We turn
Image-heavy
operations
into auditable,
scalable decisions

Images are driving operational decisions
Yet most inspections are still manual

\$53B

Operational
Predictability

So why haven't all companies solved this yet?

Because it's complex and challenging to manage

To solve this problem
fu2re developed

smartvision · AI

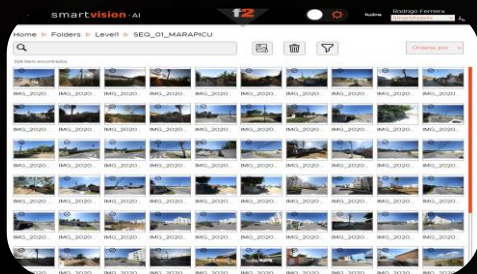

No-Code AI. No Programmers Needed. Full Governance.

5 simple steps to transform your process into a smart operation.

1

Capture

Build your image dataset

2

Label

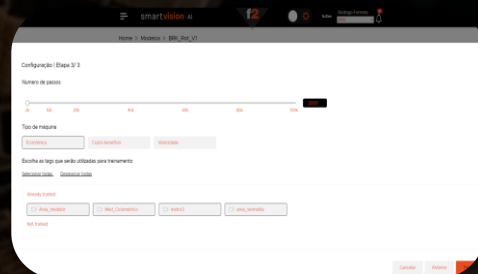

Classify and annotate images

3

Train

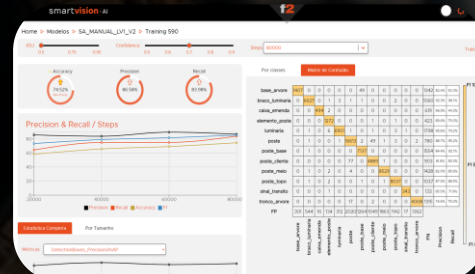

Train and evolve your AI model

4

Validate

Evaluate performance

5

Deploy

Integrate with your systems

smartvision AI

smartvision · AI

One core system. Many possibilities.

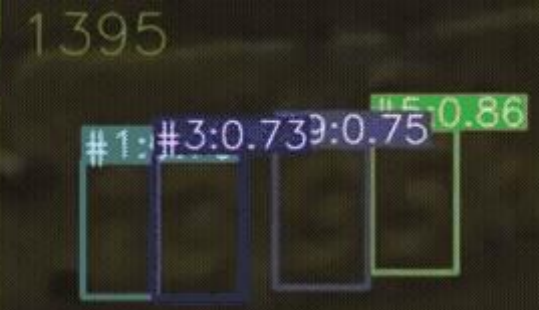

Industrial applications

Behavior monitoring

Safety and risk analysis

Asset management

100 Startups to Watch
(2023 e 2024)

Growth Stage
Startup 2025

TOP2 AI Startups - 2023
TOP3 AI Scaleups - 2024

The Future of Visual Intelligence Is Already in Operation

- Operations in Brazil and Europe
- Series A funded
- 1st LATAM startup in the NVIDIA Inception Program
- Technical founders and 60+ AI specialists

André Sih – CSO/CMO
Master's in AI
One of the 100+ Most Influential
People in Energy in 2025

Rodrigo Ferreira – COO/CPO
MBA in TI
Specialist in development

Thiago Cazes – CTO
Master's in AI
Specialist in complex architecture

Are you extracting
value from your images?
