

GREEN inc.

Rooted in Good, Crafted by Filipinos

Company Profile

# OUR STORY

“Behind every product is a story”

Established as a social venture, Green Inc. motivate by the lives of Filipino indigenous people. With over 13 years of research and development experience, their raw material processing skills and sourcing knowledge are unparalleled.

It fosters the growth of diverse communities and ecomaterials present in them, while establishing connections with both domestic and global consumers. Calamus Rattan Processing Plant OPC in Mindanao is one of their main suppliers.

Welcome to Green Inc. –  
Where Nature Meets  
Craftsmanship

At Green Inc. we bring the timeless beauty of rattan to life through expertly handcrafted furniture and decor. With a deep respect for nature and a passion for design, our pieces are made to inspire comfort, style, and sustainability in every space. Whether you're furnishing a home, resort, or commercial space, we invite you to explore our collections and experience the artistry and warmth that only natural rattan can offer. Welcome to a world of natural elegance.

Welcome to Green Inc..

## Our Vision

Our vision is to be a global leader in sustainable rattan products, showcasing world-class Filipino craftsmanship while empowering communities and protecting the environment.

## Our Mission

Rooted in our mission to uplift Indigenous Peoples (IPs) and grassroots communities, our structured production flow - from legal harvesting to artisan craftsmanship and global export, creates livelihoods, preserves cultural heritage, and promotes a circular green economy.

a timeless elegance.

# Our Sustainability Path

## PEOPLE

We are determined to alleviate poverty and hunger, especially among our Filipino indigenous people. We want to help ensure that they can fulfill their potential with dignity and are provided equal opportunities. That is why, even as a budding social enterprise, we have already supported multiple indigenous communities all across the country and uplifted at least 1,000 families from poverty.

## PLANET

In order to protect the planet from degradation, we are firm in our efforts to minimize our impact on the environment. We have acquired 15,000 new rattan seedlings ready for reforestation. On top of this, we have 100% compliance to the government requirement for our overall harvesting practices and production processes.

## PROSPERITY

We are determined to uplift the lives and communities of the people we work with. Since the start of our operations, we have created more than 1,000 jobs in the locations we operate in. We have also supported 20 graduates from our indigenous employees.

## PEACE

Filipino indigenous people face the threat of being driven to violence due to poverty. That's why we are determined to uplift indigenous communities by providing them means for employment. 60% of our workforce are indigenous people from all across the country. Due to this, we also promote peace in the areas where we operate and support communities. There have been no reports of conflict raising from indigenous communities in the forest of Mindanao and Luzon.

## PARTNERSHIP

At Green Inc., we make sure that all contributors to our enterprise are well-supported and compensated in our operations. That's why 100% of our stakeholders from the start of Green Inc. are still with us today. With that, we continue to grow as a social enterprise and foresee a 25% increase in our eco materials exports by 2025.
