Technology & expertise

ACTIVE 6DoF, NOT PASSIVE 360°

Virtual Public Transport is the first proven module within the broader Virtual Empowerment platform.

- Users move, decide and perform tasks in realistic scenarios.
- A modular engine supports new life domains, languages and local contexts.
- OpenXR-based and largely hardware-independent to reduce vendor lock-in.
- Designed for guided learning, repetition and translation to real-world practice.
- Built for co-creation, testing and responsible impact evaluation.

multiple modules

Experience & cooperation

WHAT WE BRING

- A deployed first module used by schools, care organisations, public authorities and mobility partners.
- Practical experience with implementation, facilitator support and real-world validation.
- A Dutch network of professional users and implementation environments.
- Expertise in accessibility, neuro-inclusive design, localisation and interoperability.

COOPERATION SOUGHT

- Consortia and WP leads working on inclusive and trustworthy virtual worlds.
- Universities and research partners for learning, well-being and impact studies.
- Public authorities, schools and care organisations for co-creation and validation.
- XR and accessibility partners for open, interoperable solutions.
- Country partners for responsible localisation and implementation.

Let’s connect if your consortium needs a proven inclusive VR use case and real-world validation environments.
