VISION

With its mission of guiding the industry's and its customers' needs for 25 years, İnnova aims to steer digital transformation with end-to-end IT solutions.

As one of Türkiye's leading IT companies, İnnova supports businesses by optimizing their processes with innovative and customized solutions, helping them grow and adopt new technologies.

İnnova's strong R&D structure enables it to lead technological advancements and offer solutions that address the sector's evolving needs, helping businesses unlock their full potential through digital transformation.

Leveraging artificial intelligence, automation, and cloud computing, İnnova is setting the standard for innovation and shaping the future of technology.

By developing 100% in-house engineering products, İnnova contributes significantly to Türkiye's national technology initiative and export targets.

REFERENCES

The background of the slide features a blurred image of two hands shaking in a firm grip, symbolizing a partnership or agreement. Overlaid on this are various digital elements: a large red circle on the left, a cluster of blue and white squares in the center, and another cluster of blue and white squares on the right. Faint, semi-transparent numbers like '2754', '12549', and '091' are visible in the upper left. The overall color palette is dominated by blues, whites, and a prominent red for the circles and text.

PRODUCTS AND SOLUTIONS

CLOUDWORKS

Migrate your business processes to the cloud
and increase your operational efficiency

Cloudworks combines innovation and practicality, offering a robust cloud infrastructure that integrates three essential business functions into one streamlined platform. Designed to optimize operations, Cloudworks allows you to easily migrate your existing systems and products into Innova's digital ecosystem, helping your business build and manage tailored cloud solutions. With a flexible "Pay-as-You-Go" model, enterprises can access customizable and scalable tools that meet their needs while ensuring fast, secure, and cost-effective cloud management.

cloudworks

Why choose Cloudworks?

- Seamlessly transition your business processes to the cloud with speed and security.
- Eliminate the need for additional hardware or software investments.
- No maintenance, repair, or update fees.
- Ensure uninterrupted 24/7 operations backed by Innova's trusted expertise.
- Scale your services efficiently and optimize costs with the flexible "Pay-as-You-Go" model.

SKYWAVE PRODUCT FAMILY

Step into the connected future with the Internet of Things

Bringing together a powerful technological infrastructure and flexible architecture, Skywave offers customized IoT solutions tailored to the needs of various industries. Rooted in the core of digital transformation, IoT (Internet of Things) drives value creation with unmatched speed, efficiency, and profitability. Innova's expert team makes bringing these cutting-edge IoT applications to life easy, ensuring smooth implementation and maximum impact.

SKYWAVEIoT

Skywave IoT Platform, built on a big data-driven architecture, enables centralized control and monitoring of IoT devices through a single platform while automating processes and securely storing data. Skywave IoT centralizes data from distributed IoT devices and uses this information to offer services such as AI-powered predictions, anomaly detection, and predictive maintenance.

SKYWAVECity

Designed for smart cities, SkywaveCity digitizes urban life by integrating thousands of sensors into a centralized platform. It simplifies management across multiple areas, such as transportation, lighting, climate analysis, parking, waste management, and irrigation, adding value to city operations and urbanites' lives.

SKYWAVEStore

SkywaveStore is an integrated smart platform designed for stores. It enhances efficiency while taking customer and employee satisfaction to the next level. Managed centrally, SkywaveStore provides real-time data from every store point, enabling effective management opportunities.

SKYWAVEFactory

SkywaveFactory is Innova's smart factory solution built to meet Industry 4.0 standards. It transforms factory equipment into intelligent systems, allowing data collection and analysis, predictive maintenance, and AI-driven solutions. SkywaveFactory digitizes every manufacturing process to ensure each phase can be centrally managed.

ROBOTIC PROCESS AUTOMATION

Manage your business processes
quickly and accurately

Using rule-based artificial intelligence (AI) and process automation technologies, RPA allows software robots (bots) to execute selected business processes that mimic human actions, interacting with digital systems to complete tasks.

Why choose RPA?

- Offers flexible deployment options: move, pause, or use periodically as needed.
- Operates continuously 24/7, drastically reducing processing times.
- Swiftly learns even the most complex tasks.
- Delivers flawless and precise results every time.
- Standardizes performance to ensure consistent effort.
- Handles data securely and maintains detailed records of all processes.

iNNOVAI

Artificial intelligence models designed to provide a competitive edge

InnovAI artificial intelligence models, developed by Innova, offer organizations a competitive edge with features such as predictive maintenance and anomaly detection. These models allow organizations to identify problems before they occur, understand device and customer behavior, and make decisions based on Big Data. By minimizing disruptions and lowering costs, InnovAI increases customer satisfaction.

Why choose innovAI?

- Detects failures early and initiates procurement processes, preventing unscheduled downtime with planned maintenance.
- Reduces the occurrence of malfunctions that could disrupt operations.
- Minimizes downtime during service and production.
- Boosts customer satisfaction by keeping operational disruptions to a minimum.
- Lowers maintenance times and operational costs.

INNOVA CALLUS

Shape your communications future

Innova Callus optimizes costs by improving communication quality and capabilities without needing high-cost physical infrastructure. It provides a comprehensive communication platform with web and mobile communication applications, including monitoring screen modules.

This advanced platform ensures secure internal communication and allows users to access self-service support for teams, enabling them to communicate through written, voice, or video formats from any location. Innova Callus, which supports WebRTC sessions among users, enables monitoring screen modules to analyze call quality and user interactions.

Why choose Innova Callus?

- Ensures high-quality audio and video calls, offering superior performance.
- Provides flexibility with on-premise and cloud-based options, adaptable to different needs.
- Fully integrates with business processes through customizable features that adapt to specific requirements.
- Offers a user-friendly interface and advanced communication features, accessible from any device, anywhere.
- Prioritizes the security of users' data and sensitive company information.

YANYANA

AI-assisted education platform for children with autism

Children with autism require continuous, intensive, personalized education developed by specialist educators to overcome the challenges of autism spectrum disorder and lead comfortable lives. YanYana enables this specialized education to be delivered remotely, personalized, and fully interactive with artificial intelligence.

Why choose YanYana?

- Offers a game-based learning experience assisted by AI, ensuring a fun and engaging education.
- Natural language processing and motion detection create interactive communication with children.
- Provides customized educational sets designed using Applied Behavior Analysis (ABA) methods, allowing teacher and parents to support children's needs at school and home.
- Delivers personalized learning experiences tailored to each child's preferences.
- Tracks children's progress and development with advanced reporting capabilities.

PAYFLEX PRODUCT FAMILY

Driving efficient and effective transformations in every sector

The PayFlex product family offers innovative solutions for payment, collection, and digital transformation applications, ensuring compliance with legal regulations and meeting high-security standards.

With the special integrator title granted by the Revenue Administration, Innova's PayFlex e-Transformation solutions enable organizations to carry out their operations more efficiently, with fewer errors, and in a more streamlined manner.

PAYFLEX

BANK INTERFACE GATEWAY

For businesses managing multiple bank accounts simultaneously, PayFlex BIG offers a comprehensive solution that puts your entire account flow under centralized control. Integrating seamlessly with CRM, ERP, and e-commerce software systems, PayFlex BIG also automates inter-account cash flow, ensuring smoother and more efficient operations.

payflexobp
ortak banka platformu

Why choose PayFlex BIG?

- Integrates with accounting, ERP, CRM, collection, and e-commerce software, ensuring automatic bank transfer updates across corporate systems.
- Provides detailed reports on bank account summaries and money transfers, customizable to specific date ranges.
- Offers customer management screens that allow for easy tracking of money transfers.
- Enables total asset control by allowing both customer-based and bank-based transfer monitoring from a single management interface.

PAYFLEX

CREDIT INTERFACE GATEWAY

PayFlex CIG allows online and offline businesses to offer their customers instant credit options as a payment method through integrated banks. Developed with in-house resources, PayFlex CIG enables customers to use credits for purchases across websites, mobile apps, or dealer networks without interrupting their shopping experience. Innova's expert engineers ensure the platform is continuously updated to reflect changes in banking regulations, integrating them seamlessly and without additional costs for businesses.

payflexokp
ortak kredi platformu

Why choose PayFlex CIG?

- Built on a strong cloud infrastructure.
- Offers the ability to identify customers and products eligible for credit instantly.
- Displays credit information in real-time on smartphones and tablets.
- Provides installment options that are compliant with banking regulations.
- Supported by Innova's continuous development and update services.

PAYFLEX e-TRANSFORMATION SOLUTIONS

e-Invoice

PayFlex e-Invoice enables a smooth and fast transition to electronic invoicing, providing a 24/7 uninterrupted service guarantee. Innova's expert team manages the transition process, eliminating the need for additional investment or technical expertise.

e-Archive

Innova's e-Archive solution provides tax-sealed and signed invoices in PDF format, ensuring fast access and easy readability, streamlining the entire archiving process.

e-Delivery Note

Innova's e-Delivery Note solution digitizes traditional paper dispatch notes, enabling their creation and seamless delivery to the recipient through the Revenue Administration's system.

e-Producer Receipt

PayFlex e-Producer Receipt enables agricultural and livestock businesses to issue, deliver, and report receipts via a web portal. It reduces paper waste and costs, facilitating an easier digital transformation.

e-Ledger

Innova's end-to-end e-Ledger solution ensures quick integration that complies with the Ministry of Finance standards, preparing documents required under Revenue Administration regulations.

e-Ticket

PayFlex e-Ticket service provides end-to-end solutions for using electronic tickets in intercity and international passenger transportation.

e-Reconciliation

PayFlex e-Reconciliation digitizes the traditional debt-credit reconciliation process, moving from phone or fax to a fully digital platform. This supports the overall transformation of financial operations.

PAYFLEX LOYALTY

The PayFlex Loyalty solution empowers brands to launch campaigns that enhance brand value, boost sales, and increase customer satisfaction across multiple scenarios.

Tailored for telecom, finance, insurance, retail, tourism, entertainment, and healthcare industries, PayFlex Loyalty enables rapid campaign execution, including point or discount allocations, reward distribution, and personalized customer offers.

PAYFLEX VIRTUAL POS

PayFlex Virtual POS provides financial institutions with a low-cost collection channel through a secure and efficient cloud-based infrastructure.

PayFlex vPOS eliminates the need for software and hardware investments by integrating with 13 banks. This enables institutions to manage transactions seamlessly, even as new legal requirements emerge, without requiring additional development for regulatory compliance.

PAYFLEX SMARTCOLLECT

PayFlex SmartCollect, tailored for large-scale operations, enables institutions to manage problematic receivables using modern technology. It offers advanced features like customer segmentation, scoring, and process design without additional development costs, ensuring customized solutions for diverse customer groups.

PAYFLEX VENDOR MANAGEMENT SYSTEM

PayFlex VMS allows organizations to manage all vendor-related processes centrally. This system allows businesses to analyze vendor and dealer performance, manage prepaid collection systems, automate reconciliation processes, and segment their vendor networks with various levels of access and permissions.

PAYFLEX UTILITIES PAYMENT HUB

PayFlex UPH frees institutions from the need to develop custom solutions for the varied infrastructures of the organizations for which they facilitate collections. It enables hundreds of service providers with diverse infrastructures to be easily managed through a single platform.

NETWORK 360

Stay in control with real-time monitoring and management capabilities

Network 360 enables real-time monitoring and management of all devices in the network. It tracks network equipment's performance, memory usage, and other key data, including Linux and Windows servers. It offers a user-friendly and swiftly deployable solution backed by Innova's expert engineers' support.

Why choose Network 360?

- Provides centralized monitoring and management, delivering real-time reports on the status and usage of network devices.
- Detects and resolves issues caused by unexpected traffic spikes.
- Enables network administrators to configure devices remotely.
- Automatically notifies teams of unexpected events through customizable alarm mechanisms.

KIOSK INNOVA PRODUCT FAMILY

Innovative and customizable
kiosk solutions everywhere!

Payment Kiosks:

Innova's payment kiosks offer quick and easy payment options for institutions that issue regular invoices and collect taxes. Self-service kiosks reduce personnel costs and increase customer satisfaction.

Ticketing Kiosks:

Used in the entertainment and tourism industries, ticketing kiosks optimize human resource utilization, offer convenience to customers, and help reduce operating costs.

KioWare Remote Monitoring Solutions:

KioWare provides high-level security by restricting access to the operating system. It simplifies remote kiosk management and makes it easy to control content and configurations.

Queue System Solutions:

Queue management solutions are used in banks, hospitals, and retail environments to shorten service times and enhance customer experience. Innova offers turnkey solutions with customized hardware.

DS SUIT

Establish effective communication with customers and employees anytime, anywhere.

DS Suit

DS Suit synchronizes screens worldwide with just one command, ensuring the same content is displayed consistently. Its advanced features allow for easy process management, analysis, and customization. Efficiency is increased by reducing the margin of error with approval processes. DS Suit enables seamless screen control across locations, including remote power management, volume adjustments, and control activation or deactivation.

Why choose DS Suit?

- Manages content across screens in various locations, allowing you to monitor which screens are active and adjust functions.
- Schedules content broadcasts daily, hourly, or monthly, ensuring timely and effective communication for important announcements.
- Groups screens regionally, enabling centralized content list management and screen group scheduling.
- Monitors screen connections and displayed content in real-time, offering full visibility and control.
- Supports file management and report generation, giving you the tools for seamless operations.

LEGA PRODUCT FAMILY

Achieve exceptional efficiency and speed with robust legal automation solutions

Lega offers a modern, centralized system for managing enforcement and litigation files. By simplifying administrative and legal processes, LEGA enables in-house legal teams and external law firms to work more effectively. Available in two versions, LEGA and LEGA Lite, this suite of products provides customized solutions to meet the unique demands of different industries.

LEGA

LEGA is designed to meet the essential needs of five major sectors: telecommunications, banking, insurance, utilities, and transportation. It streamlines legal and collection processes for institutions, providing a centralized and standardized approach to managing all legal and collection cases, whether in favor of or against the organization.

LEGA LITE

Lega Lite stands out as a high-performance private cloud solution for organizations looking to maintain full control over their data. It integrates seamlessly with existing systems and can be customized to meet user-specific requirements. Lega Lite allows in-house counsel and external legal partners to collaborate efficiently from anywhere, ensuring seamless, remote operation.

AVIOFLEX PRODUCT FAMILY

Effective technology solutions
for every process in the
aviation industry

Providing unique, end-to-end solutions tailored for the aviation industry, the AvioFlex suite of products by Innova simplifies complex airline operations with advanced technological capabilities. This product line enhances operational efficiency and safety, ensuring smoother processes at every stage.

AVIOFLEX CABIN+

Delivering quick and easy access to critical flight data, AvioFlex Cabin+ provides cabin supervisors with all the essential information they need during flights. This product enables the efficient generation of industry-required forms, ensuring compliance while saving valuable time.

AvioFlex⁺
Cabin+

AVIOFLEX CREW CHECK-IN

AvioFlex Crew Check-In allows flight crews to complete their check-in procedures on mobile devices with just a few taps. It consolidates all necessary flight information, saving significant time, especially during high-traffic periods at airports.

AvioFlex⁺
Crew Check-In

AVIOFLEX CREW DUTY

Ensuring flight crews can access all relevant flight information via mobile devices, AvioFlex Crew Duty facilitates communication between pilots, cabin crew, and other team members, providing a web portal and mobile access to all necessary flight details, resulting in flawless coordination.

AvioFlex⁺
Crew Duty

AVIOFLEX LIFUS MANAGER

AvioFlex LIFUS Manager simplifies airline training process tracking. It allows instructors to monitor which pilots or crew members have completed specific training and view the corresponding results. With real-time management through tablet integration, this solution enhances overall efficiency by streamlining training oversight and boosting operational performance.

AvioFlex⁺
LIFUS Manager

AVIOFLEX OPS MASTER

Specifically designed to help airlines manage their operation control centers, AvioFlex Ops Master offers a comprehensive solution for overseeing the growing number of flights, aircraft, and destinations. The system allows full visibility and control of all flight operations from a single hub, making managing complex and expanding operations easier.

AvioFlex⁺
Ops Master
