# Learning objectives

designed by the top professionals in LCA

## Participants will learn:

- A solid theoretical foundation about how LCA works, including Impact Assessment Methods, databases, relevant ISO standards
- Practical real-life issues that will come up and how to solve them
- Hands-on experience of conducting a real ISO 14044 compliant LCA study
- Ability to continue working with LCA on their own
- LCA software (Earthster)

## Available resources:

- State-of-the-art LCA textbook
- Selected journal articles and white papers
- Documentation for databases and impact assessment methods
- A sequence of practical exercises
- Video lectures
- Live discussion sessions with our professors
