywall

## Labor-Intensive

Traditional drywall installation methods have remained virtually unchanged since 1912. Modern construction still requires approximately 23 minutes per  $\text{m}^2$  to build a wall.

## Massive Waste

The global drywall industry produces approximately €46.75 billion of boards annually. Nearly all end up in landfills after a single use cycle.

# Introducing JUUNOO DryClick

[see video](#)

JUUNOO DryClick uses patented click-connection technology that allows boards to snap together and lock onto telescopic studs without tools. The construction is nearly identical to traditional drywall, just easier and faster. The same teams can install the walls while achieving similar technical specifications for fire resistance, stability, and acoustic performance.

## Traditional Drywall

### Initial install:

- 23 min per m<sup>2</sup> (Installation time)
- €74.8 per m<sup>2</sup> (Labor cost)
- €181.1 per m<sup>2</sup> (Total installed price)

### End of life:

- Pay €59.5 per m<sup>2</sup> for disposal.
- Deplete natural resources

## JUUNOO DryClick

### Initial install:

- 5 min per m<sup>2</sup> (Installation time)
- €17.9 per m<sup>2</sup> (Labor cost)
- €126.7 per m<sup>2</sup> (Total installed price)

### End of life:

- Reuse and save €68 per m<sup>2</sup> on your next project.
- Turn former waste into valuable tradable assets.

JUUNOO DryClick reduces labor costs by 76%, delivering a €54.5/m<sup>2</sup> savings on total installed price.

Prices are based on New York labor costs and are provided for estimation purposes only.

# Built on Success

With 9 years of experience delivering large-scale commercial office fitouts for industry leaders, JUUNOO has built the team and expertise to execute complex projects. Our proven track record includes office transformations for companies like:

This success is reflected in remarkable growth:

**504% YoY Growth**

in 2024

**115% Growth**

over last 6 months

**23% Repeat Orders**

over last 6 months

# Trusted by the Industry Leader Rigips Germany.

JUUNOO's technology has achieved market validation through a strategic partnership with Rigips Germany, part of the Saint-Gobain group and successful regulatory approval in Europe's most stringent market.

## Supported by Saint-Gobain

Saint-Gobain invested in JUUNOO in 2021 and is rolling out the technology through its Rigips brand in Germany as the Rigimove product line.

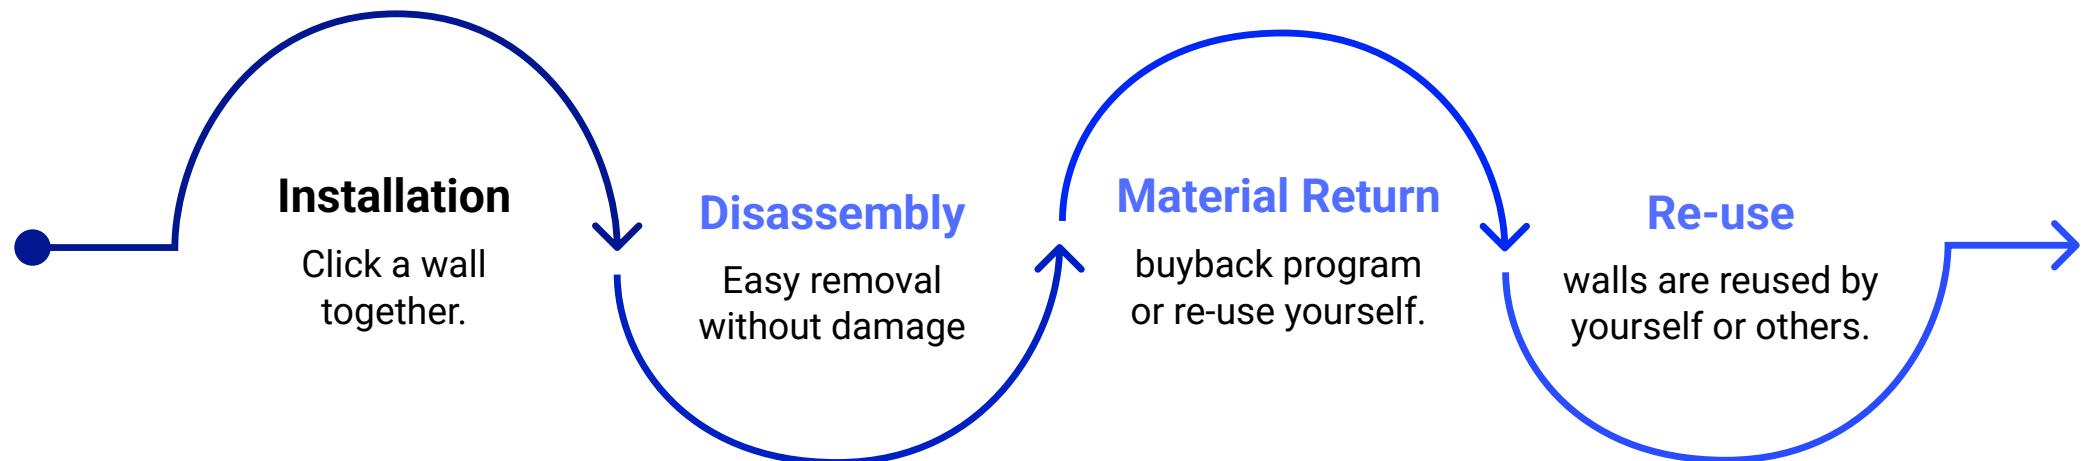

## German Certification Passed

JUUNOO systems have passed Germany's most stringent fire and safety testing standards. Additional certifications can be achieved based on your project's demand.

## Patented Technology

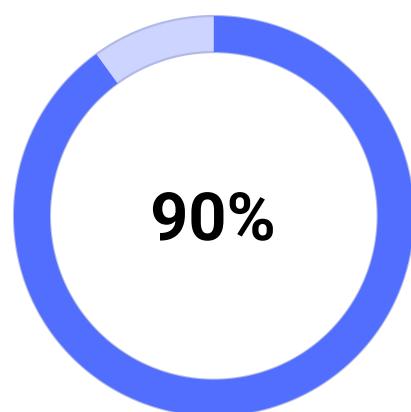

JUUNOO's click-connection system is protected by multiple issued patents with additional patents pending, ensuring competitive advantage and technical differentiation.

# Sustainability that Improves your Budget

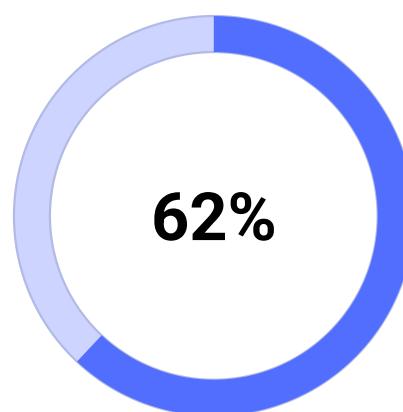

JUUNOO systems are designed for disassembly and reuse. Materials retain value through multiple use cycles rather than becoming waste. JUUNOO buys back wall components, inspects and resells them as refurbished, extending their lifecycle. Hence, they become an additional revenue source as your business grows and evolves.

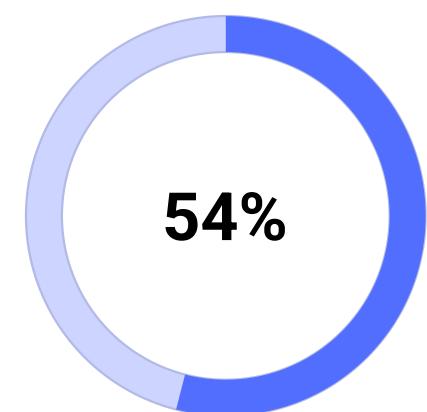

For companies pursuing carbon neutrality targets, JUUNOO delivers measurable reductions in embodied carbon, construction waste, and lifecycle environmental impact.

Reduction in construction waste

Lower embodied carbon

Reduction in total cost of ownership

# Why Choose JUUNOO

## Cost Efficient

78% faster installation and 76% lower labor costs deliver €54.4/m<sup>2</sup> savings on initial price. Save money today and in the future.

## Built on Success

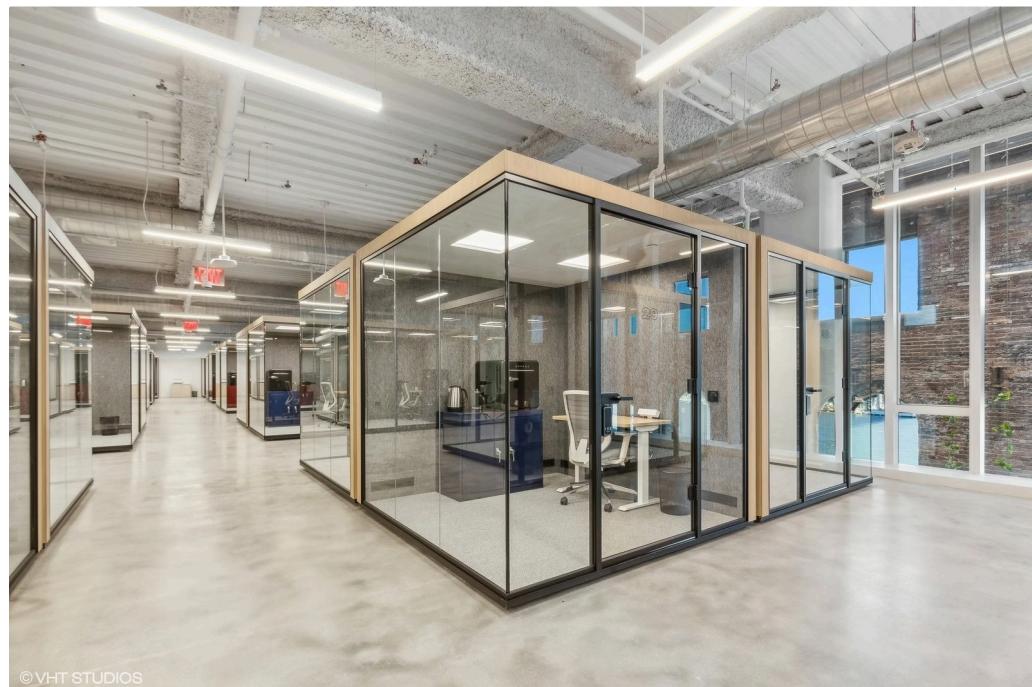

Proven technology with real-world installations across major commercial projects in both Europe and North America.

## Ready to Scale

Strategic partnership with global leader Saint-Gobain validates our technology. Technically proven and certified.

## Sustainable by Design

90% reduction in construction waste, 49% lower embodied carbon, and 100% material reusability. Built for the future.

# Build the Future. Build Returns.
