ADVANCED THERAPIES IN BELGIUM

CO-ORGANISED BY BIOWIN & MEDVIA

Sponsorship prospectus

**ADVANCING
TOGETHER**

Towards next-generation therapies

About Advanced Therapies in Belgium

Shaping the future of Advanced Therapies in Belgium and beyond

Advanced Therapies in Belgium aims to bring together key players in the advanced therapy value chain, with a special focus on cell and gene therapies (ATMPs) and other novel therapeutic approaches (exosomes and phage therapy). Our goal is to foster synergy in research and development among stakeholders engaged the field, including pharma, biotech, startups, CDMOs, academics, and industry service and equipment providers from both Flemish and Walloon regions. Together, our aim is to ensure that the next generation of advanced therapies can be made available to patients in a cost-effective manner and on a large scale, driving progress and accessibility in healthcare innovation.

Advanced Therapies in Belgium is jointly organized by MEDVIA and BioWin
