我们的产品达到德国ETAG 005各项最高标准
Our products have achieved all highest standards of ETAG 005.

CE	
Triflex GmbH & Co. KG, Karlstr. 59, 32423 Minden 06	
Triflex ProDetail, Nr. 2290*	
ETA - 06/0269 (2006)	
Dachabdichtung nach ETAG 005: 2004	
DIN EN 13501-5: B _{Roof} (t1); B _{Roof} (t2); B _{Roof} (t3)	
DIN EN 13501-1: Klasse E	
Nutzungsdauer: W3 / Klimazonen: M und S	
Nutzlasten: P1 bis P4 / Dachneigung: S1 bis S4	25年/25 years
Niedrigste Oberflächentemperatur: TL 4	高负荷/high imposed loads
Höchste Oberflächentemperatur: TH 4	- 30°C ~ +90°C
Aussage zu gefährlichen Stoffen: keine enthalten	

德国原装进口 Made in Germany

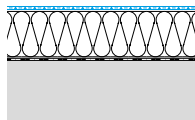

适用于屋顶各种结构及用途 Different roof constructions

没有保温层的屋面防水 Waterproofing for roofs without thermal insulation

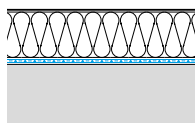

德力封防水系统对整屋面采用无纺布加强，可提供无缝防水，并无需额外表面保护。
The full-surface fleece-reinforced Triflex waterproofing system provides seamless and jointless roof waterproofing, with no need for any additional surface protection.

非通风屋面的防水（保温层上） Waterproofing for non-ventilated roofs

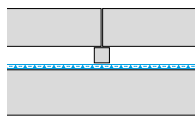

德力封防水系统可用于保温层上（需有支撑层），为建筑外壳提供可靠防水保护。
Over the thermal insulation (with support layer), the Triflex waterproofing system reliably waterproofs the building shell.

倒置屋面的防水 Waterproofing for inverted roofs

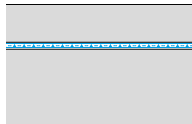

德力封防水系统可形成无缝的防水层，用于屋顶保温层下。
With inverted roofs, the Triflex waterproofing system forms the seamless waterproofing membrane underneath the thermal insulation.

其他覆盖层之下的防水 Waterproofing under other coverings

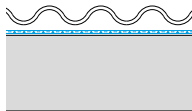

德力封防水系统在松散的覆盖物及其子结构下依旧提供持久的保护。
The Triflex waterproofing system provides long-lasting protection under loose coverings and their sub-structures.

找平层下的屋面防水 Waterproofing under screed

基料为PMMA树脂的德力封防水系统可耐碱及抗水解。可被用于混凝土、找平层之下。
Triflex waterproofing systems with a PMMA resin base are resistant to alkalis and hydrolysis. They can be used under concrete, screed and tiles without any problems.

可积水的防水层 Waterproofing under ponding

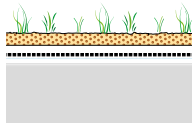

德力封平面/节点防水系统适用于景观喷泉、喷洒系统及水池的防水。
The waterproofing systems Triflex ProTect and Triflex ProDetail are suitable for waterproofing ornamental fountains, sprinkler systems and water tanks.

可行人的防水层 Waterproofing that can be walked on

对于维修通道，有防滑的德力封防水系统可供选择。具有更高负载的防水层也可被实现。
For maintenance paths, there are non-slip Triflex waterproofing systems available. Waterproofing with a higher load resistance is also possible.

种植屋面的防水 Waterproofing for green roofs

德力封防水系统上可种植绿化（耐根穿刺）。
Triflex waterproofing systems are suitable for use under roof greening (root and rhizome-resistant).

还有用于阳台/露台的防水系统！ And more waterproof systems for balcony/terrace!
