

## Kurt Kauffmann Technical Springs for the Aerospace Industry

Founded in 1973 in Germany, Kurt Kauffmann Technical Springs has been a trusted supplier to the aerospace industry since 1984. With production facilities in Weinstadt (Germany) and Nyúl (Hungary), we deliver precision-engineered spring solutions for critical aerospace applications.

Equipped with a state-of-the-art laboratory featuring advanced technologies such as an X-ray diffractometer, scanning electron microscope, 3D measuring machine, camera measuring systems, and endurance test benches, we ensure the highest quality standards for our customers.

### Examples

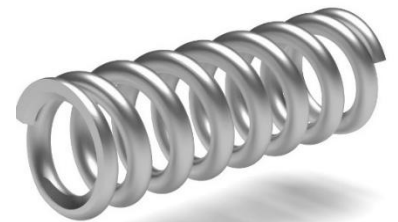

#### Tension Springs & Spring Assemblies

Application example: Aircraft landing gear  
Lock spring assembly

#### Compression Springs

Application example: Flight control,  
Actuation systems & Valve springs

#### Torsion Springs

Application example: Actuation systems

#### Rings

Application example: Segmented retaining rings

Soon certified according to EN 9100
