

WaSH Innovation – Smart, Water-Saving Hygiene Solutions for Emergency Preparedness Programs

In disaster scenarios – whether natural or man-made – access to clean water and basic hygiene can mean the difference between stability and outbreak. **WaSH Innovation** offers a line of innovative hygiene devices – **Pocket Tap**, **Pocket Sink**, and **Handy Shower** – designed to meet the needs of government agencies responsible for disaster response, civil protection, and public health.

These solutions are specifically engineered to support emergency preparedness and response strategies at local, national, and international levels:

Key Benefits:

- **Exceptional Water Efficiency**
In crisis zones where every drop counts, our devices use up to **80% less water** compared to traditional handwashing methods – without compromising hygiene effectiveness.
- **Portable and Lightweight**
Each unit is small enough to fit in a backpack and light enough to be carried by field personnel. Ideal for deployment in temporary shelters, refugee camps, and mobile medical units.
- **Easy to Deploy and Store**
With no electricity required and minimal assembly, these devices are operational within minutes. Their compact form also allows for efficient storage in warehouses, emergency stockpiles, or field vehicles.

- **Durable and User-Friendly**

Built for repeated use in demanding environments, the devices are intuitive to operate for users of all ages – including children, the elderly, and people with limited mobility.

- **Cost-Effective and Scalable**

Designed with both cost and scalability in mind, WaSH Innovation products can be distributed in large volumes, making them an ideal addition to **national preparedness programs, humanitarian kits, and civil defense reserves.**

Ideal Applications:

- Emergency shelters and field hospitals
- Refugee and displacement camps
- Public health outreach in remote or disaster-affected areas
- Strategic stockpiling by civil defense and emergency services
- Rapid deployment during floods, earthquakes, disease outbreaks, and conflict

WaSH Innovation's solutions bring resilience, dignity, and hygiene wherever they are needed most. Partner with us to strengthen your nation's capacity to respond — swiftly, safely, and sustainably.
