

The logo for SUVA SOLUTIONS features the word "SUVA" in a large, bold, white sans-serif font, with a white curved line to its left. Below "SUVA" is the word "SOLUTIONS" in a smaller, white, all-caps sans-serif font. The background is a gradient from dark blue on the right to bright orange on the left, with a stylized flame graphic in the bottom left corner.

SUVA

SOLUTIONS

**Automatic fire suppression
technology for residential
kitchens**

Designed to save lives

Problem

Kitchen fires remain the leading cause of residential accidents, disproportionately affecting elderly and dependent individuals. However, most homes are still not equipped with autonomous systems designed to prevent such incidents

A fire can turn fatal in less than 5 minutes

Impact (Spain)

73,000
fires
annually in Spain

Every 3.5 minutes,
a home catches
fire

75%
caused by frying
pans and
unattended
cooking

€5,600
average cost
per affected home

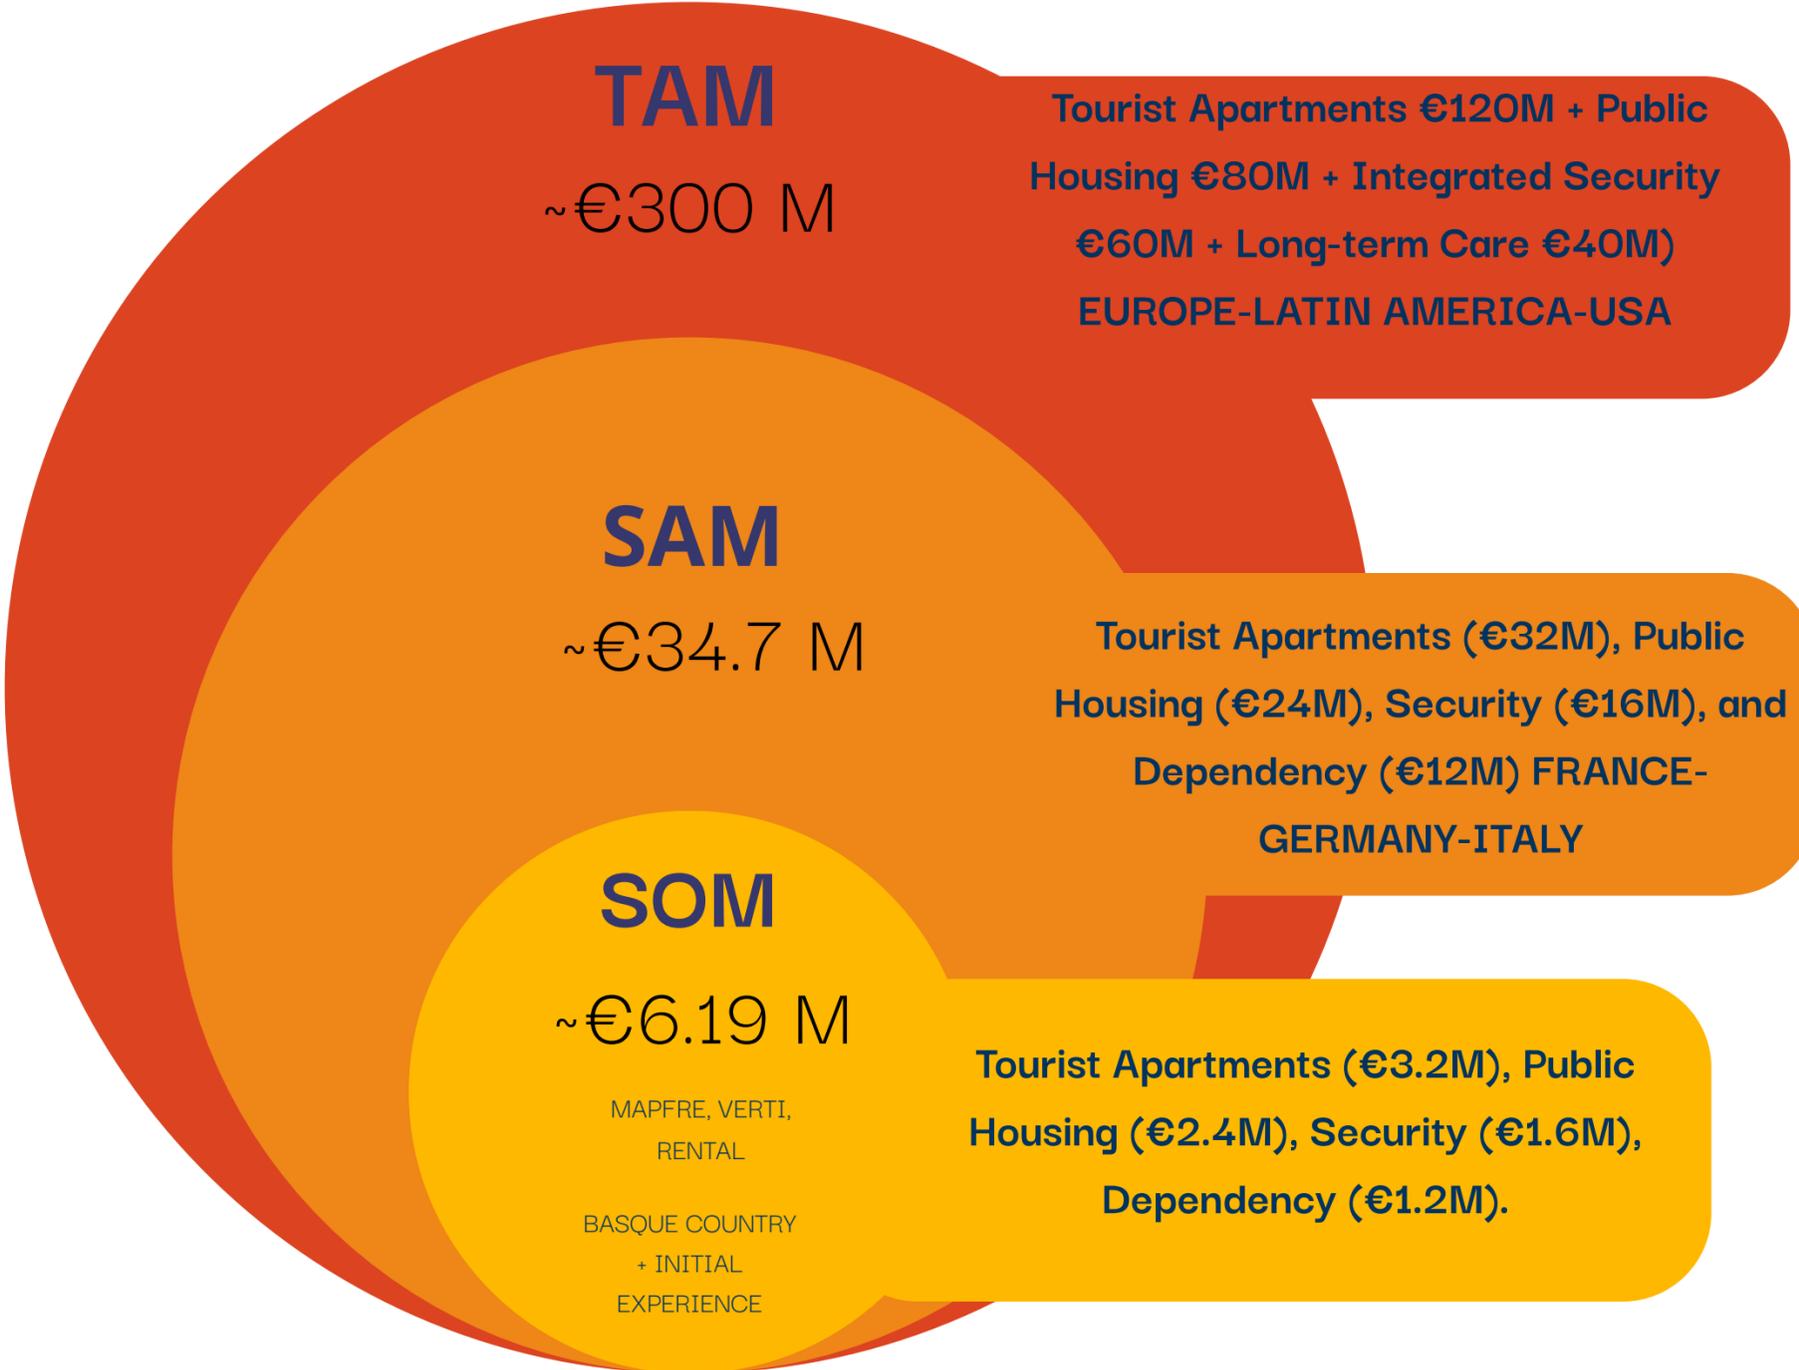

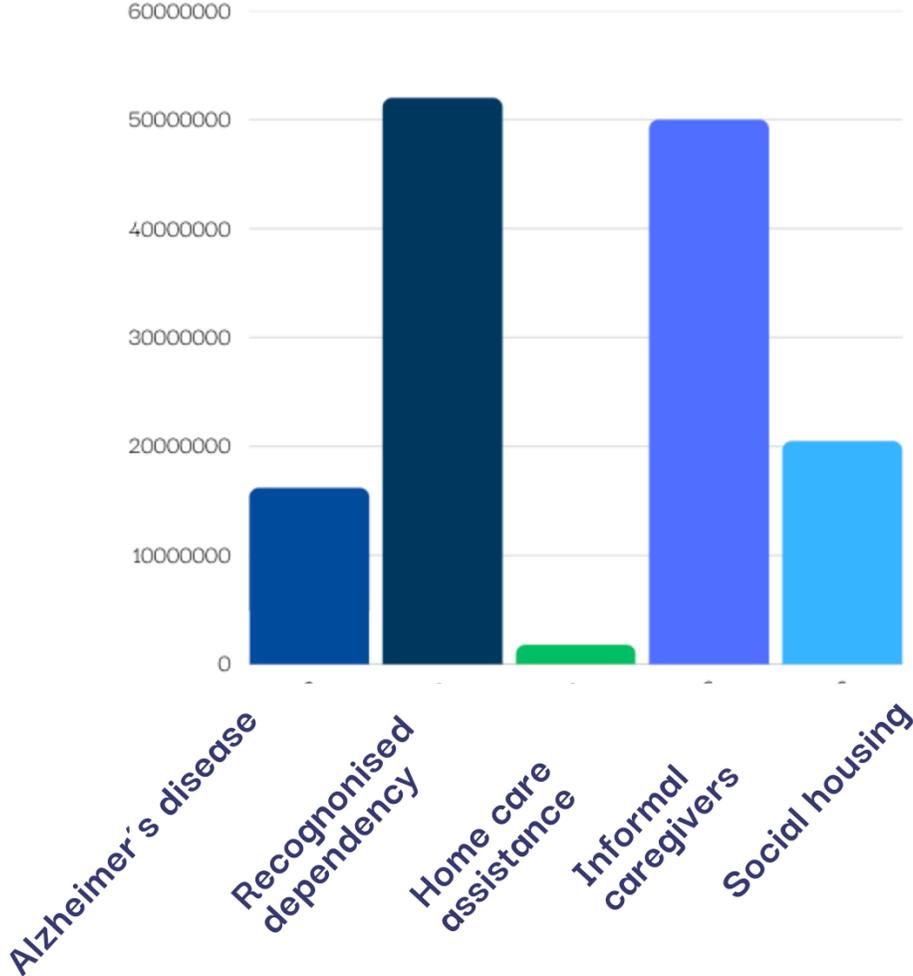

Over €600 million
in annual economic
losses

Over 2,000
hospitalizations
each year

276
deaths annually

European Market Potential

Telecare, Long-Term Care, and the Silver Economy

Solution

The first fully autonomous platform that detects, suppresses, and reports kitchen fires in real time – without human intervention

DETECTS

Smart sensors detect hazardous situations directly in the frying pan

SUPPRESSES

Automatically extinguishes the fire in just **6 seconds**

ALERTS

Sends **real-time** notifications to relatives and emergency services through a mobile app

(SUA KITCHEN

Intelligent fire suppression system for the home

A new category of safety technology designed specifically for domestic environments.

Unlike industrial or commercial solutions, SUA Kitchen is engineered to integrate seamlessly into private homes, providing continuous protection without disrupting daily life.

How It Works

Fast, precise, vital.

6 seconds to
save a life.

Simplicity

NO
installation work

NO
electricity

NO
WIFI

In real time

Extinguish a fire
in 6 seconds

Automatic
notifications

Easy
cleaning

Every second counts

5 minutes
to lose Your home

The speed at which a fire is extinguished can mean the difference between saving a life and experiencing a tragedy

+ 3 minutes
risk of loss of life

Who is this for?

Public institutions

- Dependent individuals.
- Protection of dependent people and homes in remote areas
- Private homes.

Insurance companies

- Significant reduction of claims and losses (e.g. MAPFRE)

Private companies

- Fire safety companies seeking to enhance their service offerings

Tourist apartments

- Improved safety and property management

Construction

- New housing, rehabilitation projects and wooden structures

Validated by...

Certification

SUA Kitchen certification represents our greatest technical milestone and the recognition of a multi-year commitment to excellence.

It is the first certified INTELLIGENT AND AUTONOMOUS automatic fire suppression system designed specifically for residential kitchens in Europe.

The logo for SGS, featuring the letters 'SGS' in a large, bold, grey, sans-serif font. A horizontal orange line is positioned below the letters, and a vertical orange line is positioned to the right of the letters, intersecting the horizontal line.
