EUROPEAN UNION

EU-CIP: European Cancer Information Portal

First module of the European Cancer Patient Digital Center

Coordinator: Prof. Dr. Roland Eils, CHA
Pitcher: Jochen Bauer, CHA

5 years Cancer Mission:
Stronger Through Connection

BRUSSELS
29 SEPTEMBER – 01 OCTOBER

5 years Cancer Mission:
Stronger Through Connection

European Cancer Information Portal (EU-CIP)

Building a European Community of Practice

Started with:

18 countries

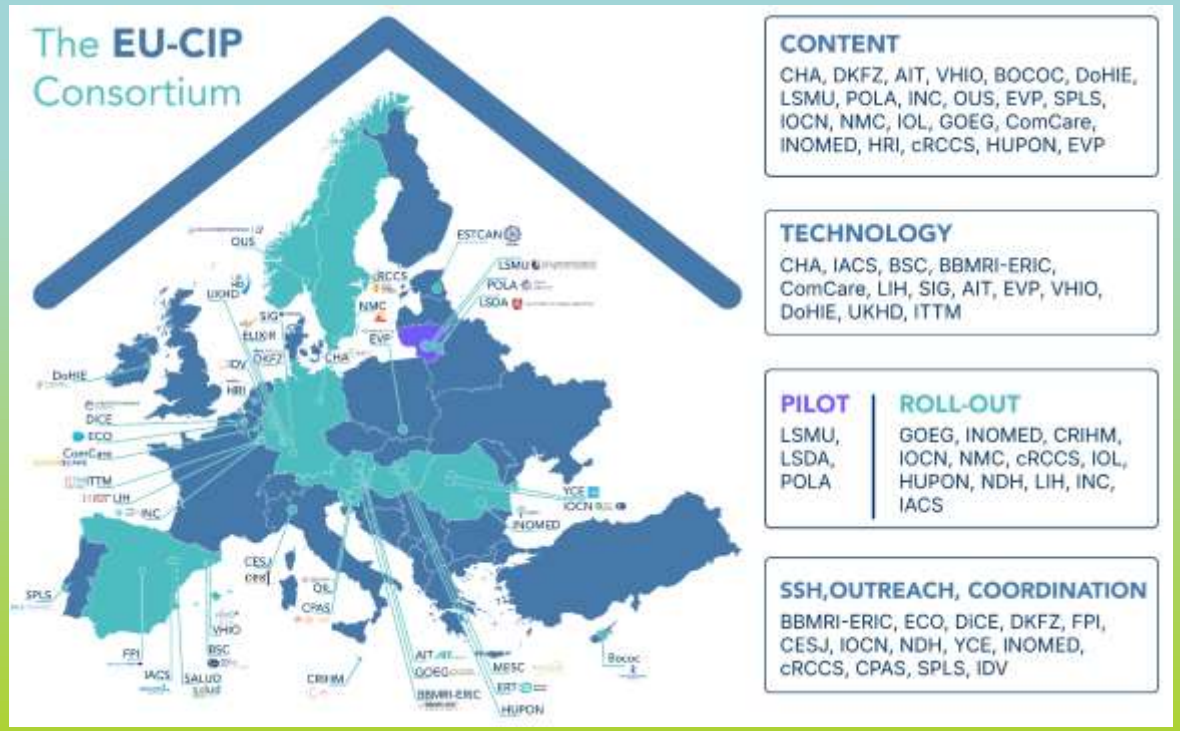

38 beneficiaries

2 associated partners

11 planned national portals

Now*: +1 rollout + 3 associated partners

*amendment ongoing

5 years Cancer Mission:
Stronger Through Connection

EU-CIP: trusted information throught the cancer journey

For patients, survivors and caregivers

The patient needs

- Clear, reliable cancer information in their own language and relevant to their care setting
- From prevention and diagnosis to treatment, rehabilitation and life after cancer

The EU-CIP approach

- A shared European Library of Content, developed with patients and experts
- Common quality criteria and tools that help national teams create, adapt and publish content

A foundation for the European Cancer Patient Digital Center (ECPDC)

5 years Cancer Mission:
Stronger Through Connection

EU-CIP Content Creation Pipeline (CCP)

Evidence-based sources

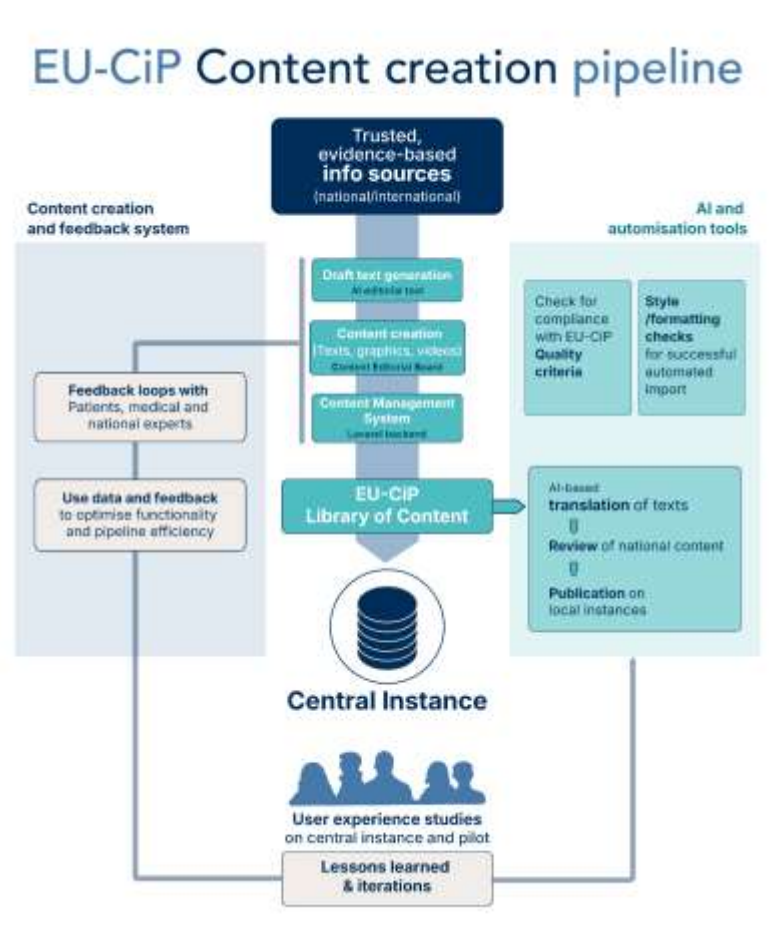

- Structured content and shared Library of Content for national reuse and iteration

AI use with Human review throughout

- Patients, medical experts and national teams provide feedback and review
- AI and automation support quality checks and translation

Three implementation paths for Member States

- Central Instance
- Mirror Site
- API Integration

EUROPEAN UNION

Live demo:
one article through the CCP to the patient portal

5 years Cancer Mission:
Stronger Through Connection

Next steps: national uptake and collaboration

A shared content library for existing and emerging cancer information portals

Pilot and national rollout

- Test the approach in Lithuania and with the content editorial teams for the MVP
- Adapt towards varying national capabilities
- Prepare rollout with national partners

Content and tools

- Expand the library
- Improve the CCP through feedback by patients and editors

Collaboration with Cancer Mission projects and national providers:

- Contribute trusted content sources and/or add functionalities to scale ECPDC
