

Academy for Business

Hands-on, modular training
for real-world cyber skills.

The cyber readiness gap

4.8M

workforce gap with global
demand for cyber roles
at 10.2M in 2025.

4%

organizations reach "Mature"
cybersecurity readiness,
proving conventional training
programs are ineffective.

75%

of employers say certificate
programs are valuable training
for potential employees.

Our approach

HTB Academy for Business delivers interactive, guided training that combines theory and practice. With unlimited access to hands-on labs, role-based learning paths, and rigorous certifications aligned to MITRE ATT&CK and NIST frameworks, teams transform knowledge into measurable, job-ready skills.

HTB ACADEMY

**Windows
Attacks &
Defense**

HTB ACADEMY

HTB ACADEMY

**Senior Web
Penetration
Tester**

Modules

Bite-sized lessons
blending theory + practice
with real attack scenarios.

Skill Paths

Curated sequences
of Modules for mastery
in specific domains
or techniques (e.g., Web
Exploitation, DFIR).

Job Role Paths

End-to-end journeys
that culminate in live,
hands-on exams,
validating real-world
competence.

Certifications that prove readiness

Prove your workforce's real-world proficiency by offering clear paths leading to multi-hour, live attack/defense examinations, giving learners and organizations credible, measurable proof of readiness.

Junior Roles

Core Job Roles

Specialized Job Roles

Key features

MITRE | ATT&CK®

NIST | NICE

DoD8140

Framework-mapped learning & reporting aligned to MITRE ATT&CK, NIST/NICE & DoD 8140.

Purple-minded courses & ranges integrating shared attack-and-defense exercises.

Customized curriculum management enables tailored learning journeys that match organizational needs.

Advanced analytics to measure progress, track readiness, and highlight gaps.

Where teams see impact

Accelerate technical onboarding: design role-based induction programs that get new hires up to speed quickly.

3x

Faster ramping time for new hires

Continuous upskilling: Gain access to unlimited courses and receive monthly releases of new content, enabling teams to continually learn emerging tactics.

50%

Increase time spent training by 50%

Certification pathways: Equip staff with industry-recognized credentials through integrated training and live exams that validate proven job-ready skills.

90%

MITRE and NIST coverage in 6 months

“

Since training with HTB, we've seen greater agility in addressing any issue that might arise and better detection rates. It's been a real investment in strengthening our in-house talent. The HTB SOC Analyst pathway has provided a standard skill level that we can expect our defenders to live up to and to be measured against.
