ABOUT US

Connecting Expertise, Accelerating Energy Transition.

The Energy Bridge (TEB) is a Vienna-based Knowledge Platform — an on-site and digital space combining community intelligence with a centralised data repository. It brings **academia, industry, policymakers, finance and innovation** together, across generations, to accelerate energy transition. TEB is a spin-off connected to TU Wien.

CO-FOUNDERS

Daniel Schaub

Civil Electrical Engineer, MSc Renewable Energies (TU Wien). 12+ years in renewables, incl. 7 years with Chile's Ministry of Energy and 200+ MW of PV projects developed across Latin America.

Rahul Mishra

Electronics Engineer with master's degrees in International Business and Renewable Energy Systems. Experience in Startup Ecosystem, Impact Analysis, utility communications, and global energy media

OUR MISSION

Move the energy transition from individual effort to collective action.

The transition is too big, and too urgent, for any single organization to solve alone. TEB exists so the people working on it can share knowledge freely, find each other quickly, and stop duplicating the same work in parallel.

OUR VISION

The most preeminent knowledge platform for energy professionals — starting from CEE/SEE.

Fostering cutting-edge knowledge exchange, facilitating impactful connections, and providing a dynamic hub for innovative ideas — building toward a global network of energy professionals.

Four pillars, one platform.

TEB Klub

A digital collaboration space with community intelligence and a centralised data repository — built for the industry, by the industry.

Forums & Events

On-site forums, hackathons and dialogues that bring academia, industry, policymakers, finance and innovation into the same room.

Research

Multi-client studies delivering critical, topical insight for strategic decisions across the energy transition.

Media

Podcasts, articles and on-site coverage — sharing insight and know-how across the CEE energy community.

What partners and sponsors can commission.

- **On-site Energy Events**

Design and delivery of Forums, Hackathons and Dialogues that convene the right stakeholders around a specific topic.
- **Intelligent Community Platform for Energy Professionals**

The Klub & TEBi: an invitation-only intelligence layer for the CEE energy community, pairing a curated data library and ecosystem map with member expert-matching, so every question gets both a sourced answer and a direct line to the person who knows it best.
Ask TEBi. Get an answer and the person behind it.
- **Podcast · Interviews · Articles**

Editorial and media production — turning expert conversations into content that reaches the TEB community and beyond, feeding TEBi as well.
- **EU & National Funded Project Dissemination**

Dissemination partner for EU- and nationally-funded energy projects — reaching a qualified CEE industry, policy and research audience.

WHAT WE'VE DONE

A track record built since 2025.

IN THE PRESS

- [brutkasten](#) — coverage of the 3rd TEB Forum and the CEE energy transition (2026)
- [Trending Topics](#) — TEB Forum unites policymakers, industry and innovators (2025)
- [TU Wien Academy](#) — 1st Energy Transition Dialogue in CEE (2025)

This autumn in Vienna.

30 SEPTEMBER 2026

TEB Forum: Real Estate & Energy

A cross-sector showcase of proven technical and economic solutions bringing energy efficiency to the real estate sector — real projects, real numbers.

TU Wien, Kuppelsaal — Vienna

250 attendees · on-site

24 to 26 OCTOBER 2026

TEB Hackathon: Critical Infrastructure & Energy Security

A hands-on hackathon tackling resilience challenges for critical energy infrastructure, bringing together innovators and technical experts.

weXelerate, Vienna

70 participants

Into 2027.

19 JANUARY 2027

TEB Forum: Critical Minerals & Infrastructure

A policy-focused forum on securing the critical minerals and infrastructure the energy transition depends on.

Diplomatische Akademie, Vienna

250 attendees

JUNE 2027 · FLAGSHIP

TEB Forum Vienna 2027: Energy Transition in CEE

Two days of panels, side rooms and field visits — the annual flagship bringing the whole CEE energy ecosystem to Vienna.

Vienna, Austria

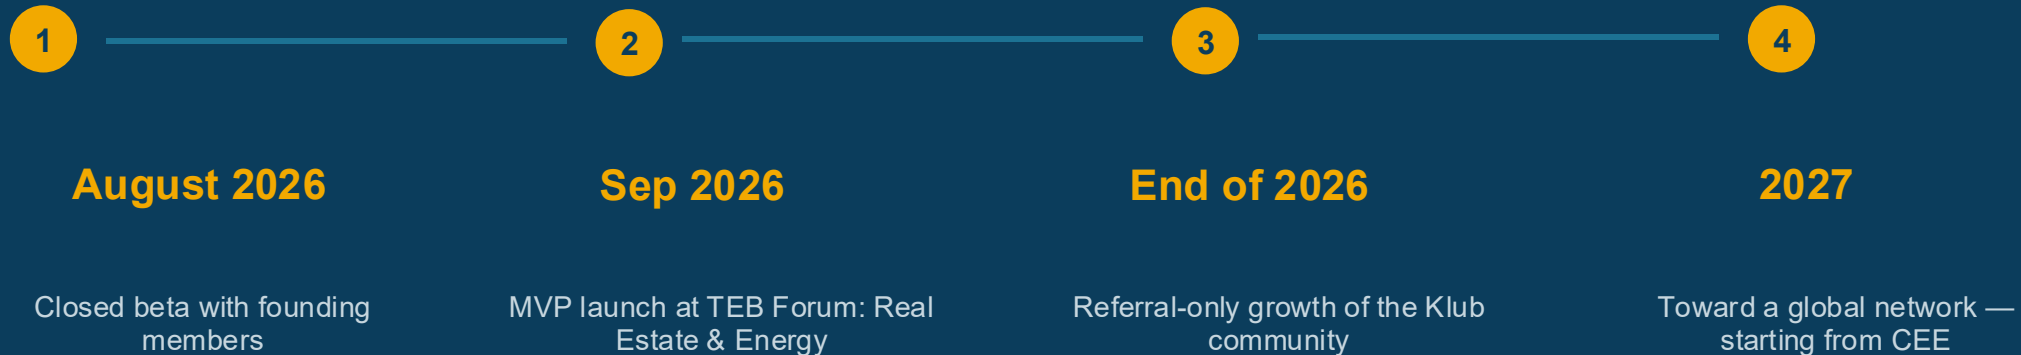

Target: 500+ attendees

Launching TEBi — our intelligent Klub platform.

An invitation-only digital home for CEE energy professionals — combining a curated data library with expert-matching, so members get both a technical answer and a direct line to the person in the Klub who knows the topic best.

Join the Klub as a Co-Creator — help shape our culture, tools and impact.
